Isidore's continuing authority as a theologian in the early scholastic age is evident in a theological collection, compiled in Admont during the later 11th and early 12th centuries, featuring several works of Augustine, the *Sententiae* of Abelard, and the *Sententiae* of Anselm of Laon. A contemporary scribe filled the end of a quire (fol. 82r-v) with excerpts from Isidore's *Sententiae*, calling them *Sermo sancti ysidori de angelica et h*[*umana*] *condicione*. This collection is an important example of early scholastic theology, and Isidore was considered a useful addendum, but not a central feature, to such a collection.[79] Despite being overshadowed by scholastic sentence collections, over 500 copies of Isidore's *Sententiae* survive, many from after the 12th century.[80] Some of these later copies reflect theology's move from the monastic cloister to the urban schools, as witnessed by copies surviving in Orléans: two different 12th-century copies of the *Sententiae* come from the Abbey of Fleury (Orléans 74 [71] and 187 [164]) and another 12th-century copy produced perhaps at Saint-Maur-des-Fossés in Fleury and later owned by the Abbey of Fleury itself (Orléans 150 [207]), while a later copy was produced and used in Paris by the mid-15th century and donated to the seminary of Arles (Orléans 186 [163]).[81] And then there is the 15th-century *Sententiae* copied with Dante's *Divine Comedy*, which I noted at the start of this essay.[82]

Isidore's main sources for his theological works were St Augustine and St Gregory, and he was placed proudly alongside these Church Fathers in later manuscripts. For example, in the first half of the 13th century Bishop Jocelyn of Wells (d. 1242) ordered made and presented to the Franciscans of Bristol a fine manuscript containing Isidore's *Sententiae* and *Synonyma*, followed by three works of Augustine.[83] Isidore could also be juxtaposed with more recent theologians. Lincoln Cathedral manuscript 203 is an early 14th-century, English copy of Hugh Ripelin's widely read *Compendium theologicae veritatis*, to which a contemporary scribe added a complete copy of Isidore's *Sententiae*. The two works make an obvious pair, as each presents a summary of theological truths.[84] The *Sententiae* were Isidore's first work in print (Nuremberg: 1470), even before the *Etymologiae* (*editio princeps* 1472).[85]

7 The Afterlife of Isidore's Shorter Religious Treatises

Less popular than the *Sententiae*, but still influential, were Isidore's exegetical treatises, *Quaestiones in Vetus Testamentum*, *Prooemia in libros ueteris ac noui testamenti*, *Allegoriae*, and *De ortu et obitu patrum*,[86] all of which (but particularly the *Quaestiones*) served as models for biblical interpretation for the rest of the Middle Ages. These Isidorian works remained in use both on their own merits and because much of Isidore's treatment of biblical signification was adopted in the 9th century by Hrabanus Maurus, and then in the 11th-century *Glossa ordinaria* to the Bible, which would be copied and later printed with many Bibles for the next five centuries.[87] Whether later medieval readers knew it or not, they were often reading Isidore's biblical commentaries when they read a glossed Bible. To give just one example, the ordinary gloss on Genesis 22, the story of Isaac, comes first from Hrabanus's *Commentariorum in genesim libri quatuor*, followed by a lengthy quote from Isidore's *Quaestiones* on Genesis.[88]

Scribes in both the Carolingian and high medieval periods recognized the similarities and utility of these exegetical texts, and frequently copied them together, especially the triad of the *Prooemia*, *Allegoriae*, and *De ortu et obitu*

patrum. These texts were copied together, seemingly as a single unit, in manuscripts from 9th-century Orléans, 12th-century Seckau (Austria), 14th-century Padua, and 15th-century Nürnberg.[89] The last work in this triad, *De ortu et obitu patrum*, while not nearly as common in later manuscripts as Isidore's *Etymologiae* or *Sententiae*, still found its niche in vernacular literature. Brunetto Latini translated portions of it for his Old French encyclopedia *Livre dou Tresor*, *c*.1260–70.[90]

Among just a few of the high medieval exegetes who employed Isidore's glosses on the Old Testament, either directly or through intermediaries, are Bruno of Segni (*Expositio in Pentateuchum*), Richard of Saint-Victor (*Liber exceptionum*), Andrew of Saint-Victor (*Expositio super Heptateuchum*), and Peter the Chanter (*Glossae super Genesim*).[91] Later medieval exegesis, however, amounted to more than simply copying early medieval commentators. As Greti Dinkova-Bruun has demonstrated, high medieval biblical scholars, such as Alexander of Ashby and Abbot Gottfried of Admont, respected Isidore's original interpretation of biblical symbols but offered more nuanced and complex readings of certain passages. Isidore's words could also be rewritten for a new age of learning, as in the *Vetus Testamentum uersibus latinis* of Petrus Episcopus (d. 1219), where Isidore's exegesis is rendered in Latin hexameters for ease of memorization, in a "mechanical and uninspired way." By comparison, the contemporary poet Petrus Riga (d. 1209) also versified

Isidore's exegesis in his monumental poetic Bible called *Aurora* in a highly original composition.[92]

Some Isidorian texts fell out of favor, if the manuscript evidence is any indication. Christopher Lawson, in his edition of *De ecclesiasticis officiis*, records 102 manuscripts (complete or extracts) of that text.[93] A total of 43 of those come from our later period, and the bulk of those (32) are from the 11th and 12th centuries. Only 11 were copied after about 1200, and those are mostly extracts and abbreviations. Nonetheless, those extracts sometimes had active afterlives, such as Isidore's list of books of the Old Testament, found in *De ecclesiasticis officiis*, which is copied in both Hereford Cathedral, O. III. 2, and in Oxford, Merton College 120. In the Merton manuscript, Isidore's list is included between a 13th-century copy of Peter Comestor's *Historia Scholastica* and its index, and is used to supplement the newer, scholastic textbook.[94] Passages from *De ecclesiasticis officiis* even circulated as sermons, such as one for Christmas (inc. *Natalis domini dies*), which is found in a 14th-century sermon collection in Nürnberg, Stadtbibliothek, I, 10.[95] The same text from *De ecclesiasticis officiis* is included a homiliary from Michaelbeuern, produced in the later 15th century.[96]

A pattern appears in the later diffusion of shorter Isidorian texts: they continue to be copied after the 12th century, but usually in company with similar, modern texts. Such is the case with a copy *De ecclesiasticis officiis* in a manuscript produced in England in the later 12th century, now Oxford, All Souls College 28.[97] Two or more contemporary, monastic scribes produced a handy collection of texts on the ecclesiastical offices, beginning with Isidore's, and followed by similar works from an anonymous Roman *ordo officiorum*, Rupert of Deutz, William of Malmesbury, Drogo of Laon, and Bernold of Konstanz (attributed to Ivo of Chartres). The latter three works were relatively recent and were presented as companions or addenda to the authority on this topic, Isidore.

8 The *Synonyma* and *Differentiae* in the Scholastic Age

Contrary to the decline in interest in *De ecclesiasticis officiis* is the revival of Isidore's *Synonyma* toward the end of the Middle Ages.[98] Jacques Elfassi has demonstrated that the *Synonyma* was a popular text throughout the 7th through 13th centuries (which preserve some 200 manuscript copies) but experienced an even greater surge of popularity, especially in German lands, in the 14th through 16th centuries. He dates this "golden age" of the *Synonyma* to *c.*1300 to *c.*1570. Approximately 60 percent of the manuscripts of the *Synonyma* (302 out of 507) were copied in this later period.[99] The *Synonyma* is not a linguistic work, or a thesaurus, as the name might suggest, but rather a devotional text understood better by its alternate titles of *Lamentatio animae peccatricis* or *Liber soliloquiorum*. Much like the narrator in Boethius's *Consolatio philosophiae*, the sinful soul of Isidore's *Synonyma* is consoled by Reason, who shows the sinner the path to salvation and the distinctions of virtues and vices. The *Synonyma* enjoyed its late revival for a variety of reasons, charted by Elfassi: its ascetic and moral character appealed to the devotional impulses of the 14th and 15th centuries, and it was known (to name its more famous readers) by Jan Hus, Thomas Hoccleve, and Christine de Pizan. These authors either knew the *Synonyma* directly or, more often, through an intermediary like Thomas of Ireland, who quotes extensively from the *Synonyma* in his popular *Manipulus Florum*, or in one of at least four later medieval recensions of the work (known as *Collectum*, *De norma uiuendi*, *Monita*, and *Tractatus deflentis hominis et ammonentis rationis*). Elfassi records sixteen later medieval religious texts that borrow directly from the *Synonyma*.[100] The popularity of the *Synonyma* and its recensions is also evident from the number of French translations surviving: two of the *Synonyma* itself and one of the *Monita*. In the 16th century it was also translated into German, Italian, and French yet again.[101]

---

[98] Apart from Jacques Elfassi's many essays on the *Synonyma*, cited in his edition, *Isidori Hispalensis episcopi Synonyma*, CCSL 111B (Turnhout: 2009), the most complete study of the work (though mostly out of our chronological bounds here) is Claudia Di Sciacca, *Finding the Right Words. Isidore's Synonyma in Anglo-Saxon England* (Toronto: 2012).

[99] Jacques Elfassi, "La réception des *Synonyma* d'Isidore de Séville aux XIVe–XVIe siècles: les raisons d'un succès exceptionnel," *Cahiers de recherches médiévales et humanistes* 16 (2008), 107–18.

[100] Elfassi, "La réception des *Synonyma*," 114–16.

[101] Elfassi, "La réception des *Synonyma*," 110. On the French translation in particular, see Geneviève Hasenohr, "Isidore de Séville, auteur ascétique 'français'?" *Romania* 128 (2010), 299–351, and 129 (2011), 23–56.

Elfassi claims a German emphasis for the revival of the *Synonyma*, which is supported by manuscript numbers: more than half of the manuscripts from just the 15th and 16th centuries (107 of 210) are of German provenance.[102] However, a potentially earlier revival occurred in England.[103] The manuscripts of Worcester Cathedral provide evidence of this revival of the *Synonyma* and indications of how it spread. The cathedral library still possesses three manuscripts, all probably local in provenance and of the first half of the 14th century, which contain Isidore's *Synonyma* copied in collections of popular or pastoral theology, the only early medieval text copied with more recent (and often British) works: John of Wales's *Communiloquium*; shorter religious treatises of William de Montibus, Vincent of Beauvais, and Pseudo-Grosseteste; and Peter of Limoges's *De Oculo Morali* and Arnold of Liège's *Alphabetum Narrationum*.[104] Many of these manuscripts suggest the training of priests for the purposes of pastoral education and effective preaching.

By contrast, most of the later manuscripts of *Synonyma* are more strictly monastic and devotional in character, and suggest that the *Synonyma* became a standard work of ascetic spirituality among later medieval monks and canons, especially in England and Germany. The *Synonyma* features prominently in the collections of other English Benedictine houses, contemporary with or later than the Worcester manuscripts, including a remarkable thirteen copies at Saint Augustine's, Canterbury.[105] Likewise, the collection of manuscripts now in the Universitätsbibliothek of Graz, which are primarily of local provenance (Graz, Neuberg, Seckau, Seitz), like those in Worcester Cathedral, contains six copies of the *Synonyma* or its redactions.[106] One of these is of the 12th century (Graz MS 480), but the other five are all of the 15th century, and predominantly from Cistercian houses. In every example of these Graz manuscripts, Isidore's *Synonyma* is copied as part of a large collection of religious texts, typically monastic, penitential, or devotional in emphasis.

The later medieval period produced some impressive collections of Isidoriana, in which the compilers sought to gather the greatest works of Isidore together in complete copies. For example, two 14th-century volumes, one of

Isidore's *Sententiae* and the other of his *Etymologiae*, were bound together soon after (before 1500), in Merton College, MS 303.[107] A larger compilation is found in a 14th-century German manuscript, containing the *Etymologiae*, *Synonyma*, and *Differentiae*,[108] and the same three texts are copied together in a mid-13th-century manuscript from Exeter.[109] Medieval scribes found these three works to be good companions, in that each concerns the relationship of words to God and man: respectively, how the etymology of a word reflects its eternal truth, how synonymous words can be used to confess sins and address God, and how the small differences between words can highlight the order of divine creation.

The *Differentiae* contains two books, which are so different that they are sometimes treated as two distinct works, both in medieval manuscripts and today.[110] The first book, *differentiae verborum*, is more obviously about words, and it provides an alphabetical catalogue of words which are similar enough to be confused by medieval readers of Latin. The second book, *differentiae rerum*, is neither alphabetical nor clearly about words. Rather, Isidore uses the concept of *differentia* developed in the first book to provide a brief *summa* of theology, cosmology, and human nature (e.g. the difference between *Deus* and *Dominus*, *Trinitas* and *Unitas*, or *homo* and *vir*). The *Differentiae*, especially its second book, could be interpreted in the scholastic age as a linguistic work or a theological treatise (or both), if we can judge from the texts it was copied with. A 15th-century German manuscript contains just book 2 of the *Differentiae*, copied with a variety of rhetorical, epistolary, and educational texts: here, the *Differentiae* are framed as a tool to aid Latin composition.[111] The same literary tendencies are on display in the 14th-century manuscript mentioned above (Leiden, BPL 11), containing Isidore's three main treatises on words, and in two 15th-century German manuscripts from the monastery of Benediktbeuern the

Differentiae are copied in large theological and devotional collections featuring Patristic and more recent authors, including Innocent III, Henry of Langenstein, Jean Gerson, Jerome, and Augustine.[112]

9 Conclusion

By way of conclusion, I will return to Thomas Aquinas, who (as a fictional character) directed Dante's gaze toward Isidore and his flames of divine inspiration. Thomas Knoebel, in the introduction to his translation of Isidore's *De ecclesiasticis officiis*, says of Isidore that, "by the time of St. Thomas Aquinas his authority had begun to wane."[113] This statement needs qualification. While Isidore's views on the nature of things were no longer to be accepted at face value in the scholastic age, as we have seen with the encyclopedists, he was still an intellectual force to be reckoned with, whose ideas still needed to be addressed in questions on almost any topic. Not least among those topics is the nature of law.

The real Thomas Aquinas, in his "Treatise on Law" (*Summa Theologica* Ia–IIae QQ.90–105), quotes extensively from Isidore's *Etymologiae* and *Sententiae*. Isidore considers law primarily in book 5 of his *Etymologiae*, where he provides definitions of the types of law (*ius*, *lex*, and *mos*) and statements that Aquinas could use both for and against his articles. In this respect, Aquinas is following the example of Gratian (or his students) in quoting from Isidore in the "Treatise on Laws" that opens his *Decretum*.[114] Aquinas, in *Summa Theologica*, Ia–IIae Q.90 art.2, poses the question, "Whether the law is always directed to the common good?" He provides an objection to this question from Isidore, "If the law is based on reason, whatever is based on reason will be a law" (*Etym.* 5.3), but also the contrary, "Isidore says that laws are enacted for no private profit, but for the common benefit of the citizens" (*Etym.* 5.21).[115] On the question of whether public promulgation is essential to law, that is, must law by definition be officially promulgated, Aquinas replies to one of the objections, "The promulgation that takes place now, extends to future time by reason of the durability of written characters, by which means it is continually promulgated. Hence Isidore says that *lex* (law) *is derived from legere* (to read) *because it is written*."[116] (Note that Isidore's statement is not given force of authority but is used to illustrate a point that Aquinas has already argued logically.)

[115] Thomas Aquinas, *Summa Theologica* Ia–IIae Q.90 art.2, in *Basic Writings of Saint Thomas Aquinas*, ed. Anton C. Pegis, 2 vols (New York: 1944), 2:744.

Aquinas treats Isidore as more than just a handy repository of data, which is the approach typical of many scholastic authors, for he engages seriously with Isidore's ideas on the meaning and essence of law, and gives him as much, if not more, weight on the subject as he does in the case of Aristotle. Indeed, portions of Aquinas's "Treatise on Law," especially question 95 on human law, read as an extended commentary on Isidore's *Etymologiae* 5.21.[117] The third article of this question is "Whether Isidore's description of the quality of positive law is appropriate?" and the fourth article is "Whether Isidore's division of human laws is appropriate?" In both articles, after posing the usual objections to these statements from Isidore, he offers the obligatory contrary arguments: "On the contrary stands the authority of Isidore" and "The authority of Isidore suffices."[118] While Aquinas does not take Isidore's statements on law entirely at face value, since he provides extensive commentary on them and compares them with Aristotle's statements on law in his response to each article, nonetheless Isidore's authority as a saint, Father, and "schoolmaster of the Middle Ages" is sufficient for Aquinas to quash any purported objections to his words.[119]

Aquinas is, of course, not your typical scholastic author, but at the same time he is the most famous representative of scholasticism, having internalized all the available works of Aristotle and many of the best works of Latin scholasticism produced in the 12th and 13th centuries. Aquinas is a product and producer of scholastic masters who continued to read early authorities like Isidore with great respect, but with a keener eye for highlighting internal contradictions, disputes with other authorities, and outdated opinions. In short, the words of Isidore (like those of any authority) had to be weighed against those of the two greatest authorities of scholasticism, the Bible and Aristotle. With respect to those two authorities, two different Isidores become apparent in any university or monastic libraries of the later Middle Ages: first, a Master Isidore of the *Etymologiae*, father of encyclopedias, and a revered, albeit antiquated and insufficient, scholar on the natures of things; and second, Saint Isidore of the *Sententiae* and *Synonyma*, a teacher of moral and theological truths and a guide to exploring the mystical significances of words and things. These two Isidores rarely meet in the individual manuscripts of the scholastic age, but the most perceptive readers, like Dante or Aquinas, recognized that the natural philosopher and the mystical theologian were just two faces of a profound and multifaceted Father of the Church.[120]

CHAPTER 19

Isidore of Seville in the Renaissance (1500–1700): The Role of Golden Age Spain

Jeremy Lawrance

1 Introduction

The respect accorded to Isidore during the Middle Ages is attested by an unbroken chain of a thousand extant MSS of his *Etymologiae*, *Sententiae*, and *Synonyma de lamentatione animae peccatricis*, and thousands more containing excerpts, compilations, or translations. His method, allied to an attractive clarity and *brevitas* (Wood 2010), influenced countless authors even when they were not consciously imitating him, so that the *Etymologiae* has been called the "Grundbuch des ganzen Mittelalters" (Curtius 1948, 487), the "source à peu près exclusive de toute la culture savante" (Zumthor 1975, 149).[1] This study reflects on Isidore's different but no less interesting fortune in the Renaissance. It focusses on Golden Age Spain, which played a significant role in the story because Spaniards exalted Isidore as one of their most eminent ancient authors, while at the same time acquiring a global empire that expanded the horizons of what was known in ways that rendered the saint's worldview obsolete—facts which serve to raise two broader questions about the legacy of Isidore in early modern Europe.[2]

---

[1] Bischoff 1961; Marrou 1966; Reydellet 1966; Fontaine and Pellistrandi 1992; Díaz y Díaz 1993, 215–23 (to avoid burdening the notes—the early books quoted often have titles of five to ten lines—citations are by author-date, full details given in "Works Cited" at the end). As Elfassi and Ribémont (2008, 1–5) point out, statistics are provisional because the tradition has been little studied after the 12th century; they count 455 complete MSS of *Etymologiae* (henceforth *Etym.*), 449 of *Sententiae*, and 507 of *Synonyma*, but if partial copies are included, Anspach traced 1080 of *Etym.* (Anspach 1936; Fernández Catón 1966), at which point counting ceased (Van den Abeele 2008). Martín 2004, Elfassi and Poirel 2004, and Codoñer et al. 2005 remind us also of the diffusion of the other fourteen titles in Braulio's *Renotatio librorum Isidori* (*BHL* 4483, Martín 2006, 11–274, at 199–207).

[2] The complexity of the pre-Renaissance tradition makes any sweeping periodization risky; there were different medieval Isidores, and though half the extant MSS date from the 14th-15th centuries, showing that he remained "au rang des autorités," he was already becoming prized less as a scientist and more as a spiritual writer (Elfassi and Ribémont 2008, 2–3, "la découverte d'Aristote et de la science arabe changèrent l'arrière-plan intellectuel des

© KONINKLIJKE BRILL NV, LEIDEN, 2020 | DOI:10.1163/9789004415454_020

The first is about a quintessentially Isidorian topic, the encyclopaedia. It was chiefly for his *Etymologiae* that Isidore was regarded during the Middle Ages as an *auctoritas*, an authority in the special sense given to the word by societies that for religious reasons regard the visible world as an inscrutable delusion and written tradition—*scriptura*—as the only trustworthy source of knowledge. In the early modern period, with the rise of experimental science, scholarship, and a new curiosity, this static notion of authority began to give way to more dynamic forms of enquiry. It was not just that methods (*téchnē*) changed, as telescope and compass replaced ancient texts as tools for exploring cosmography, and even Isidore's credentials as etymologist came to be challenged by the new discipline of philology. The paradigm shift also involved society's *a priori* postulates about the content and order of the encyclopedia, the unconscious boundaries of its concept of the knowable (*epistḗmē*).[3] The episteme is determined not so much by what is in the world as by a given

---

encyclopédistes […] le modèle encyclopédique isidorien fut dès lors moins prégnant"). For discussion of this point, see Winston Black's essay in this volume. The only monograph on Isidore in the Renaissance is Robert Benaway Brown, *The Printed Works of Isidore of Seville: A Trial Check-List* (Lexington: 1949); in what follows I draw on Schierbaum 2009; Eybl et al. 1995; Meier, Schuler, and Heckenkamp 2002; König and Woolf 2013, part III; Taylor 2014.

[3] On the mutability of the *épistémè*, see Foucault 1966 (though he contests the notion of paradigm shift; see next n.); "static" vs. "dynamic" in the 16th century, Maravall 1965. The term "encyclopedia" is a nice illustration: Le Goff 1994 points out its "inexistence au Moyen Âge;" Lat. *encyclopaedia* was coined by late 15th-century humanists from a mistaken reading in Quintilian's account of the orator's "rounded education," *Inst. or.* 1.10.1 "orbis ille doctrinae quem Graeci ἐγκύκλιον παιδείαν [*vulg. ante 1542* ἐγκυκλοπαιδείαν] vocant" (Henningsen 1966, 1967; Fowler 1997, 27–30). Beyer de Ryke (2003, 1244, n. 5) argues that, in the more extended sense "mirror of the world" (med. *speculum*), "la chose existait avant"; and indeed, the first Spanish attestations appear to predate all others, and refer specifically to Isidore. However, they are suspect for reasons directly related to our topic: Du Cange 1733–36, vol. 3, col. 83, cites a 13th-century *Vita* of Ildefonsus attrib. to Lucas of Tuy, "he was put to study with Isidore to complete the encyclopedia of all the sciences [ut omnium scientiarum *Encyclopædiam* absolveret]," but the reference is to Saenz de Aguirre 1694, 569a §164 and a text first publ. "ex varia librorum antiquorum lectione" in Illefonsus 1556 fol. ††1^{v}, whereas the word is absent from the *Vita*'s many medieval recensions (e.g. Martín 2011b, 197–98/2011c, 232–42; Gaiffier 1976). The 15th-century Castilian paraphrase by Alfonso Martínez de Toledo omits it too; but in his *Vida de sanct Isidoro* (1444) he seems to talk of "the famous book of *Etymologies*, the variety and doctrine of which is as great as all that contained in […] the *encyclopedia made up of the seven liberal arts* [la encyclopedia, que son las siete artes liberales]" (Talavera 1952, 65–161, at c. 7, 77), where the Latin (also attrib. to Lucas, n. 6, below) put only "trivii […] quadruvii investigacione" (BNM Mss/10442, fol. 5^{v}, s. XIII). If authentic, Toledo's would be the earliest occurrence in any language, but both extant witnesses, BNM Mss/1178 and Esc. Ms. b.III.1, are 16th-century copies interpolated by Alvar Gómez de Castro in the 1570s (Talavera 1952, xxxv-xlii), and the phrase is suspiciously like one in the preface to Isidorus 1577 (see n. 20 below).

society's perception of which elements among the infinite mass of phenomena are definable as knowledge, "the strategic apparatus which allows [it] to separate out, from all the statements which are possible, […] those that may from those that may not be characterized as scientific" (Foucault 1980, 197). Discoveries such as the existence of the New World or the heliocentric model of the universe demonstrate this point, for whereas learned Europe fully accepted the geographical implications of Columbus's landfall within eight years of his return, the Catholic Church strenuously rejected Copernicus's *De revolutionibus orbium cœlestium* of 1543, and put Galileo's 1632 defence of it, *Dialogo sopra i due massimi sistemi del mondo, Tolemaico e Copernicano*, on the Index of Prohibited Books until 1835.

The asymmetry in the fates of these two aspects of ancient cosmology, terrestrial and celestial, shows not just how culture changes what constitutes knowledge, but also how ideology and power control the articulations of that change, or, in Foucault's parlance, its "syntax." In broad terms we may conceive of the early modern European episteme as having undergone a shift from the theocentric faith of the Middle Ages towards more empirical kinds of knowledge based on reason, but the example shows that in detail the story was far more complicated. Foucault's subtitle, *An Archaeology of the Human Sciences*, refers precisely to the layered stratigraphy of overlapping continuities and new beginnings that underlies the history of ideas—the wrinkles beneath its smooth surface.[4] The task for any student of the early modern reception of Isidore's writings is to chart its course through such contradictory reticulations of ideology and epistemological change.

The second broad question arises from the first, and it concerns the specific relation between authority and sanctity. For us Isidore is a late antique writer, a cataloguer of the fading lore of the ancient world and a first-hand witness of the barbarian Christian culture that brought it to an end. One might assume that scholars of the Renaissance revival of learning found him interesting for the same reason. A few did; but the chief concern of that age proved to be his role in *historia sacra*, as an apostle of Catholic orthodoxy. We are always conscious on some level that "Isidore" means St Isidore, yet one of the striking discoveries for any student of his fortunes in the Renaissance is that he was only canonized by Pope Clement VIII in 1598, and he was not officially declared a Doctor of the Church until Pope Innocent XIII's *motu proprio* of 1722.

---

[4] Foucault 1966, 14 "l'archéologie […] définit des systèmes de simultanéité, ainsi que la série de mutations nécessaires et suffisantes pour circonscrire le seuil d'une positivité nouvelle." Meier (2003, 93–94, 97) likewise denies that epistemological change is unidirectional; any simple scheme of a transition from late antique/medieval arrangements by an *ordo rerum* seen as inherent (higher to lower, spiritual to material, in order of creation, etc.) to early modern "topical or methodical and systematic designs of order […] according to 'final concepts'," and then modern mechanical, e.g. alphabetic, order because an "overarching ordering [is] no longer supportable by universal systematisation of cognition" (see Dierse 1977, Schmidt-Biggemann 1983) is belied by the fact that alphabetization sometimes occurred even before 1300, while topical arrangements persisted into the Enlightenment, e.g. the "Explication détaillée du système des connoissances humaines" prefacing the *Encyclopédie* (Diderot and d'Alembert 1751–72, vol. 1, xlvii–lii and plate).

These facts do not, of course, mean that Isidore was not honoured as a saint in the interim. Only seventeen years after his death the Eighth Council of Toledo pronounced in apocalyptic tones that Isidore was the Church's latest and most likely last Doctor on earth.[5] After the Muslim conquest in 712 his tomb in a chapel in the Seville townlet of Santiponce came to be venerated as a shrine (later the Cistercian/Hieronymite monastery of San Isidoro del Campo, founded 1301). By 1063 Isidore's relics were so revered that Fernando I of León obliged the emir of Seville ʿAbbād II al-Muʿtaḍid, as part of his annual tribute, to hand them over for translation to the purpose-built basilica of San Isidoro in León, where a new cult was established.[6] Thenceforth Isidore was venerated in León-Castile as a national patron, his most notable miracle being a skyborne epiphany at Fernando III of Castile's reconquest of Seville in 1248. His feast on 4 April figured regularly in the liturgical calendars of medieval Castilian breviaries, but the local aspect remained paramount; in the calendars of other kingdoms, even neighbouring Aragon and Portugal, Isidore was replaced by, or at best shared his day with, the Italian saint and (from 1295) Doctor of the Church Ambrose.[7] In the papacy's Roman Breviary 4 April was *dies non festiva*, and

[5] VIII Conc. Toletanum (A.D. 653) §2 "Nostri quoque seculi Doctor egregius, Ecclesiæ Catholicæ novissimum decus, præcedentibus ætate postremus, doctrinæ comparatione non infimus, & (quod maius est) in seculorum fine doctissimus atque cum reverentia nominandus, Isidorus"—a text prefixed to Grial-Loaisa, vol. 1, fol. ¶8^{v}, from its first published edition in Loaisa 1593, 416–76 (429). For discussion, see Mark Tizzoni's chapter in this volume.

[6] The cult produced a set of hagiographical texts relevant to our story, 4 works in nearly 20 recensions (Gaiffier 1961; Fontaine 2001; Martín 2005, 2006, 2008; Silva 2009): (*i*) Redemptus, *Obitus Isidori*, s. VII (BHL 4482, Martín 2006, 379–88); (*ii*) *Translatio Isidori*, *c*.1063 (BHL 4488, Martín 2011a), revised *c*.1200 as *Historia translationis* (BHL 4491, Estévez Sola 1997); (*iii*) Lucas de Tuy, *Miracula Isidori*, *c*.1224, preserved only in a Renaissance MS (León, Real Colegiata de San Isidoro Ms. 63, unpubl.) and trans. (Lucas de Tuy 1525); (*iv*) some 11 versions of a *Vita* (BHL 4482–93), from contemporary accounts by Braulio and Ildefonsus (BHL 4486°, Anspach 1930, 57–64; BHL 4484, Codoñer 1972, 128) to the "fantastic tissue of legends" of *c*.1300 also attrib. to Lucas of Tuy (Talavera 1952, lxxxi), which via Renaissance copies from a Toledo cathedral MS (BNM Mss/10442) made its way into *Acta Sanctorum* (BHL 4486; Henschen 1675, 330F–351D).

[7] On nationalism see Henriet 1999; for the calendar, compare Portugal (Ecclesia Catholica (henceforth EC) 1494, fol. 2^{v}, use of Braga: Ambrose only), Roussillon and Naples, Crown of Aragon (EC 1500, fol. [*2]^{v}, use of Elne/Elna, and BUV Ms. 890, fol. 2^{v}, Dominican use, Naples *c*.1467: Ambrose only), Catalonia/Valencia/Aragon (EC 1479, fol. [iii]^{r}, use of Lleida; EC 1492,

Isidore found no place in it until the first major Renaissance revision of the liturgy in 1535. It is no coincidence that this revision was the work of a Spanish cardinal, Francisco de Quiñones OFM (*c.*1480–1540), a faithful confidant of Charles V and erstwhile protégé of the cardinal-archbishop of Toledo Francisco Jiménez de Cisneros (1436–1517), the first Spanish statesman to take an interest in publishing an Isidorian text.[8] Despite Quiñones's patriotic manoeuvre, however, Isidore was once more removed from the universal roll of saints in 1568 as part of the Council of Trent's great clear-out of the Catholic calendar, which banned Quiñones's Breviary and reduced the annual feast days to only 149.[9] There were strenuous complaints, and Gregory XIII was soon pressured into restoring Spain's saints, but merely as Proper Offices for observance in the Spanish empire.[10] However, the reform of the cult of saints involved not only rationalizing the calendar but also more stringent rules for canonization based on new "criteria of humanist historical criticism" (Burke 1999, 131). At the king's behest, therefore, Spanish scholars set to work to document Isidore's cause.

---

fol. [2]^{v}, Valencia; and EC 1496, fol. [*4]^{r}, Zaragoza: Ambrose and Isidore), Galicia (EC 1497, fol. [2]^{v}, Compostela: "Ambrosii ep̄i, iiii cap. Isidori ep̄i, ii cap."), vs. Castile-León (e.g. BNM Res/186, fol. 2^{v}, Hieronymite use, copied by "Garsias Crunensis"—of Logroño?—1463: Isidore only). A cursory trawl of *c.*100 15th-century breviaries reveals no exceptions: Isidore is absent outside Iberia and stands alone only in Castile-León.

[8] EC 1535, fols †6^{r} (calendar), 304^{r} (*historia propria*), the day having been *non festiva* up to then in all Roman breviaries. On Quiñones's revision, ordered by Clement VII, see his preface to Paul III (EC 1535, fols †2–†4^{v}) and Legg 1912; for his political career, Meseguer Fernández 1958. For Cisneros's publication see below, and at n. 31.

[9] The reforming commission that produced EC 1568 restored 4 April as *dies non festiva* and assigned Ambrose a Double on 7 December. On the implications for the Counter-Reformation cult of saints of the "unprecedented step" of Pius V's bull *Quod a nobis* of 9 July 1568, which made use of the new liturgy universally obligatory and outlawed Quiñones's edition (EC 1857–72, vol. 7, 685, §CI), see Ditchfield 2007.

[10] A Compostela breviary published by order of Archbishop Gaspar Zúñiga y Avellaneda in 1569, less than a year after Pius V's bull (see n. 9, above), outrageously flouted the Tridentine reform by assigning a feast to every single day in the calendar—that is, even more than pre-reform editions such as EC 1567, fols †3–‡2^{v}. It gives 4 April to Ambrose, and 3 April to Isidore, with the terse note "erit mane" (EC 1569, fols ¶¶2^{v} and 371^{r-v}, office). A tetchy preface to the diocesan clergy (fols ¶2–5^{r}) tells how Zuñiga's plan of "revising your old Breviary" was held up by the avalanche of business from the many-headed "Lernaean monster" of Trent—pointedly, however, with no mention of the new Breviary; and the volume concludes with a peculiar device, a sword sprouting palm leaves and crowns over the motto "Last victory to the vanquished! [Cessit victoria victis]" (fol. 591^{v}). This was the sort of scandal alluded to by Gregory XIII's conciliatory breve of 30 December 1573, printed as preface to EC 1591, 3: "His Holiness had heard from representatives of our dearest son Felipe, Catholic king of the Spains, that the said edition aroused many *difficulties* in those parts"; Isidore was explicitly restored ("for whom there may be celebrated an Office of Doctor," 4).

Continued pressure led to his definitive canonization in 1598, and hence to his inclusion in the *Acta Sanctorum* of 1675.[11]

Each of these dates turns out to be significant in the story of the early modern reception of Isidore; or rather, they *are* the story. Cardinal-Archbishop Cisneros's project in 1499 to reinstate the "Gothic" liturgy that bore Isidore's name took place in the euphoric context of Castile's sudden rise, first (with the Union of Crowns and expulsion of the last Muslim sultan of al-Andalus) to a position of primacy in the Iberian Peninsula and then (with the discovery of America and foundation of the Atlantic economy) to the rank of world power. Quiñones's inclusion of Isidore in the Roman calendar was prompted by the Catholic Church's major reassessment of sainthood and hagiography as tools for a confessional sacralization of states and territories in the wake of the Protestant Reformation of the 1520s.[12] The royal commission for the first scholarly edition of his *Opera* from Visigothic MSS was formed in 1571, in the immediate aftermath of Pius V's reformed breviary; publication in 1597–99 coincided with the date of Isidore's canonization. The inclusion of Isidore by the Bollandists in the immense enterprise of *Acta Sanctorum* in the 1670s was likewise based on the efforts of antiquarians in Carlos II's Spain, such as Nicolás Antonio (1617–84), and involved another trawl of MSS in Spanish ecclesiastical libraries. Finally, in the age of Reason, beyond the purview of this study, the convulsive separation of the powers of Church and State led to a third spurt of scholarly attention at the behest of another cardinal-archbishop of Toledo, Francisco Antonio de Lorenzana (Isidorus 1775, 1778; and see Pobladura 1961), culminating in the second and, to date, greatest project to publish the complete works (Isidorus 1797–1803), based on Grial-Loaisa and also assembled by a Spaniard, Faustino Arévalo, though by that date, as a Jesuit, he had been expelled from Spain and was settled in Rome.

In the light of the two broad topics sketched out above, one is struck by a pair of remarks in two fine recent works on Isidore. Noting that modern study of Isidore began with Lindsay's Oxford text of the *Etymologiae* in 1911, which "facilitate[d] the characteristic logophily of contemporary Latin studies," John Henderson (2007, 212–13) observes: "Undoubtedly, this slant does Iberian studies no favours," but adds in passing, "for large stretches we still depend on J.B. Pérez's sparse notes in de Grial (1599) adopted by Arevallo's edition (1797–1803), which was reprinted for the Latin Patrology (Migne 1850)." So too Barney, Lewis, Beach, and Berghof, discussing the influence of the *Etymologiae* in the introduction to their translation (Isidorus 2006, 24–27), note:

---

[11] As Burke notes (1999, 131), the Counter-Reformation resulted in a "hiatus" of 65 years in which no new saints were enlisted, until Sixtus V set the ball rolling again in 1588 by creating the Congregation of Sacred Rites and Ceremonies. It was under the dispensation of the latter's bureaucratic procedures—dependent on powerful sponsors rather than popular devotion (Gotor 2002; Armogathe 2003)—that Isidore's beatification came about, one of only six that century. Even so, he was not reincorporated into the General Roman Calendar of the universal Latin rite until 1730, with an optional memorial. Today it is only in the Spanish national calendar that Isidore is awarded a feast, on 26 April.

[12] On this European context of national confessionalization see Fros 1982; Boesch, Gajano, and Michetti 2002 (especially the afterwords by Roberto Rusconi, 393–95, and Simon Ditchfield, 405–09); Backus 2003; Ditchfield 2004, 2009.

> The first important scholarly edition was that of Juan de Grial, which became the basis for work on Isidore until the early nineteenth century. Its valuable notes are retained in [Arévalo's] seven-volume edition of the *opera omnia* from Rome between 1797 and 1803 [...], whose notes update and correct Grial.

Yet, apart from this sentence, the authors do not take the story of Isidore's "influence" anywhere at all beyond Dante, Chaucer, and Gower. Neither book offers any comment on why the significant editions of Isidore before the 20th century should have been made by Spaniards. We now take for granted that the saint's impact on life and thought ended before the onset of the Renaissance, and that if he has been read at all since, it is only by historians of the Latin language and late antiquity. The fact that his text was the object of prolonged attention in Spain in the early modern period perhaps strikes scholars as too odd or obvious to merit explanation; at any rate, they tend to ignore its connexion with the dispute over whether or not Isidore is a saint of the Catholic calendar, or with Spain's urgent requirement, given its Habsburg monarchs' claim to be the heirs of the Holy Roman Empire, to have at least as many Doctors of the Church as Italy.[13] These themes serve as the framework for the following notes on Isidore's reception in the Renaissance.

---

[13] This aspect, mentioned by Burke (1999, 141, "If there was a 'Spanish preponderance' in the field of sanctity as in that of international relations, the two phenomena may not be unconnected," citing five examples of royal pressure), was made explicit by Felipe II's legates in their depositions on Isidore's canonization, in which they adduced the (spurious) chronicle of "Eutrand" (a manipulation of Liutprand) to prove it was him, not Ambrose, whom Boniface VIII made one of the four Doctors—Augustine, Jerome, Gregory, and Ambrose—when he invented the title in 1295 (*Acta Sanctorum* 1675, 327, citing Tamayo Salazar 1652, 496).

2 The Decline of Isidore as *Auctor*

The decline in Isidore's reputation as an authority, tacitly affirmed by Barney, Lewis, Beach, and Berghof's failure to find any creative or technical author after the 14th century who was influenced by him, is reflected in a variety of Renaissance sources. It may be illustrated by referring to a case that has already been mentioned: cosmography.

In a letter to the Catholic Monarchs relating the discoveries made during his third voyage to America in 1498, Columbus reported with excitement his first and, as it turned out, only landfall on Terra Firma, the continent that he insisted to his dying day was Asia. Skirting south of Trinidad, his caravels arrived at the delta of the Orinoco in mainland Venezuela. The Admiral correctly deduced that any river which pumps fresh water seven miles out to sea must either be immensely long and therefore belong not to an island but the mainland, or else come rushing down from a great height. He convinced himself that it was both: divining that he had bumped into a continent, he leapt to the further conclusion that what he had found was the huge mountain of Earthly Paradise, which is on the equator at the far eastern shore of the world and reaches many miles up to heaven, where one may have face-to-face colloquy with God—so high, in fact, that it makes the earth pear-shaped, or at least forms a mighty nipple on its broad bosom. In support of this identification, which would have had the gratifying consequence of adding the Garden of Eden to Queen Isabel's conquests, Columbus adduced Isidore, along with Bede, John Damascene, Strabo, Peter Comestor, Ambrose, and Duns Scotus, to prove that the river he had stumbled upon was the Ganges—not a New World but India.[14] Yet within a few short years, despite the fact that the imperial name for America would remain *las Indias* for another three centuries, everyone in Europe knew not just that

---

[14] BNM Vitr/6/7, fols 74^r-75^v (*Relación del tercer viaje*; Colón 1992, §30, 366–406, at 381ff.) "Sant Ysidro y Beda y Damasçeno y Estrabo y el maestro de la *Hystoria scolastica* y Sant Ambrosio y Scoto y todos los sanos theólogos conçiertan qu'el Paraýso terrenal es en el Oriente, etc. [...] Las señales son muy conformes, [...] y si de allí del Paraýso no sale [el agua], parece aun mayor maravilla. [...] Yo muy assentado tengo e[n e]l ánima que allí adonde dixe es el Paraýso terrenal; y descanso sobre las razones y autoridades sobreescriptas" ("St Isidore and Bede and Damascene and Strabo and the Master of *Historia scholastica* and St Ambrose and Scotus and all sound theologians agree that Earthly Paradise exists in the Orient, etc. [...] The features match very well, [...] and if the river does not flow from Paradise, it seems even more of a marvel [...]. I am very convinced in my soul that the place I have spoken of is Earthly Paradise; I rest my case on the afore-mentioned proofs and authorities"). His direct source was Pierre d'Ailly, *Imago mundi* 55 (1410), who used *Etym.* 13.21.8–10, 14.3.1–7. On the cartography of Paradise, Scafi 2006, esp. Chapters 3, 5–8.

Columbus was mistaken but, more momentously, that the authorities he cited, Isidore at their head, had an erroneous concept of the globe.

It is instructive, then, to consult the cosmographical works produced for the Spanish Crown in the century after Columbus's voyages. The greatest of them were the atlases issued by Abraham Ortels, the Flemish geographer and mapmaker appointed as Felipe II's royal cartographer in 1575. By then he had already dedicated to Felipe the first-ever atlas, his *Theatrum Orbis Terrarum* of fifty-three maps. At the start it contains a catalogue of ninety-seven "Auctores"; they do not include Isidore (Ortelius 1570, fols A5^{r}–6^{v}). The first map in the volume is entitled "Orbis Terrarum" and portrays the new worlds discovered by Iberian navigators in the previous seventy-eight years; in its caption Ortels does mention "Isidorus Hispalensis," but among the "Recentiores," i.e. as a medieval source not an ancient *auctor* (fol. 1^{r}). *Theatrum* is said to have been the most expensive book ever printed up to that date; nevertheless, it sold with such alacrity that some thirty-one editions were printed between 1570 and 1612, in Latin, Dutch (1571), German (1572), French (1572), Spanish (1588), English (1606), and Italian (1608), along with five *Additamenta* (1573–97) which enlarged it to 119 maps and correspondingly plumped up the list of Auctores to 183—but still without noticing Isidore, who figures only in the one line I have mentioned.

The Spanish *Theatro de la Tierra Universal* of 1588 was dedicated to King Felipe's son, the future Felipe III. By then Ortels had also laid the basis for the critical study of ancient geography with his lexicon of ancient place names, *Synonymia geographica*, issued by the royal printer Plantijn in 1578, expanded as *Thesaurus geographicus* in 1587, and then again in 1596. *Thesaurus* was dedicated to the canon of Toledo García de Loaisa (1534–99), whom we shall encounter shortly as Juan de Grial's fellow editor in the great royal edition of Isidore commanded by Felipe II; yet Isidore appears in the book's Index only as "Isidore corrected," with reference to his errors about Blemyes, Clitorius, Ceos, Erinus, Gelonium, Helles, Telos, and Tragoditae. Admittedly another late antique writer on the Goths on the same page, Jordanes, receives even shorter shrift ("A truly depraved author [...] His hallucinations [...] His errors cleared up"), but compare Pliny the Elder, who gets half a column with subentries such as "Annotated [...] Emended [...] Defended [...] Excused"; and the same holds for Ptolemy and Pomponius Mela. Lest we hastily conclude that this was because Ortels, being more modern than poor old Columbus, was almost as clever a critic of sources as we are, under *Amazons* his entry reads "Their homeland [...] Whom they married [...] Where they were defeated by Theseus."[15]

---

[15] Ortelius 1588, fol. *2 "Nobili ac R° domino Garciae Loaysa, sanctæ Toletanæ ecclesiæ archidiacono" (2nd ed. 1596, fol. †2 "*doctori* Garciae *de* Loaisa *Giron*, *Regi ab eleemosynis,*

Meanwhile, in 1579 Ortels had started his *Parergon*, a series of maps illustrating ancient and sacred history that first appeared as supplements to *Theatrum*. They were published as a separate volume in 1595, shortly before his death; the last and finest edition came out in 1624 with a handsome epigraphic dedication to Felipe IV. The first map of secular history, "Geographical figure of the ancient age [...] up to A.D. 1492," sports a caption expatiating on Columbus's magnificent boon to humanity and how much greater the empire of the Felipes was than the "Roman world or Roman empire" of the Caesars shown in the next map.[16] Isidore figures not at all in either caption, and he plays almost no part in the rest of the work either. I have spotted only two passing mentions. One is on siting the Urals in the "undiscovered and fabulous" far north of the map of Europe: "almost all the Ancients believed this, [...] but all of them wrongly [...], neither these nor any other [mountains] are to be seen there today; [...] but Isidore locates the Riphaean forests here, and claims the River Don has its source in them."[17] The other is in the caption to the map of ancient Hispania, which at six leaves is the longest in the book. If we expect this to be where Isidore finally steps into the limelight, we are in for a shock. Ortels quotes Pliny, Strabo, Solinus, Pomponius Mela, and over thirty other ancient authors, even scraping the barrel of such recondite local sources as Eulogius of Cordova and "Pseudoberosus" (Berosus of Babylon, one of Giovanni Nanni da Viterbo's forged pre-Roman sources on Spain invented in 1498 to flatter the Catholic Monarchs), the Bible, Augustine and Jerome, various MSS, inscriptions, coins, and modern scholars such as Henri Estienne, Casaubon, J.J. Scaliger, and also Ambrosio de Morales and Benito Arias Montano, who were prime figures in Felipe II's project for the Isidore edition mentioned above. Yet from Isidore he culls just a single word: "*Striges* is the name for a sort of Hispanic garment in *Etym.* 19.23." That is to say, in the entire work Isidore is adduced only

---

Principique a studiis, archidiacono *Caracensi* ['of Guadalajara'], *canonico* Toletano"); Qq1^{r}-Rr2^{v} "Index rerum et nominum" (2nd ed., *2^{r}-**4^{v}), at Qq3^{v}/**1^{r} "Isidorus corrigitur," "Iornandes auctor valde depravatus [...] Hallucinatur [...] Emaculatur"; Qq5^{r}/**2^{v}-3^{r} "Plinii locus adnotatur [...] Emendatur [...] [Defenditur *add. 2a ed.*] [...] Excusatur," "Pomponius emendatur," and "Ptolemæus emendatur [...] Arguitur [...] defenditur"; Qq1^{r}/*2^{r} "Amazonum domicilium ubi [...] [Cum quibus connubia *add. 2a ed.*] [...] Ubi à Theseo victæ."

[16] Ortelius 1624, fol. VIII "Aevi veteris typus geographicus [...] usque ad annum Salutis nonagesimum secundum supra milles. quadringent." and fold-out map; and ix "Orbis Romanus sive Romanum Imperium."

[17] Fol. x "Europa sive Celtica vetus," caption "incomperta & fabulosa [...] tota ferè credidit antiquitas, [...] omnes autem falsò [...], ubi nedum hi sed & nulli hodie visuntur. [...] Riphæas silvas hic habet Isidorus, & Tanaim inde effluere dicit."

for his amusing mislocation of the *montes Rhipaei* (Urals) and a vulgar Iberian word for underpants.[18]

Ortels's treatment suggests that the epistemological shift brought about by the voyages of discovery had relegated Isidore to the Gothic Age. To us it sounds a fair statement of fact, but in the Renaissance "gothic" was not a descriptive term but a damning value judgement; and this applied not just to cosmology. In the preface to lib. 2 of his *Elegantiae*, the "Magna Carta of humanism" (Dionisotti 1967, 152), Lorenzo Valla dubbed Isidore the "prime babbler and ignoramus of all time" about the Latin language.[19] The *Etymologiae* nevertheless made the transition from script to print (the Augsburg *editio princeps* of 1472 was one of the earliest incunables), and have of course comfortably outlived Valla's works. Yet the first scholarly edition, published under the title *Origines* by Flemish humanist Vulcanius (Bonaventura de Smet) alongside the 5th-century Carthaginian Vandal Martianus Capella's *De nuptiis Philologiae et Mercurii*, despite a preface praising the two works because "they embrace not just any one art but the whole circle of sciences which the Greeks call *enkyklopaideía*," really envisaged them not as encyclopedias but as sources of curious antiquarian linguistic lore, as the addition of texts “on the primitive language [*de prisco sermone*]” from *veteres grammatici* Fulgentius, Nonius Marcellus, Donatus, Festus, et al. showed.[20]

---

[18] Fols xiii–xiv "Hispaniae veteris descriptio" "*Striges* nominat Hispanorum vestium genus Isidorus Originum 19, cap. 23." To be fair, this was more interest than anyone else showed; there is no note on *stri*[*n*]*ges* in any 16th- or 17th-century edition of *Etym.* 19.23.1, even Juan de Grial's, though other terms in the same sentence attracted his attention (Grial-Loaisa, vol. 1/1, 382b-383a comments on Pers. *sarabara*, Gaul. *linnae*, Ger. *rhenones*, Sard. *mastruca*). The word is not listed in humanist dictionaries like Robert Estienne's *Thesaurus linguae Latinae* (Isidore conspicuously absent from his sources, Stephanus 1531, vol. 1, fol. *4^{v}), nor yet by Du Cange; only, with no mention of Isidore, in Calepinus 1509, sign. T8^{r} "*Strigium* vestis hispanica. Plau. Nudus est, iurat se tribulo strigium oppignerasse," and thence Ravisius Textor 1520, "Vestimentorum genera" §99 (fol. 228^{v})—garbled from some old glossary, this made its way into expanded later editions of Estienne, but still no mention of Isidore (Stephanus 1573, vol. 4, 157a; cf. Gesnerus 1749, vol. 4, 573–74 "Haec nescio unde venerint, et longum modo est quaerere"). Ortels was the only author to locate the word in Isidore before the Benedictine revision of Du Cange (1733–36, vol. 6, col. 773 s.v. Striga^{4}, conjecturing *strix* < *striga*, via *stica* "tunic" in medieval *Glossae Isidorianae*; cf. Vulcanius 1600a-b, repr. in Isidorus 1601, 959–75; Arévalo, vol. 7, App. 24, 443–93, at 488). It was left to Carpentier (1766, vol. 3, col. 884 *s.v.* striga^{4}) to uncover the word's actual meaning "breech-cloth" from medieval charters ("Chartoph. reg. [1394] Ch. 394 *unes estraintes à homme*. f. Interius subligaculum, vulgo *Caleçon*"; "strula, *veste de cul*"; repr. in Du Cange 1840–50, vol. 6, 390c, 393).

[19] Valla 1540, 41–42 "quicunque aliquid de Latinitate scripserunt balbutire vid[e]ntur, quorum primus est Isidorus, indoctorum arrogantissimus, qui quum nihil sciat, omnia præcipit." Completed in 1449, the *Elegantiae* were printed in 1471 and republished over 150 times in the succeeding century. After Valla's and Poggio's onslaughts (Stevens 1975), humanist mockery of the *lucus a non lucendo* style of etymologizing became a topos (Codoñer 2003).

In Spain, however, for chauvinist and imperialistic reasons pains were taken to rebut Valla. As Amy Fuller shows in this volume, certain of the more regressive features of Isidore’s mentality—his apocalyptic anti-Semitism, for example, or his wildly ignorant and tendentious misrepresentations of ancient paganism and mythology—could conveniently be adduced to formulate and justify, or on occasion criticize, the Crown’s immense project of eradicating Native American systems of “idolatrous” culture and belief in the New World. But even on the strictly scholarly side there were attempts at rehabilitation. Juan de Grial’s preface to his edition of the *Etymologiae* points out, for example, that Isidore’s concern was not with what Varro called *etymology*, “the thing *from* which a word comes,” a puerile task for *grammatici*, but *semantics*, “the thing *to* which it is applied,” the high calling of philosophers who “take the sounds only as a starting-point, and seek to throw light not so much on *words* as on *things*.”[21] Nonetheless, though the *Eytmologiae* continued to be cited by many Renaissance writers, it is clear that even inside Spain what scholars had really come to prize was their quaintness: weird derivations, strange vulgar words, definitions of bygone *realia*. In the dedication to Felipe III of his *Tesoro de la lengua castellana*, the best known Spanish lexicographer of the age lauded Felipe II's enterprise of publishing Isidore as the direct inspiration for his own work ("he took great pains to have the works of the glorious St Isidore, Doctor of the Spains, corrected and emended from various original sources and newly printed with scholarly care […], particularly his *Latin Etymologies*"); yet he added, with a hint of acid, "others had treated the same topic before the holy Doctor, and many moderns have done so after him." The upshot is that he mentions Isidore only 91 times in a text of 1.14 million words.[22]

---

[20] Isidorus 1577, fol. 2^r “non unam aliquam artem sed totum orbem scientiarum, quem ἐγκυκλοπαιδείαν Græci vocant, complectuntur.” Buridant (1998, 16–17) points out that the principle behind medieval etymology—*nomen est omen*, i.e. not historical linguistics but allegory (Del Bello 2007, 49–60)—was, on its own terms, scientific: the “scientia cognoscendi diccionum singularium significaciones.” His ensuing claim that this valuable insight “brise de façon décisive la dichotomie positiviste entre période préscientifique et scientifique” doubtless overstates the matter; to ignore the distinct kinds of truth-claim made by science and allegory risks making Isidore and medieval grammarians look naive, which they were not. When a 15th-century lexicographer said “est ethymologia unius vocabuli per aliud vocabulum magis notum […] expositio, ut dicendo *DEUS* quasi *D*ans *E*ternam *V*itam *S*uis” (ibid. 13, 18), he was under no delusion of contributing to linguistic science; he meant ἔτυμον in its (etymological) sense “true meaning” (“Etymologia est *veriloquium*”) and intended the conceit of the acronym to be understood as a divine hieroglyph enucleating a theological proposition about God—a rational idea, given the postulates upon which it was based (that God exists, speaks in Latin, etc.), but one that we need have little compunction in calling “prescientific.” More to the point, perhaps, is Bloch’s siting of medieval grammar within a broad cultural model characterized by “la fixité et l’inhérence des valeurs sémantiques et sociales;” in this sense “le principe de l’étymologie […] articulé sur la généalogie” may be seen as akin to their concern with lineage, etc. (1989, 127). See further Curtius 1948; Guenée 1980; Charlet 2003; Del Bello 2007.

[21] Grial-Loaisa, vol. 1, fols ¶¶2^r-¶¶3^v “ἐτυμολογική, *a* qua re vocabulum sit impositum […] περὶ σημαινομένων, *in* qua re […] occasionem tantum in vocibus captant, neque tam *verbis* quam *rebus* lucem inferre student” (cf. Varro, *De lingua Latina* 5.1); or as Zumthor (1975, 157) puts it, “la recherche du vrai *dans* ou *par* les mots.” Grial’s view of Isidore’s epistemology was in fact historically rather accurate (see n. 20, above). In a similar vein Antonius

Was it some kind of irony, then, that the chief Renaissance authority on the topography of the ancient world, in a succession of atlases addressed to kings of Spain who at the time were engaged in the greatest project of Isidorian scholarship of that or any succeeding age, saw fit to quote *Etymologiae* only in connexion with remote Russian forests and an obscure Hispanic *hapax* for an

---

(1696, 250–52 §91 and §94–98) replied to nitpicking (*vellicatum*) about "some less felicitous derivations in his vast work on etymologies [aliquas minùs feliciter deductas origines in vasto *Etymologiarum* opere]": Isidore was pursuing the higher of the two kinds of etymology, not the "potential" derivative kind ("δυνάμει, hoc est *potentiâ*, à quibus potuerit nomen duci") but "actual" semiotics ("ἐνεργείᾳ sive *actu*, ad quę vocabulorum auctores verosimiliter respexerunt"). In the Enlightenment Arévalo still felt moved to defend Isidore (Arévalo, vol. 1 *Isidoriana*, cs 34 "Recentiorum quorumdam de Isidori scriptis iudicia varia expenduntur," 49 "Doctorum hominum de Isidori Etymologiis iudicia," 254–57, 409–16), but by then arguments from cultural relativity were vain—"progress" had been invented—so he fell back on the saint's own excuse, *Etym.* 15.1.2 "we should not condemn those who allege various things inexpertly, for *antiquity itself* created the error [nec varia dicentes imperite condemnare debemus, quia antiquitas ipsa creavit errorem]" (254).

[22] Covarrubias 1611, fol. ¶8^{r} "hizo gran diligencia para que las obras del glorioso San Isidoro Doctor de las Españas se corrigiessen y emendassen por diversos originales y de nuevo se imprimiessen con mucha curiosidad […], y particularmente de sus *Etimologías Latinas*. […] Antes de el santo Doctor avían otros tratado el mesmo argumento, y después de él muchos modernos." Though a royal chaplain, Covarrubias never failed to emphasize that he was first and foremost a university man ("licenciado") and it is clear that, nationalism notwithstanding, mentally he subscribed to the humanist view of Isidore, an attitude even more patent in the discussion of etymology in the preceding "Carta al autor" of *licenciado* Baltasar Sebastián Navarro de Arroita (fols ¶4^{r}-¶5^{v}). Arroita remarks that though Varro's fanciful patriotic Latin derivations for Greek loanwords could not fool any knowledgeable person, they succeeded in deceiving "the blessed St Isidore, who […] gave the not-so-pious occasion to mock him, thereby weakening his great authority among the rigorous critics of our times [dio ocasión a la irrisión de los no tan píos, y a que su grande autoridad se enflaqueciesse por esse camino acerca de los Críticos rigurosos de nuestros tiempos]," naming among the latter Perotti and the Scaligers, and having sarcastic fun himself with a few "ridículas Etymologías."

article of underwear? Not at all; it was normal. What it really reflected was not that Isidore held an alien concept of etymology—Renaissance and Baroque ideas about the origin of language were at least as fantastical—but that he definitively marked that rupture with the Hellenic component of ancient science which we call the Dark Ages. Ptolemy was not rendered obsolete by the voyages of discovery in the same way as Isidore; his scientific method remained compatible with the new episteme despite his ignorance of America (Portuondo 2009, 20–58). Equally telling is the contrast with Pliny, who remained an inspiration for enquiry; whereas he was the object of copious commentary and translation—including two 16th-century Spanish versions, the second commissioned by the Crown—, nothing comparable happened to Isidore.[23] Passages from *Etymologiae* 5–6 were, it is true, included as an appendix to a work on chronology by Mercator and Beroaldus (1577), but such signs of him being used in a scientific context are exceedingly rare. There were no freestanding commentaries, no translations; for though the *Etymologiae* had been partly turned into Castilian in the 13th century and a MS was acquired from Cuenca Cathedral by Gaspar de Quiroga and sent to the Escorial in 1579 for Felipe II's *Opera* project, it was never printed.[24]

One may object—it is a pertinent point—that Isidore wrote many other works besides the *Etymologiae*. His *Sententiae* were no less popular in the Middle Ages, and served as a pattern for the scholastic method embodied in Peter Lombard's work of the same name; but though they were translated into Spanish in the 15th century (*Del soberano bien*, BNM Mss/405, 6970, 9504; García Rives 1950) and the text was reprinted a few times in the Renaissance, the important edition being that by García de Loaisa (Isidorus 1593, repr. in Grial-Loaisa, vol. 2, 1–111), Isidore seems by then to have been little more regarded as a theologian than as a scientist; he was valued for his methodical approach to compilation and the antiquity of his sources, but he was not influential as an authority.[25] His chronicles were objects of deeper enquiry, but though the first edition of the *Historia Gothorum* was by the French scholar Pierre Pithou (Isidorus 1579), scholarly interest was chiefly confined to countries where the Gothic legacy was important for dynastic reasons: Spain and Scandinavia.[26] The only work of Isidore's that remained in living circulation, in the sense that it was read for other than antiquarian motives, was *Synonyma*, his devotional dialogue between Sinner and Reason. Despite its peculiar style—an extended *jeux d'esprit* of synonymic wordplay—it is the only work of his that was popularized in translations (German, French, Italian, 1560s), and it remained in print up to the Counter-Reformation (1470 to 1566, at least 21 editions, mostly printed in Protestant Germany). Elfassi (2008) talks of an "immense succès," but qualifies this by noting that it was "indirect, au deuxième voire au troisième degré," through centos or second-hand quotations often attributed to Augustine or Ambrose. Though these false attributions showed the work's standing, they also signalled the "chant du cygne" of Isidore's influence on real life. After 1570 the *Synonyma* was not translated or reprinted again, except in the national editions of his *Opera* of which I am about to speak (Grial-Loaisa, vol. 2, 367–91; Arévalo, vol. 6, 472–523), until the 20th century.

---

[23] See Beagon 2016. Greenblatt (1991, 82–83) argues that Isidore's Eurocentric world view played an influential role in promoting the ideology of conquest and colonization, and (22) that his fantastical account of monstrous races (*Etym.* 11, 14) gave Renaissance writers their model for categorizing the radical otherness of the New World as savagery; but Twomey (2003, 76–77, 80) points out that there is little evidence that Isidore was the direct source. The citation adduced by Greenblatt, Jean de Léry's *Voyage faict en la terre du Brésil*, in fact names Pliny (Lery 1578, "Preface," fol. [ī]5^{r} "je me suis retracté de l'opinion que j'ay autresfois euë de Pline & de quelques autres, descrivans les pays estranges, parce que j'ay veu des choses aussi bigerres & prodigieuses qu'aucunes qu'on à ten[u]es incroyables dont ils font mention").

[24] Isidorus 1983, 15–16, 24–25, citing records of the request by Quiroga (who figures again below) and surrender of the MS to the king by Bishop Rodrigo de Castro y Osorio, a noted antiquarian, in Cuenca, Archivo Capitular, Actas capitulares 1579, fol. 3^{v}; 1580, fol. 4^{r}; and Esc. Ms. b.I.13, s. XIV, flyleaf *ex-libris*.

3 Canonization, Sanctity, and Nationalism

This brings us to the other aspect of Isidore's fortune in the Renaissance, the question of his sanctity, and why Spain remained the exception to the perceptible decline in Isidore's standing elsewhere in Europe. The growth of national feeling is one of the best-known features of Renaissance culture, but one should distinguish between modern ethnic nationalism, a poisonous form of political mobilization promoted by nation-states and their opponents, and earlier kinds of patriotism, which sprang from more localized senses of identity rooted in the customs of a particular place. The difference manifests itself in various ways. As Antonio Mestre (1995) points out, in the course of the 16th century the figure of the humanist grammarian gave way to the *erudito*, the antiquarian scholar who was still not yet what we call a critic. A characteristic task of these antiquaries was to search for facts within the nation's past that would justify its present political constitution. I have mentioned the imperative to establish Spain as the true successor of the Roman empire; this involved not only elaborating a new but appropriately "antique"-looking ideology of imperial absolutism, but also discovering, or affecting to discover, condign evidence, epigraphical, numismatic, archaeological, and literary, of the Spanish contribution to Roman civilization—for example, by investigating ancient authors from Hispania. Equally valid in Spain's case was to praise the Gothic history of the Iberian kingdoms, or trace the pre-classical ethnography and toponyms of the Peninsula; or to engage in projects of a more dubiously scientific nature, such as the confection by Giovanni Nanni of a chronicle by Berosus of Babylon purporting to prove that the Catholic Monarchs of Spain descended from Noah, and the Spaniards from Tubal's tribe of Tobelos mentioned by Josephus (*Antiq.* 1.6.1). More notorious frauds were Jerónimo Román de la Higuera's fabrication of chronicles by Julian of Toledo and Flavius Marcus Dexter of Barcelona, and his manipulation of the genuine chronicle of Liutprand of Cremona to yield one written by a Spanish-domiciled "Eutrand."[27]

---

[25] For a while in Germany during the Lutheran reform Isidore's exegetical works attracted notice: Isidorus 1529 "ex codicibus antiquissimis," 1530. Antiquity held out the promise of biblical *fontes* uncorrupted by the sophistries of popish scholastic sources; the titles call him not Doctor (nor even saint; the first, more Lutheran one says *beatus*) but *theologus vetustissimus*, *pervetustus*. On Hagenau printer Johann Setzer's Lutheran sympathies see Flood and Shaw 1997, 55 n. 27; on Erasmian Johann Heil of Cologne, Lülfing 1972.

[26] Grotius 1655, for example, was compiled in 1637 to serve the Swedish Crown, while Isaac Vossius, editor of the text of Isidore's *Historia Gothorum* included in this posthumous edition of Grotius, was Queen Christina's librarian (Eriksonas 2004, 190, nn. 53–54; Nellen 2014, 747–48, nn. 54–57; Mengelkoch 2012; and in general Birns 2013).

Naturally kings were keen to patronize such endeavours when the antiquaries' discoveries could be used to legitimize their power or favour their economic interests. In a classic study of English antiquaries H.B. Walters (1934) showed how Henry VIII employed John Leland to scour the national records for precedents for his exercise of the royal prerogative and rupture with Rome, so justifying his expropriation of Church property. Redefining the relation of Church and State, whether in this confessional sense or in terms of the kingdom's internal jurisdictions, was a standard motive for such antiquarian activities, and Felipe II employed his royal chronicler Ambrosio de Morales (1513–91) for parallel purposes.[28] Hence missions to ransack ecclesiastical libraries became a characteristic late Renaissance form of scholarly employment. The publication of Isidore's *Opera* resulted from just such a project.

---

[27] For the relevance of this last to the Renaissance fortune of Isidore see n. 13, above; on the *falsos cronicones*, the recent studies in Olds 2009, 2015; and Olds 2014 for a specific documentary insight into how Higuera's activities included defending Spain's saints against post-Tridentine sceptics like Cardinal Cesare Baronio (EC 1586; see n. 41, below). The broader context is set out by Kelley 1970, 1988, and the studies in n. 12, above; and for our subject, Taylor 2014.

[28] As a young Hieronymite novice Morales is said to have followed Origen's unfortunate lead in interpreting the call to disarm the Tempter literally, by castrating himself; but he afterwards went to Rome and obtained a dispensation to live as a secular cleric. *Memoria sanctorum*

To comprehend the regal motives behind the plan to induce the papacy to recognize Isidore as a Roman saint and Doctor of the Church, of which the Grial-Loaisa *Opera* formed a part, we may also recall the particular role of *historia sacra* in that period. As Simon Ditchfield notes (2012, 72–73), "research into the ecclesiastical past of institutions, cults, orders, dioceses, and peoples could serve a variety of purposes beyond simply challenging opposing faiths"; it played a vital role in "the formation of and reflection upon confessional identities"—and, we may add, national or supra-national identities, for in the huge multiethnic Spanish empire religious cult and practice was a most important agglutinating factor. But these more than merely dogmatic or apologetic uses of the Christian past created pressures towards kinds of historical manipulation—*pia fraus*, in Catholic terminology—similar to those at work in the field of secular history. The fact is very evident in the 16th- and 17th-century Spanish hagiographies of Isidore. The long and learned account of his *Vita* in *Acta Sanctorum* is concerned with little else than sorting out the reliable from the false in the by then abundant Iberian literature on the subject, of which the epitome is the monumental *Martyrologium Hispanum* of Tamayo Salazar (1652), described by Enlightenment luminary Mayans as one of the most

---

qui orti sunt in Hispania (1541–, unpubl.; Morales 1765, x §18) led to a post in Alcalá's Colegio de San Felipe y Santiago, founded by Felipe II in 1551; his first royal commission dated from 1559, and nomination as *cronista real* followed in 1563. His 1572 trip "por orden del Rey" to search for relics and materials, the basis of the great collection of Isidorian MSS assembled in the Escorial library used for the Grial-Loaisa edition (Antolín 1923), is reported in BNM Mss/2063 (Morales 1765). By then he had been appointed the king's *procurador* in the cause to canonize Diego de Alcalá (1567–88), and overseen the translation from Aragon to Castile of the "relics" of the 4th-century child martyrs Justus and Pastor lauded by Prudentius (Morales 1568). While pursuing the Isidore project, besides publishing three volumes of his chronicle and path-finding studies on the archaeology of Spain based on the novel procedure of sending out a questionnaire to elicit topographical *relaciones* from other *eruditos*, Morales edited Eulogius of Cordova for Bishop Ponce de León, who provided him with a Visigothic MS from Oviedo (Morales 1574); wrote a *Discurso* to show Felipe II's blood relationship to St Dominic (Morales 1586); and compiled *informaciones* upholding the historicity of St James and privileges of the see of Santiago, or those of the see of Toledo, where he was rewarded with a benefice by Cardinal-Archbishop Quiroga. A worthy scholar; but to talk of "strict scientific rigour" or a "modern approach," as some do, is to skate over a vital aspect: all these works—most devoted to defending the indefensible—were expressly confected to serve his powerful patrons' vested interests. On this instrumental side of antiquarianism, besides Édouard 2003; Van Liere 2006, 2012; Collins 2014, see in general Gimeno Pascual 1998, Mora 1998.

superstitious men in Spain's history.[29] To achieve the needful purge the Bollandists resorted to the standard procedure of requesting Spanish scholars to search for MSS and other evidence in archives; by these means and the application of critical method they not only pruned out many accretions of credulous legend but also established a convincing canon of Isidore's authentic works.[30] Nevertheless, sifting still remained on the agenda for scholars in the Age of Reason, when the same process was undertaken once again. Its results were related by Rodríguez de Castro (1786) and brought to a peak in the still useful two-volume introduction to Arévalo's edition of 1797–1803, *Isidoriana*, which together with his critical text and apparatus represented the fruits of over two centuries of such research, undertaken in his case—as in the first endeavour of Spanish humanist scholarship to do with Isidore in 1499, of which more in a moment—for the cardinal-archbishop of Toledo and primate of the Spanish Church, himself a distinguished antiquarian (see Lorenzana 1782–93; Esteve Barba 1942; Sierra Nava 1975).

On the aspects which he addressed Arévalo achieved as much as any subsequent scholar; but he makes clear his debt to the Grial-Loaisa edition. Even the latter was not the first such project. As early as 1499 the Archbishop of Toledo Francisco Jiménez de Cisneros, sponsor of another great project of humanist textual criticism, the Complutensian Polyglot Bible, commissioned for patriotic reasons an edition from old MSS of the Mozarabic liturgy attributed to Isidore, a project carried out by the humanist Alfonso Ortiz and a team of Toledan clerics.[31] The idea of an edition of *Opera omnia* based upon the same idea of a team of scholars collecting and collating Visigothic originals was urged upon Felipe II in 1571 by another future archbishop of Toledo, the aforementioned Gaspar de Quiroga (1512–95), at the suggestion of a university humanist of that city, Alvar Gómez de Castro (1515–80). The latter drafted a proposal to the king's secretary Antonio Gracián. After lamenting the dearth of editions of Isidore's works due to "the loss of many in the wars and troubles in Spain after his death, and others lying unrecognized in certain of this kingdom's ancient libraries," Castro plays subtly on the project's patriotic dimension:

---

[29] On Tamayo's methods see Henriet 2002, who does not shy away from the term "forgeries" or calling his erudition "fausse." As Olds 2015 reveals, such terminology may be too simple; the technique was normally to use genuine old documents, but—doubtless with sincere intent—to correct their regrettable deficiencies; hence Higuera's fabrications took nearly two centuries to unravel and discredit. We should also recall that the rationalism of the 17th-18th centuries was not universally accepted; you can lead a horse to water but you cannot make it drink, so churchmen even in the 20th century persisted for pastoral reasons in resurrecting the legends. Few texts are as instructive in this regard as the tragicomic preface to Lucas de Tuy 1947—the date, in the wake of Franco's "nationalist" coup, speaks volumes—by the abbot of San Isidoro de León, which now strikes us as a good deal more superstitious than any 14th- to 16th-century hagiography.

[30] The role of Iberian scholarship is fully acknowledged in Henschen 1675, and also alluded to in Spanish sources such as Antonius 1696. On the general context see Boesch Gajano 1985.

[31] Isidorus 1500, 1502; see Martín Patino 1963; García Oro 1992; Gonzálvez Ruiz 2004. Ortiz's edition was reedited by Lorenzana (Isidorus 1775), equally patriotically; but it is notable that Isidore's claim to authorship was not thought substantial enough to include the Mozarabic liturgy in Isidorus 1580, Grial-Loaisa, or Arévalo.

> Your Majesty would do a deed most acceptable to God and greatly redounding to the profit of his holy Church by ordering a search for all the works of this saint that could be found in the places I have mentioned, and then, after collecting them all, having them very correctly printed, just as His Holiness has recently ordered the printing of the works of St Thomas, and as Your Majesty's father the Emperor Don Charles did with the works of El Tostado, the bishop of Ávila, *to the illustrious credit of our nation* [...]. I have said all this so that Your Majesty may see the resaon for honouring this great saint, *whose devotion along with other things has suffered a cooling-off*; and [...] for bringing to light his works and publishing them throughout the world, so that alongside the Royal Bible which is about to appear there may also appear such a great interpreter of it [...] under Your Majesty's auspices.[32]

A battery of royal letters ensued, urging Castro and his team to use every means to gather and collate Isidorian MSS, including ordering institutions to "donate" them.[33] Castro was to spend the rest of his life on the task, gathering MSS and preparing a text of *Etymologiae*; on his deathbed he wrote that he had tracked down 16 codices and nearly finished collating them.[34]

---

[32] Madrid, Instituto Valencia de Don Juan, Envío 78^{196}, in Antolín 1923, 69–71 "Haría Vuestra [Majestad] una obra muy accepta a Dios, y que redundaría en el provecho de su sancta Iglesia, mandar que se buscassen todas las obras deste santo que en los lugares que tengo dicho se pudiessen hallar y, después de juntarlos todos, hazer que se imprimiessen muy correctos, como ahora su Santidad ha mandado imprimir las obras de sancto Thomás, y el emperador don Carlos padre de Vuestra Majestad las obras del Tostado, obispo de Ávila, con las quales *se ha illustrado nuestra nación* [...]. He dicho todo esto para que vea Vuestra Majestad la razón que ay de honrar este gran sancto, *cuya devoción con otras cosas está resfriada*; y [...] sacar a luz sus obras y publicarlas por el mundo, para que juntamente con la Biblia Regia, que saldrá agora, salga también un tan gran intérprete della [...] con los auspicios de Vuestra Majestad" (my emphases). "Biblia Regia" referred to another project of Felipe II then at press, the Antwerp Polyglot (Arias Montanus 1569–73); "devoción [...] *resfriada*," an icy allusion to Trent's messing with Spain's saints. There follows mention of MSS found by the tireless Pedro Ponce de León, bishop of Plasencia (Andrés 1967). The king's reply six months later (18 March 1572) ordered Gracián to arrange "la Impressión delas obras de S. Isidro" and asked for Castro's "relación que por su carta offresce delos libros antiguos deste S°. y delos lugares donde se hallarán, y todo lo demás que V.m. entendiere se puede hazer çerca desto" (BL Egerton MS 2047, fol. 275^{v}).

In that same year, however, there appeared a rival edition, published by the French Benedictine Marguerin de La Bigne in Paris (Isidorus 1580) and incorporating Vulcanius's *Etymologiae* (Isidorus 1577). Vulcanius was a Spanish subject and had spent the years 1559–70 as librarian to Bishop Francisco de Mendoza y Bobadilla in Burgos, then to his brother Archdeacon Fernando de Mendoza in Toledo; he must have learned of Felipe II's project, and was perhaps irritated not to be asked to take part (note, for example, the date of Vulcanius 1597—stealing a march again?). As for La Bigne, his edition was part of an enterprise to publish a complete *Patrologia* expressly designed as an orthodox Catholic riposte to the many Patristic editions appearing from Protestant presses, notably in Basel—the very place where Felipe II seems originally to have planned to print his Isidore.[35] Doubtless the stormy reception of the

---

[33] The story is unravelled in Antolín 1923; Andrés 1975; González Cuenca, in Isidorus 1983, 25, 56 & nn. 21, 44; Nascimento 1984, 2008; Díaz y Díaz 1993, 227–28; Dávila Pérez and Lazure 2000–02; Taylor 2006; Codoñer 2009.

[34] In his will of 12 September 1580, four days before his death: "De las *Etimologías* de san Isidoro tengo diez y seis volúmines de mano, y algunos de letra Góthica, y uno ympreso […] El libro mío de las *Etimologías* que está todo glosado y escontrado con estos originales, […] con todos los demás papeles y anotaciones que a propósito desto tengo, darse-án a quien su Mag. mandare" (San Román 1928, 560–62). Castro goes on to say he had finished emending all but lib. 19, which was to be passed to Mariana, while "los libros que faltan de sacar en limpio" were to be given to "Pantino flamenco, criado del Sr. García de Loaisa […], el qual lo revea y añada el griego conforme a como está en el original y como lo an hecho él y Escoto [Schott] todo este estío en mi compañía," with a later instruction that Agustín's notes be inserted (565); see also Alvar Ezquerra 1980, vol. 1, 206–11. Castro's papers on Isidore duly passed to Loaisa, and were thought lost in the Lisbon earthquake of 1755; but see Nascimento 2008.

[35] The post-Tridentine motives behind La Bigne's *Bibliotheca* are explored by Petitmengin 1975, its relation to the printing of Spanish Fathers—Isidore among them, but by no means him alone—analysed in Taylor 2014. The idea of publishing the Philippine Isidore in Basel is alluded to in a letter of 15 April 1572 from Gracián to Arias Montano (who was in Antwerp overseeing the printing of the *Biblia Regia*, n. 32 above): "Aunque el hazerse la Impression [of Isidore] *fuera destos Reynos* paresçe trae Inconviniente por algunas razones que se han considerado, todavía ha paresçido que, mientras en España se descubren todos los más originales que se pudieren hallar, […] sería bien que *esse Impressor de Basilea* embiasse | aquí lo que tiene hasta agora estampado delas obras deste sancto, *para que se viesse su diligençia y cuydado*, y avisasse delos originales antiguos que tiene y del número delas obras que hasta agora ha descubierto y piensa impremir, para que visto y cotejado con lo que acá se hallare se pueda asu tiempo, pues el negoçio no tiene prissa, *tomar enella resoluçion que paresçiere mejor*" (BL Egerton MS 2047, fol. 286^{r-v}, my emphases). I do not know who "that Basel printer" of Isidore in the 1570s was, but Felipe's

Antwerp Biblia Regia (and Arias Montano's fall from grace in 1579: Lazure 2011) helped change the king's mind on that count, but we lack evidence as to exactly when he did so; as the most indecisive ruler in Spain's history, it would be no surprise if it took some time. All these facts and dates must interconnect, though we cannot be quite sure how. Interestingly, for example, Isidore was not at first included in La Bigne's patrology; so, did Vulcanius approach La Bigne, rather than the other way round? Yet one thing remains clear: the appearance of the rival edition had no dampening effect on the openly nationalist Philippine project. Undeterred by Gallic shots across the bows, Felipe's antiquaries were to slog on for two decades more.[36] La Bigne's was no contemptible effort; it included works printed for the first time, readings from four old French MSS, and extensive indices. The Spanish team consulted it, but Grial-Loaisa was well under way and proceeded independently. Castro's draft text of *Etymologiae* with Agustín's and Chacón's notes, for example, was already far advanced by 1580 (n. 34, above); but by the time it was printed Grial had doubled the number of MSS collated to over 30, and added further annotations by himself and Antonio de Covarrubias.[37]

---

intention to publish there is clear. Even so, Gracián ends: "He tenido todo el contentamiento possible de que su Mag^{d}. aya tomado de veras este negocio, assí *por lo que toca ala honrra de nuestra nação* como porque se comiençen a favoresçer y estimar negocios de letras."

[36] Archival records concerning the project in the 1580s are less explored in the scholarly literature (n. 33, above) than those of the preceding decade. This might tempt us to conclude that La Bigne's untimely emission stalled work for 13 years; the illusion is dispelled by Schott's letter to Quiroga still talking of it in the present tense on a.d. IV Idus Aprilis (10 April O.S./20 April N.S.) 1581, despite Castro's death on 16 September 1580 ("Divi Isidori […] libris qui Regis sumtu tuoque auspicio *adornantur*," Schottus 1582, 3–4), and by Portuondo's discovery (2009, 157–58 & nn. 58–63) of fresh documents on the role of Gracián's successor Juan López de Velasco, whose letters of 1584–87 show him still busily fussing over incoming Isidore materials, and being paid to curate and edit them. And there are more sources yet to be explored, e.g. 15 letters in BL Egerton MS 2047, fols 285^{v}-305^{v} *Cartas escriptas por mandado de Su Mag^{d}. por el secretario Antonio Gracián* (April 1571–March 1576), to Castro (n. 32, above), Morales, Arias Montano (n. 35, above), D. de Covarrubias, Ponce de León, the dean of Toledo Diego de Castilla, etc.; and a *Memoria de los libros de Sant Isidro que yo el licenciado Ponçe he buscado en todas las librerías desta ciudad de Sevilla por mandado del Arçobispo* [Rodrigo de Castro] of 1582 in New York, Hispanic Society of America HC385/280 (plus his transcript of a MS of Isidore's *Chronicon*; Faulhaber 1983, 1, 459–61, §467). Much also remains to be done on the text's printing; but the chief outstanding desideratum is a textual study of the team's critical method, to build on Asensio 1981; Andrés Sanz 2002; Codoñer 2009.

[37] Grial mentions using "triginta aut eo pluribus manuscriptis libris in hoc opere [*Etym.*] emendando," and variants from La Bigne's "Parisiensis editio" of *Sententiae* (Grial-Loaisa, vol. 1, fols ¶2bis^{v}, 3^{r} "Ad lectorem").

For reasons like these the edition took over quarter of a century; but more impressive than the lapse of years was the roster of names enrolled in the project by Gaspar de Quiroga and Alvar Gómez de Castro. Many of the country's leading *eruditos* were co-opted: besides Ambrosio de Morales and the biblical scholar Arias Montano (1527–98), they included Antonio Agustín (1517–86, antiquarian and jurist, pupil of Andrea Alciato at Bologna, bishop of Tarragona); the Jesuit historian Juan de Mariana (1536–1624); the canons of Toledo and patrons of El Greco Diego de Covarrubias (1512–77, canonist) and his brother Antonio (1514/24–1602, Hellenist); university professors Pedro de Fuentidueña (1513–79, theologian) and Cipriano Suárez S.J. (1524–93, rhetorician and biblical exegete); humanists Juan Bautista Pérez Rubert (1534–97, another protégé of Quiroga, canon librarian of Toledo, Hebraist and ecclesiastical historian, bishop of Segorbe 1591), and in Rome Pedro Chacón (1520–81, classicist); and learned foreigners, such as Andreas Schott S.J. (1552–1629, antiquarian and Hellenist, protégé of Quiroga, correspondent of Casaubon and Grotius), and Pieter Pantin (1555–1611, Loaisa's librarian 1579–95, Schott's fellow student at Louvain and successor as professor of Greek in Toledo, 1583). That all were faithful subjects and servants of the Spanish Empire goes without saying, but there was nothing narrowly Peninsular about their learning; their international contacts and outlook were broad. A number had been delegates at Trent (Arias Montano, Agustín, both Covarrubias, Fuentidueña) or held posts in the Curia at Rome (Quiroga, Agustín, Mariana, Schott, Chacón). Before the project was finished many of the original team had died (Quiroga, Castro, Agustín, Morales, Chacón, Fuentidueña). At court, after Antonio Gracián's death in 1576, the role of coordinating the project was taken over by the king's *cosmógrafo*, Juan López de Velasco, who issued further royal orders to ecclesiastical libraries to "surrender" their Isidorian MSS to the Escorial; he himself was paid to correct the edition of *De ecclesiasticis officiis*, and it was he who suggested the Salamanca theologian and poet Luis de León be asked to "correct" other texts, though León declined (Portuondo 2009, 158). Leadership of the editorial task passed to the two men whose names were eventually to figure on the preliminary pages of the final product: Castro's place as general editor was taken by Juan de Grial, professor of Latin at Salamanca, while Quiroga's role devolved upon the royal chaplain and canon of Toledo García de Loaisa y Girón (later Quiroga's successor as archbishop, 1598), an ecclesiastical historian and editor of *Collectio Conciliorum Hispaniae* (Loaisa 1593). It was the latter who finally set the ball of publication rolling with preliminary editions of Isidore's *Chronicon mundi* and *Sententiae*, printed with dedications to Felipe II at Turin (Isidorus 1593a-b).

It was, then, in every sense a collaborative effort; different scholars were responsible for the various texts, and annotations were contributed by several hands over the course of years.[38] In search of early witnesses, "códices góticos," "en letra mozárabe," or "en caracteres lombardos," they travelled all over the Peninsula. Morales unearthed MSS in monasteries and churches in Galicia, Castro not only ransacked Toledo's cathedral library but also journeyed as far afield as Portugal (1575). We know of these missions not just from the editors' correspondence and autograph notebooks, or royal *cédulas*, such as the *privilegio* printed at the start of the edition, but from mentions in paratexts to other works, such as Schott's dedication to Quiroga of his edition of another "scriptor Hispanus antiquissimus [...] Hispanorum doctissimus," Pomponius Mela (Schottus 1582, 4; see n. 36, above).[39]

Given the size of the task and the primitive means at their disposal, the fifteen men's twenty-five-year labour was in fact quite speedy. Not so the printing of the resulting edition, which took four years, finally bearing fruit only after Isidore's canonization in 1598. It was published by another of Felipe II's grand cultural enterprises, the Typographia Regia, set up in its own premises in Madrid in 1592 under the direction of Salamanca-based Florentine printers Giulio and Tommaso Giunti (Junta)—the latter being granted the perpetual title *Impresor del Rey* on 24 August 1594—with the task of producing high-quality illustrated editions of religious and official texts to compete with foreign presses and so ensure that the king's subjects were provided with books in tune with imperial and Counter-Reformation ideology.[40] *Divi Isidori Hispal. episcopi Opera*'s emblematic engraved frontispiece aptly conforms to this template; the classical portico with its allegorical figures of Ecclesia and Religio flanking the royal arms makes clear the link between Crown, Church, and nation, showing that the king's intent fell firmly within the ambit of propagandistic display, Catholic *historia sacra*, and Isidore's role as iconic Spanish saint.[41] The same link is made in Felipe's *privilegio* of 28 November 1595 on the following leaf; Isidore is presented as a Doctor of the Church, a Spaniard, and a saint, not as a classical author or encyclopaedist. The king also professes his personal devotion to the saint, his own ancestor at 38 removes according to a polite fiction much played upon in the edition's preliminaries.[42]

---

[38] Grial in his preface (Grial-Loaisa, "Ad lectorem," vol. 1, fols ¶2bis^r-[A5]^r) gives a summary, text by text, of the contributions of each collaborator. The bibliography on them is large but uneven (the bulk of it on the first six, e.g Alvar Ezquerra 1982; Crawford 1993; next to nothing on Grial). On general aspects of their scholarship, Gil Fernández 1981.

[39] In this sense it was typical of Renaissance styles of scholarly networking (Bustamante García 2002; Van Liere 2007), but the extent and longevity of the enterprise and its high profile made it extraordinary.

[40] On the Imprenta Real (not to be confused with the later Imprenta del Reino) see Pérez Pastor 1914–26, vol. 4, 409–43; Morales Borrero 1976. Giunti's post (held by his heirs until 1658) paralleled that of *prototypographus* granted in 1570 to Christoffel Plantijn in Antwerp for printing Ortelius's atlases and the *Biblia Regia Polyglotta* mentioned above (see pp. 612–13 and n. 32).

[41] Online at, e.g.: <http://www.bibliotecavirtualdeandalucia.es/catalogo/consulta/registro.cmd?id=7221>. Checa Cremades (1987, 40) shows the image was plagiarized, with what looks like deliberate irony, from a frontispiece designed by Rubens and engraved by Mi-

In the event the king who had spent so much promoting the project did not live to see the book, dying on 13 September 1598. Grial's dedication is addressed to his heir, Felipe III, but it hammers home the same points, laying stress on the saint's antiquity and "weighty authority in matters ecclesiastical or civil" and making a striking attack on the "danger" of "the back-to-front 'elegance' of certain persons" (a patent swipe at Valla) who as dwarfish epigones of the revival of letters ("in this age of ours when *light* seemed to dawn on things once more") insisted on disdaining Isidore's works, leaving them "cast down from their estate, scarce anywhere to be found, at any rate in no great repute" or even, to their "effeminate [*delicati*]" palates, "liable to recriminations and exposed on every side to calumnies." The express aim of the edition, Grial proclaims, was to encourage "other leading men of erudition, *not just among us but abroad*," to vie in studying his team's "most laborious harvest of the Spanish

chelangelo Grandi for Baronio's revision of the *Martyrologium Romanum* (EC 1586)—the papalist cardinal, detested in Spain for his destruction of the legend of St James, would have been upset at the replacement of his religious motto and image of the world on its knees before Christ by the royal arms and centrepiece inscription of Felipe II's royal title—but unlike St Mary in Baronio's plate, Isidore is not haloed, despite the fact that by the time the book came out his canonization had been ratified by Rome (the plate is signed at the foot of the right column by the Italian engraver Cristoforo Cartari and dated "1587," an error for 1597, the year given in vol. 1's colophon, p. 168bis; the imprint CIↃ. IↃ. XCIX (1599) must therefore have been added later). The saint's iconography (crozier, mitre, volume of works) may be based on images in the Real Colegiata de San Isidoro in León (Fernández González 1998, 149–50), but the two female allegories are exact copies of the model: *Ecclesia*, bare-headed, carrying the tiara and Keys of St Peter and the Fisherman's ring on her middle right finger, with the crown of her motto ("Sola coronat"); *Religio*, veiled as a nun carrying a basilica, with the roses and lilies of hers ("Nec lilia nec rosae desunt").

[42] Felipe's words are in Grial-Loaisa, vol. 1, fol. ¶[1]^{r} "aviendo noticia que las obras del glorioso S. Isidoro *Doctor de las Hespañas* andavan mal escritas y depravadas [...], y desseando el remedio dello *por la mucha devoción que al Santo tengo* y el servicio que en estos Reynos se le debe, mandé buscar en las librerías antiguas dellos." The king's devotion should not be taken lightly; his obsessive-compulsive attitude to saints' relics was mentally abnormal (Lazure 2007) even for that age, when superstition was officially promoted as a substitute for faith, to counter scepticism and science. For the spurious blood relation see Alvar Gómez de Castro, *Genealogía de sant Isidoro, con la declaraçión del grado de consanguinidad* [...] *con la Magestad del Rey Don Phelippe segundo nuestro señor*, in Esc. Ms. b.III.1, fols 173–97.

Doctor's works [...], as aids and documents for the protection and propagation of religion."[43]

4 Conclusion

It cannot be said that Grial's exhortation succeeded in getting learned Europe to take up the cudgels on behalf of "the Doctor of Spain," or that his travails reversed the perceptible decline in Isidore's *auctoritas*. The evidence suggests that elsewhere scholars were content to go on using La Bigne's edition.[44] In this respect Grial-Loaisa fared little better than Grial's pedantic proposal to rename Isidore *Hispalitanus*, not *Hispalensis* (vol. 1, fol. ¶2bis^{r} "Ad lectorem"). One should conclude, however, by recognizing what Felipe II's team *did* achieve. The Renaissance reversal in Isidore's fortune as an influence upon life, thought, and action was historically inevitable and irreversible, but I hope to have shown that the story was more complex than we might assume. That age was ostensibly interested in aspects of Isidore—his nationality, his sanctity, his genealogical relationship to royal families—that seem of little interest or value to us. Despite this, however, the shift in the episteme had in fact worked to his, and our, benefit. Scholars may have taken him less seriously as an authority than at any time since the 8th century, but the removal of the medieval rose-tinted spectacles had paradoxically led people to find out far more about *him* and his works, and in a far more empirical and scientific way, than they had ever done before. And that was a first step towards taking him seriously on his own terms, and understanding him in all the particularity of his own historical moment.

---

[43] Ibid., fol. ¶2 "auctoritas in rebus vel Ecclesiasticis vel civilibus gravior [...] præposteram quorundam hominum elegantiam [...] restituta hac nostra ætate re litteraria, cum lux rebus reddita videretur. [...] de statu deiecta, vix ullo in loco, exiguo certè cum honore, [...] criminationibus obnoxia calumniisque obvia & exposita [...] alii, non nostri modò sed externi etiam eruditione præstantes viri [...] laboriosissima Hispani Doctoris excerpta, [...] tuendæ propagandæque religionis adiumenta [...] atque documenta."

[44] La Bigne's 1580 volume was reissued by the same Parisian press in an augmented version by Jacques Du Breul incorporating some matter from the Spanish edition (Isidorus 1601, 789–958 "Notae virorum doctorum in quosdam libros Divi Isidori Hispalensis Episcopi per Joannem Grialum collectæ et auctæ"); and again in Isidorus 1617. La Bigne used Vulcanius's *Etym.* (Isidorus 1577), as we have seen, and this too had been reissued in Gothofredus 1585, cols 818–1326, along with Godefroy's own appendix of *variae lectiones* (cols 1905–22, mostly conjectures, with an occasional variant "in vet. cod.," "in manuscripto codice", "alii"—the closest thing to an apparatus criticus before Grial), which in turn was reprinted in 1595 and 1602. Grial-Loaisa, on the other hand, was not published again until 1778, and only in Spain.

CHAPTER 20

Archiving Idolatry: Isidore of Seville and the Recording of Native Superstition in the New World

Amy Fuller

1 Introduction

As Jeremy Lawrance has already attested in this volume, we know that Columbus cited Isidore in a letter he wrote to Ferdinand and Isabella during his third voyage to the erroneously named "Indies" in 1498.[1] If we take a cursory glance at a map of the Spanish Empire's "New World" territories, it would seem to suggest a continuation of Isidore's influence, due to the many towns and cities named "San Isidro" from Argentina to the Philippines. This chapter will focus on Isidore's reception in New Spain in particular, and in modern-day Mexico we find five towns named San Isidro, plus an additional six in areas that formally belonged to Mexico but are now in the United States. However, most of these were named after San Isidro Labrador: Saint Isidore, the patron of farmers and of Madrid, rather than the former archbishop of Seville. Indeed, just as Lawrance has demonstrated that Isidore's fate as an authority in early modern Spain was rather inconsistent, tracing his influence in the "New World" is not a straightforward task either.

Columbus returned to Spain from his historic first voyage on 15 March 1493, and on 4 May that same year, Pope Alexander VI's bull of *Inter caetera* gave the Catholic Monarchs permission to conquer the "New World" lands in the name of Spain, in return for Christianizing the people who lived there.[2] It would be another thirty-one years until the start of the "Spiritual Conquest" of Mexico, and one of the tools created to facilitate the conversion of the indigenous people were encyclopaedias compiled by friars that detailed all aspects of the lives and culture of their native charges, in order to gain an understanding of their religious practices, with a view to eradicate their pagan beliefs. The first printed edition of Isidore of Seville's *Etymologies* was issued by G. Zainer at Augsburg

---

[1] See Jeremy Lawrance's chapter in this volume.

[2] It is worth noting that the territory included in this bull was renegotiated with Portugal in the Treaty of Tordesillas, 1494. For discussion, see Ondina E. González and Justo L. González, *Christianity in Latin America* (Cambridge: 2008), 28.

in 1472.[3] This was followed by ten further editions by 1500, and according to O'Malley, after the first edition was printed, there were more than a thousand manuscripts of Isidore's *Etymologiae* circulating in Europe.[4] Copies of this encyclopaedic work would therefore have been available in abundance for those who needed it. It would be logical therefore to assume that the *Etymologies*, which functioned as a "little library for Christians without access to a rich store of books [...] in order to furnish capable Christian minds," would be perfect for those travelling to the "New World" with limited resources, and would serve well as a model for archiving idolatry.[5]

This chapter will demonstrate that there is considerable evidence to suggest that Isidore influenced the practice of chronicling pagan culture in Mexico, but it will also show that the extent of Isidore's impact in this area is not easy to assess. Tracing Isidore's reception with regards to the fight against native superstition is not a straightforward task. It will require an examination of many of his works, along with an exploration of the progression of his ideas on conversion, and the reception of his methodology for recording knowledge. The dissemination of works influenced by Isidore will also require consideration, as their success or failure would ultimately have had an effect on the continued significance of Isidore in the "New World."

2 The Spiritual Conquest

When a "New World" full of people with no prior knowledge of the Christian God was discovered, an apostolic mission was agreed as the best course of action to facilitate conversion. Cortés's first letter to Charles V, sent in 1519, before the siege of Tenochtitlan, indicated that there was no time to waste in beginning this process, as such was the indigenous Mexicans' penchant for human sacrifice that "not one year passes in which they do not kill and sacrifice some fifty persons in each temple."[6] In case the king was in any doubt of the gravity of the situation, Cortés clarified that "this land seems to us to be very large, and to have many temples in it."[7] He estimated the total number of souls sacrificed in any given year to be at three thousand or four thousand, leaving Charles with no option but to act. According to Cortés's account, despite their awful practices, the people of Mexico would make excellent converts, as they were extremely devoted to their religion (albeit one that was clearly demonic). They were also highly intelligent, and therefore they would be perfectly capable of understanding the word of God. A symbolic twelve Franciscan friars were sent to Mexico in 1524, as the first to embark upon the difficult process of converting the Nahua to Christianity, with Dominicans and Augustinians to follow in 1526 and 1533, respectively. Once the Spiritual Conquest was underway it became apparent that there were myriad obstacles for the friars to overcome: not least was native resistance to adopting the "True Faith," and, as Robert Ricard has explained, "there were too few workers for such an abundant harvest."[8] The vast territory and difficult terrain meant that regions distant from the administrative centre in Mexico City were hard to reach, and therefore took much longer to convert.

Despite the friars' best efforts to eradicate traces of the religious practices, many of the Nahuas' beloved idols were small enough to be hidden and worshipped in secret, which inevitably led to relapses into idolatry.[9] Moreover, the language barrier on both sides meant that it was difficult for friars to know whether the people had ever really understood their teachings anyway. Though many endeavoured to learn the native tongues, with Nahuatl (the official language of the Aztec Empire) being the most commonly used as an auxiliary language, there were still massive difficulties to overcome in translating doctrine, due to the lack of availability of equivalent terms. The Trinity and Holy Ghost, for example, could not be effectively explained in the indigenous languages, and elucidation via the use of approximate words would be less than ideal, and could be considered heretical.[10] The Franciscans, however, were quite practical in their approach to conversion and were open to incorporating indigenous rituals and ceremonies alongside the Christian liturgy.[11] Spoken Nahuatl was converted phonetically into a written form, using the Latin alphabet, and the Franciscan Order took the decision that instruction was to be in Latin and Nahuatl in preference to Spanish.[12]

[9] This is something that Toribio de Benavente Motolinía bemoans throughout his *Historia de las Indios de la Nueva España*, Francis Borgia Steck, ed. and trans., *Motolinía's History of the Indians of New Spain* (Washington, DC: 1951).

[10] For a discussion of the problems faced by those attempting to convert the Nahua, see Fernando Cervantes, *The Idea of the Devil and the Problem of the Indian: The case of Mexico in the sixteenth century* (London: 1991); Ursula Lamb, "Religious Conflicts in the Conquest of Mexico," *Journal of the History of Ideas* 17 (1956), 526–39; David Tavárez, *Invisible War: Indigenous Devotions, Discipline, and Dissent in Colonial Mexico* (Stanford: 2011).

[11] Fernando Cervantes, "The Bible in European colonial thought c. 1450–1750," in *The New Cambridge History of the Bible from 1450 to 1750*, ed. Euan Cameron (New York: 2016), 818.

The first focus of missionary effort was to be directed toward the children who would become the teachers of the parent generation.[13] Fray Toribio de Benevente Motolinía (1482–1568), one of the first twelve "apostles" to arrive in New Spain in 1524, discusses this practice in some depth within his *History of the Indians of New Spain*, explaining in Chapter 13 of the third treatise how the converted children would keep an eye on the rest of the community, including their own parents, and report back to the friars. Similarly, another Franciscan, Fray Bernardino de Sahagún (1499–1590), was a participant in founding and directing the early primary schools and was engaged in the instruction of the youth. The sons of indigenous nobility were assembled near the monasteries where, besides Christian doctrine, they were taught to read, write, preach, and sing.[14] Many of the missionaries discussed the need to separate the native children from their parents in order to ensure that they were not taught the idolatrous ways of their ancestors.[15] Though it would be impossible to claim a direct influence, this practice would seem to echo legislation passed during the Fourth Council of Toledo (633), which was presided over by Isidore of Seville.[16] The council decreed that children resulting from unions between Jews and Christians should go with the Christian parent if the Jewish spouse failed to convert, and Isidore also declared that children of Jewish parents were to be given to monasteries or to God-fearing Christians and separated from their parents in order to avoid following in their error.[17]

The missionaries' lack of knowledge about the indigenous religious practices was also a barrier to successful conversion, as without knowing what aspects of their culture pertained to religion, how could they possibly know what needed to be eradicated? On this premise therefore, and with plenty of evidence to suggest that the Spiritual Conquest had been fairly superficial and had allowed idolatry to continue unchecked due to a lack of cultural understanding, the Franciscan, Fray Bernardino de Sahagún, supported by his superiors in the order, produced the "twelve Books of the divine, or rather, idolatrous, human, and natural things of New Spain."[18] Sahagún believed that the friars needed to learn all there was to know about the daily lives and customs of the indigenous people, in order to understand and eradicate their pagan practices fully. He claimed that:

[15] It is worth noting also that in the later colonial period, as the population of Spanish women in Mexico grew, the status of indigenous and mixed-race women fell. Children resulting from unions between Spanish men and native or mixed-race women were sometimes taken away from their indigenous or *mestiza* mothers in a practice that derived from a Spanish tradition of relieving so-called "wayward" women of their children. This meant that generations of children were therefore raised as "Spanish," despite their mixed heritage, and taught to believe that their mothers' indigenous culture was inferior. See Karen Vieira Powers, *Women in the Crucible of Conquest: The Gendered Genesis of Spanish American Society, 1500–1600* (Albuquerque: 2005), 78.

[17] Stefan K. Stantchev, *Spiritual Rationality: Papal Embargo as Cultural Practice* (Oxford: 2014), 105. For discussion, see Raúl González Salinero's chapter in this volume.

> The physician cannot advisedly administer to the patient without first knowing of which humour or from which source the ailment derives. Wherefore it is desirable that the good physician be expert in the knowledge of medicines and ailments to adequately administer the cure for each ailment. The preachers and confessors are physicians of the souls for the curing of spiritual ailments. […] To preach against these matters, and even to know if they exist, it is needful to know how they practiced them in times of their idolatry, for through our lack of knowledge of this, they perform many idolatrous things in our presence without our understanding it.[19]

Therefore, by knowing what to look for, missionaries would know what to combat.

In order to gain a working knowledge of indigenous customs, Sahagún compiled an encyclopaedia detailing every aspect of Aztec life and culture by undertaking painstaking interviews and collaborating with natives. *The General History of the things of New Spain* (now known commonly as the *Florentine Codex*) was the result of this work. It took over thirty years to complete and was first written in Nahuatl and then translated into Spanish, presented in its final form as a bilingual work with two parallel columns. The mass conversion of a pagan people unaware of the Christian God had not been attempted since the early Roman Church, and so Roman and Greek gods were the obvious model for explaining the role and function of Aztec/Mexica deities. As Macfarlane attests, Isidore of Seville was the first of the Patristic writers to compile a comprehensive reference work containing "practically everything that it is necessary to know" about the pagan gods, and pagan culture in general.[20] It is therefore very possible that Isidore's methods would have been employed in the compilation of works detailing indigenous practices in the "New World," and it would seem that Isidore's fastidious nature was reflected in Sahagún's need to account for everything in order to facilitate successful conversion. This would also appear to echo Isidore's decision to compile the main deviations that had developed through time from Christianity and Judaism's doctrinal core. This has also been highlighted by González Salinero in his chapter, which explained that "Isidore thought that in order to combat heresy effectively, it was convenient to recognize the dogmas on which heresies were based."[21]

3 The *Florentine Codex*

Despite the fact that the *Etymologiae* was not available in the library of Tlatelolco, where Sahagún was based, Victoria Ríos Castaño attests to its celebrated nature, and argues that "Sahagún must have been acquainted [with it]."[22] In fact, she identifies several similarities between the *Etymologies* and the *Florentine Codex*, stating that Isidore had "struggled for two informing principles that resound strongly in the *Historia universal*; those of encyclopaedism and linguistic purity."[23] In particular, Ríos Castaño has identified similarities that would suggest that Isidore exerted a great degree of influence on book 8 of the *Historia universal*, on kings and lords, especially. Here she attests that "that the majority of its thematic elements, including the description of markets, adornments, attire, hairstyle, hobbies, games, food and drink, houses, judicial procedures, and education, are identifiable in Isidore's work."[24] Ríos Castaño provides evidence for this influence in the way in which Isidore discusses the adornments of Roman women, which is reflected in Sahagún's descriptions of the clothing and hairstyles of the Aztecs.

We also find considerable links between Isidore and Sahagún in the way in which they present the etymology of the terms they describe: Isidore in Latin and Sahagún in Nahuatl. Ríos Castaño demonstrates that "with regard to the etymology of birds' names, Isidore is certain that an onomatopoeic approach is the rule rather than the exception [… and] Sahagún is likewise keen to attach an onomatopoeic etymology to many of the birds described in Book XI [of the *Florentine Codex.*]"[25] Another example provided by Ríos Castaño would be Isidore and Sahagún's

> […] shared emphasis on shapes, colours, and even items of nourishment that reminded them of another aspect of reality […] Isidore perceives the Milky Way as a road, bright and white as milk, and believes this association to justify the origin of the phrase. Similarly, Sahagún understands that the origin of the word *citlalsunecuilli* [a constellation] is unravelled on the basis of the physical similitude between the stars and the shining S-shaped amaranth seed tortillas.[26]

It would seem that Sahagún's cataloguing of Nahuatl terms in order to understand the Aztec way of life and worldview was inspired by Isidore's approach to the origin of words.

If Isidore's *Etymologies* provided inspiration for the recording of everyday matters, such as attire and astrology, we can safely assume that he may have influenced the archiving of idolatry also. However, when it comes to this matter, Ríos Castaño suggests that Augustine had a greater influence on Sahagún's writing, with *The City of God* providing a particularly useful model.

> Augustine resolved to write *De civitate dei* after the sacking of Rome by the Visigoths in 410 […] Sahagún, reiterating Augustine's words, argues that the acquisition of knowledge on the pagan fictions and falsehoods is necessary to furnish indispensible 'armas' (weapons) for the Spiritual Conquest. […] He justifies the presence of Nahua gods, ceremonies, mythology, astrology, and auguries in [the] *Historia universal* as informed by Augustine's precept.[27]

Of course, to an extent, Augustine's greater influence upon Sahagún's *Florentine Codex* is understandable due to the fact that Augustine was writing at a time in which the threat of paganism was felt to be real, whereas the same concerns were not as pressing in Isidore's day. Indeed, González Salinero has explored this topic in Chapter 12 of this volume, explaining that "it does not seem that Isidore had to contend with many heretical movements during his time as head of the Sevillian episcopacy."[28] As Wolfram Drews explains:

---

[25] Ríos Castaño, *Translation as Conquest*, 125.

[26] Ríos Castaño, *Translation as Conquest*, 126.

[27] Ríos Castaño, *Translation as Conquest*, 132.

> Isidore never discusses the existence of pagan inhabitants of the kingdom in any of his works, even though such people are attested until the second half of the seventh century. Yet the evidence for 'pagan' beliefs and practices was not substantial enough to promote their social representatives to the position of opponents of Visigothic society.[29]

Perhaps for the same reason, Isidore himself had been influenced by Augustine's take on paganism, as Katharine Nell Macfarlane explains: "The patristic writers upon whom [Isidore] drew, such as Lactantius and Augustine, were engaged in a struggle with paganism. As a result, the information they incorporated about the pagan gods was the foundation of tightly reasoned arguments ridiculing the gods and demonstrating the many inconsistencies in the pagan religion."[30] Therefore, it is likely that despite the encyclopaedic model offered by Isidore, Augustine was more helpful to Sahagún when it came to archiving idolatry.

Indeed, the prologue to book 3 of the *General History of Things of New Spain*, or *Florentine Codex*, entitled "The Origins of the gods" details Augustine's influence by way of explaining the decision to examine the origin myths of the Aztec deities.

> The divine Augustine did not consider it superfluous or vain to deal with the fictitious theology of the gentiles in the sixth Book of the City of God, because, as he says, the empty fictions and the falsehoods which the gentiles held regarding their false gods being known, true believers could easily make them understand that those were not gods nor could they provide anything that would be beneficial to a rational being.[31]

Sahagún believed that it was important to ensure that these beliefs were kept as a record for future reference, because although some believed that the fight against idolatry was being won, Sahagún stated that they should not underestimate the devil's power to return and deceive again, and as such it would be important for later missionaries to be armed with the information that he had recorded.

---

[30] Macfarlane, "Isidore of Seville on the Pagan Gods," 10.

[31] Bernardino de Sahagún, *General History of Things of New Spain*, book 3, prologue.

Despite the prevalence of Augustine, we can still find evidence that suggests Isidore provided inspiration for archiving idolatry in the "New World." Within his *Etymologies*, "Isidore's persistent response to pagan religious belief is euhemerism, the interpretation of pagan divinities and mythological figures as in fact human beings wrongly elevated as supernatural creatures by benighted heathen."[32] Indeed, as Macfarlane attests, Isidore argues that "the names by which the gods are known were actually those of the original mortals, and the pagan poets were responsible for contriving false etymologies for them in order to credit these 'gods' with powers that they never had."[33] Within the *Florentine Codex* we find a very similar treatment of the Aztec gods. Here, Sahagún provides explanations of pagan gods as men honoured in death, deified through mythology, in order to dismiss the Mexica gods as false. Later codices in which the Aztec religion is detailed also follow this model, providing origin myths for these gods in order to demonstrate their lack of divine status, and to present them as empty icons.

Let us begin by examining the treatment of the "Old World" pagan gods by Isidore in his *Etymologies*. Book 8 explores the "gods of the heathens," describing that "those who the pagans assert are gods are revealed to have once been humans, and after their death they began to be worshipped among their people because of the life and merit of each of them."[34] Isidore holds the pagan poets responsible for the elevation of these mortals to divine status by crediting them with false powers.[35] He explains that:

> there were certain powerful men, or founders of cities, for whom, after they had died, the people who had been fond of them made likenesses, so that they might have some solace from contemplating these images. However, at the urging of demons, this error gradually crept into later generations in such a way that those, whom people had honoured only for the memory of their name, their successors deemed as gods and worshipped. The use of likenesses arose when, out of grief for the dead, images or effigies were set up, as if in place of those who had been received into heaven

> demons substituted themselves to be worshipped on earth, and persuaded, deceived and lost people to make sacrifices to themselves.[36]

We can find this sentiment echoed in book 1 of the *Florentine Codex*, which details the gods that the Aztecs worshipped. The first chapter of this first book identifies Huitzilipochtli (Hummingbird from the Left), who was considered to be the principal deity of the Aztecs. A god of war, Huitzilipochtli was unlike many of the other gods that the Mexica worshipped, as he was an exclusively Aztec deity who was not celebrated by other peoples, and was thought to have been adopted when the empire began to develop and prosper, less than two hundred years before it would be defeated by the Spanish conquistadors in 1521. Despite being the first god to be named in the codex, Sahagún describes him as "only a common man, just a man, a sorcerer, an omen of evil; a madman, a deceiver, a creator of war, a warlord."[37] This reflects Isidore's account of the pagan gods in the *Etymologies* as simply mortal men who were later deified when their stories were recorded as legend.

Similarly, Sahagún also discusses another god who was celebrated by the Aztecs but also by other native peoples, Quetzalcoatl (Plumed Serpent). Sahagún describes Quetzalcoatl as a king of the Toltecs, a people who were greatly admired by the Aztecs. Sahagún likens the esteem in which Quetzalcoatl was held to how the English view King Arthur.[38] Though worshipped as a god of wind, Sahagún writes that he was a necromancer and merely a man. He was thought to have travelled east, and a prophecy predicted that he would return. Sahagún explains that this confused the Aztecs when the Spaniards first arrived, as they believed that Cortés (having arrived from the east) was the returning Quetzalcoatl.[39]

In the prologue to book 7 of the *General History*, Sahagún shows sympathy towards the native Mexicans for their ignorance in worshipping false gods, as it is clear that the forefathers of the Christians, the gentiles (both Roman and Greek) made the same error.

---

[36] Isidore, *Etymologiae* 8.11.4–5.

[37] Bernardino de Sahagún, *General History of Things of New Spain*, book 1 ("The Gods"), 1 (p. 1).

[38] It is worth noting that the English could have been included here, and aligned with the Aztecs, because of their recent break from Catholicism—and therefore orthodoxy—making them heretics and therefore putting them on a par with pagans.

[39] Bernardino de Sahagún, *General History of Things of New Spain*, introductory volume, prologue to book 8 (pp. 69–70). It is important to note that the idea that Cortés was mistaken for Quetzalcoatl and a reason why the Spaniards managed to defeat the Aztecs is one that has been debated by scholars for decades, but one that was firmly debunked by Camilla Townsend. For discussion, see: Camilla Townsend, "Burying the White Gods: New Perspectives on the Conquest of Mexico," *American Historical Review* 108 (2003), 659–87.

> How foolish our forefathers, the gentiles, both Greek and Latin had been in the understanding of created things is very clear from their own writings. From them it is evident to us what ridiculous fables they invented of the sun, the moon, some of the stars, water, land, fire and of the other created things. And what is worse, they attributed divinity to them, and they worshipped them, made offerings, made sacrifices to them, and revered them as gods.
>
> This originated in part from the blindness into which we fell through original sin and in part from the cunning, the long-standing hatred of our adversary, Satan, who always endeavours to incline us toward vile, ridiculous and very culpable things.
>
> So if this happened, as we know, among people of so much discretion and presumption, there is no reason for one to marvel that similar things are found among these people, so innocent and so easy to be deceived.[40]

Here we find a fundamental difference between Sahagún and Isidore, which would seem to negate the archbishop of Seville's influence upon the friar's thinking and perhaps also his method, as Isidore presents the Jews, and not the gentiles, as the precursors of the Christian message, albeit ignoring their own prophecies by refusing to accept Christ as the Messiah. Isidore certainly did not have a positive view of the Jews. For example, in his *De fide catholica contra Iudaeos*, Jews are described as ungrateful children, blind, hard of heart, and ignorant, and Judaism itself is presented exclusively as a negation of Christianity.[41] However, the Jews served a purpose in the development of Christian history, and Isidore considered Jewish feasts, laws, and customs as sacraments, which have to be regarded as signs pointing to Christian truth.[42]

Though Sahagún seems to have been influenced by Isidore in his methodology, there is a lack of clear evidence within the *Florentine Codex* of Isidore being used as an authority. Augustine instead takes a clearer role here, which makes sense given that Isidore was heavily influenced by Augustine himself. Nevertheless, we can trace a clear influence of the *Etymologies* in the later colonial period that provides more concrete evidence for Sahagún's reliance upon Isidore. In 1681, the Mexican-born creole Franciscan, Agustín de Vetancurt (1620–1700) accepted a commission to chronicle the activities of the order, resulting in his four-volume work, *Teatro Mexicano*, which was published between 1697 and 1698.[43] Along with detailing the activities of the Franciscans' missionary work, Vetancurt also chronicled the natural history of Mexico and Aztec culture, including native religion, and within *Teatro Mexicano* we find direct references to Isidore of Seville when Vetancurt discusses the false gods and idolatry of the native Mexicans. In Part 2 of the third treatise, Vetancurt details the gods of the Mexica with very specific reference to the pagan gods of Rome. In particular, Vetancurt labels Tezcalipoca as the Mexican version of Jupiter, and he cites information directly from Isidore's *Etymologies*, which explains that "The Romans have consecrated them [the planets] with the names of their gods, that is, Jupiter, Saturn, Mars, Venus and Mercury."[44] Within his explanations, Vetancurt finds a Roman equivalent for each of the principal Aztec deities. So, for example, Mars, the Roman god of war, becomes Huitzilipochtli, the Aztec god of war; and Tlaloc, the god of water and rain, is Neptune. Throughout this discussion, Vetancurt cites Isidore's *Etymologies*, clearly demonstrating his influence in the categorizing of the gods of the "New World" pagans. It is likely that Vetancurt's *Teatro Mexicano* was based heavily on earlier sources that he had at his disposal, as it is a chronicle of the earlier missionaries, rather than an original work on the Aztecs themselves. As such, it would suggest that Isidore did influence the earlier works that Vetancurt had at his disposal, such as the *Florentine Codex*.

4 Diego Durán

Another source that we can look to in order to assess Isidore's influence in this area is *The History of the Indies of New Spain*, which was completed in 1581 by the Dominican friar Diego Durán (1537–88). Durán was born in Seville and spent the majority of his life in Mexico, having come to New Spain as a small child. It is thought that he lived among the indigenous community of Texcoco, near Mexico City, for much of his life, and he was certainly well-versed in the culture of the natives, and fluent in the Nahuatl language.[45] Durán also worked at the Indian school at Santiago Tlatelolco, and it is thought that he may have collaborated with Fray Bernardino de Sahagún.[46] However, unlike Sahagún's encyclopaedic work, which was written with the use of indigenous informants, Durán's chronicle was created with the use of pre-Conquest codices. Contemporaries considered Durán to be a lot more sympathetic towards the Nahua than Sahagún; for example, Garibay states that "While Sahagún sees visions and demons, another writer, Durán—with a more profound knowledge, with more human sympathy—had listened to ancient traditions told by the natives, since childhood."[47] Ignacio Bernal explains that: "These natives were still permeated with the ancient culture at Texcoco [and that, as such] Durán writes that 'All these chants are filled with metaphors so obscure that very few persons can understand them unless their significance is studied and discussed.'"[48]

[45] Ignacio Bernal, "Introduction," in *The Aztecs: The History of the Indies of New Spain*, eds. and trans. Doris Heydon and Fernando Horcasitas (New York: 1964), xxiii-xxiv.

Despite the different methods that they employed in archiving idolatry, Sahagún and Durán had the same intention. They are known today as historians, or ethnographers, due to the richness of the sources they created and their invaluable contribution to our modern understanding of the Aztecs, but as missionaries, their jobs were to convert the Nahua to Christianity. Therefore, the main point of recording the history and culture of the indigenous Mexicans was to enable other friars to gain a greater understanding of those who were to be converted. Like Sahagún, it would seem that Durán was frustrated by the lack of progress that had been made so far, and in order to avoid the continued superficial methods that had been employed by those who came before, the aim of his work was to "destroy ancient idolatry and false religion," a task impossible to achieve "no matter how hard we work if we do not understand the old religion profoundly."[49]

One of the ways in which understanding of the natives differed between missionaries was in how the friars identified them—who exactly they believed the Nahua were, or perhaps more to the point, what they were. There was a great divide between those who believed that the Mexica/Aztecs were pagan and those who understood them to be of Jewish origin, as one of the lost tribes of Israel. Sahagún was of the former opinion and Durán was of the latter, and as such their approaches to the history and culture of the indigenous people differ quite a lot. At the very beginning of his chronicle Durán states: "Because of their nature we could almost affirm that they are Jews and Hebrew people, and

[49] Bernal, "Introduction," xxi.

I believe their way of life, their ceremonies, their rites and superstitions, their omens, and false dealings, so related to and characteristic of those of the Jews."[50]

In order to support his theory, Durán presents similarities between Nahua cultural practices and Jewish rites. These included: making sacrifices in the mountains, under shaded trees, burning incense, and killing sons and daughters in sacrifice, all of which he connects to Hebrew ceremonies practised by the ten tribes of Israel.[51] Durán also emphasized this connection due to the long journey the Aztecs undertook in finding their homeland, explaining that

> They always profess to have come from strange lands and I have found this depicted in their ancient printed manuscripts, where they portray the great periods of hunger, thirst and nakedness, with innumerable afflictions that they suffered until they reached this country and settled in it.[52]

Durán also presents the origin myths of the Aztecs as mirroring Genesis. For example, he states that "an aged man from Cholula, about a hundred years old, began to describe their origins to me [...] 'In the beginning,' said this ancient man, 'before light or sun had been created, this world lay in darkness and shadows and was void of every created thing.'"[53]

Durán also relates a part of the Aztec origin myth that echoes the building of the tower of Babel and God's reaction to this act in having mankind dispersed in all directions. He describes the similarities between these accounts passed down through the generations to that which is found in Genesis as proof that "these natives belong [...] to the lineage of the chosen people of God for who He worked great marvels."[54] Durán also finds parallels within the story of Moses, stating that

> The Indians have traditions regarding a great man who, after suffering many afflictions and persecutions on the part of his countrymen, gathered the multitude of his followers and persuaded them to flee from that persecution to a land where they could live in peace. Having made himself the leader of those people, he went to the seashore and moved the

> water with a rod that he carried in his hand. Then the sea opened and he and his followers went through.[55]

Within Durán's discussion of Aztec origin myths, his portrayal also differs from Sahagún's account by presenting a people with one principal god (Huitzilipochtli), thereby further emphasizing similarities to the Hebrews and distancing them from the gentiles. Despite stressing their reliance upon one god, Durán does discuss seven others that the Aztecs "carried," whom he explains "represented the seven caves out of which the seven tribes had emerged" in order to seek the "Promised Land."[56] In a similar fashion to Sahagún, however, Durán seems to dismiss the status of these seven gods as true deities, claiming that they "had their titles to indicate godly superiority, as today's titles denote noblemen."[57] The one principal god of the Aztecs (Huitzilipochtli) is denigrated by Durán as a "devil," and his account of the origin myth also includes the story of "Huitzilhuitl" (Hummingbird Feather), which provides an account of this deified man's mortal life. This further dismisses the god, continuing the strategy of Isidore and Sahagún. Nevertheless, although this narrative would suggest that the seven lesser gods were not divine, and therefore just men as proposed by Sahagún and Isidore, Durán may also have been reinforcing the Aztecs' status as descendants of the Hebrews.

According to John Leddy Phelan, Durán's interpretation belongs to a current in 16th-century historiography which revolved around the conviction that the conquest was a divine punishment for the alleged sins that the indigenous people had committed.[58] This would also seem to be the idea behind other chronicles, such as those by Motolinía and Torquemada (1562–1624). Fray Toribio de Benevente Motolinía's *Historia de los Indios de la Nueva España*, which he started around 1536, lists the calamities that had befallen the Nahua since the arrival of the Spaniards, and he does so by presenting them as ten plagues reminiscent of the Ten Plagues of Egypt in Exodus. Among these "plagues" are the smallpox epidemic, the heavy tributes imposed upon the natives, and slave labour. These ideas are reminiscent of Isidore's portrayal of the history of the Jews prior to the birth of Christ in his *Greater Chronicle*, which, as Jamie Wood explains, is one of consistent and widespread misfortune.[59] In contrast to

Durán, however, Motolinía is of the opinion that the Nahua were pagan, and his use of the ten plagues within the context of his work seems to imply a comparison between the Aztecs and the ancient Egyptians, another great pagan civilization that converted to Christianity.

5 Apocalyptic Thought

These differing ideas about conversion presented by the friars were also related to contemporary ideas on the Apocalypse. The Franciscan Gerónimo de Mendieta (1526–1604) was key to this. He wrote an exegesis of Luke 14 in which a host sent out three invitations to supper. According to Mendieta, the host is Christ and the supper that is being prepared is that of eternal happiness in heaven. The three invitations symbolize the different methods of converting the people of the three principal faiths still on the margins of Christianity: the Jews, the Muslims, and the gentiles, and the hour of the supper is the end of the world.[60] The first invitation was for the Jews, who should only need to have the "Truth of the Word" announced to them, as they were closest in nature to the Christians; the second was for the Muslims, who required more persuasion than the Jews through constant examples of correct living and good works. The hardest task was the conversion of the gentiles, as, unlike the Jews and Muslims, they had no prior knowledge of the Scriptures at all. These should be guided in a much more forceful manner, though there was little agreement regarding what this meant exactly. For example, the famous Dominican campaigner for indigenous rights, Las Casas (1484–1566), advocated an apostolic model of preaching and rational persuasion. Others, however, such as Las Casas's main opponent, Sepúlveda (1494–1573), stated that the third invitation corresponded to a time after Constantine (306–37) when the Church had gained a secular arm and could therefore coerce the gentiles into conversion.[61] Mendieta was in favour of a moderate use of coercion, if necessary, which was typical of many Franciscans, such as Motolinía, whereas in general the Dominicans were in favour of minimizing the use of force.[62]

It is possible that Isidore's views in this area, especially those regarding the conversion of the Jews, may have been influential. The first book of Isidore's *De*

fide catholica contra Iudaeos (*liber Ysidori contra Iudeos*) was printed in two editions prior to 1500, which meant that, according to Wolfram Drews, the anti-Jewish stereotypes reproduced by Isidore had an impact through the entire Middle Ages until the early modern period.[63] Drews attests that "an analysis of the argument in *de fide catholica* leads to the conclusion that the task of the church (and that of a Christian ruler) [...] is limited to preaching the gospel among the Christian inhabitants of the kingdom."[64] Isidore describes a rational way to achieve faith by means of examples; force is said to be counterproductive.[65] Aside from the views presented in *de fide catholica*, Isidore was also openly critical of the forced baptisms of Jews during the reign of Sisebut, an attitude expressed in canon 57 of the Fourth Council of Toledo, which met in 633 under Isidore's presidency.[66] Free will is presented as crucially important here, and conversion is conceptualized as a mental act: as a voluntary answer of man to the Grace of God calling upon him.[67] As such, reason is advocated, rather than force, and this could have influenced the views of Las Casas.[68] Isidore's rejection of forced conversion could, however, merely reflect the fact that he was writing about events contemporary to him. Drews argues that Isidore believed that the conversion of the Jews would only occur at the end of times, and as such, attempts to convert the Jews in the present were not expected to succeed.[69] However, this is not to suggest that an attempt to convert the Jews would always be futile.

According to Apocalypse 7:4–9, the lost tribes of Israel were to reappear on the day of the Last Judgement. One of the most persistent ideas in apocalyptic literature was the belief that the Jews would be converted as the end of the world neared.[70] Mendieta suggested that the idea of a promised saviour—the Aztec god Quetzalcoatl—was of Hebraic origin, and that Quetzalcoatl was actually the Messiah. José de Acosta's 1590 *Historia natural y moral de las Indias*, however, characterized the Jewish-Indian hypothesis as frivolous conjecture.

[68] More concrete evidence for Isidore's influence on Las Casas can be found in discussions that he had with the Council of the Indies, in which Las Casas uses Isidore to verify his own reliability as a source by explaining that, according to Isidore's *Etymologiae*, only those who were eyewitnesses would be trusted to write history. See Anthony Pagden, "Introduction," in *Bartolomé de las Casas, A Short Account of the Destruction of the Indies*, ed. and trans. Nigel Griffin (London: 1992), xxxvi-xxxvii.

[70] Phelan, *The Millennial Kingdom of the Franciscans*, 24.

The negative evidence seemed overwhelming to him. The Jews had an alphabet, which the American peoples lacked. The Jews, he claimed, were avaricious, the "Indians" were not. Circumcision was not practised among the gentiles of the "New World."[71] This view was, in turn, negated by those who did not consider the natives to be gentiles, and by Diego de Landa (1524–79) in particular, whose *Relación de las cosas de Yucatán*, written around 1566, was a study of the Maya, a people who certainly did have an alphabet, albeit one of a very different kind. Landa also recorded that the Maya practised circumcision. Mendieta attempted to answer Acosta by suggesting that the "Indians" could have forgotten the alphabet, the practice of circumcision, and the "avarice" of their ancestors, and Mendieta spared no pains in developing the parallel between Moses and Cortés.[72] According to Mendieta, the fact that Cortés was able to overthrow the powerful Aztec state with a mere handful of Spaniards revealed that he was leading a divine enterprise.[73]

Isidore of Seville's writings on the Apocalypse were certainly influential and may well have had a bearing upon conversion in the "New World." One of the key ideas that Isidore presented was his division of human history into six ages. His chronicles divided history accordingly, and therefore served to emphasize that everything that had happened since the Incarnation belonged to the Sixth Age.[74] According to Palmer, "the greatest consequence of this [...] was that time was no longer an Augustinian 'mystery,' [...Time] was finite, enclosed and measurable."[75] One of the best documented of all pre-Hispanic Mesoamerican myths is the story of the creation and destruction of a succession of world periods or ages. This is discussed by the likes of Andrés de Olmos (1485–1571), Bernardino de Sahagún, Diego Durán, Toribio de Motolinía, Gerónimo de Mendieta, and other 16th-century chroniclers, all of whom describe the Aztec belief in the creation and destruction of the world through several ages or "Suns."[76] The sources generally agree that the Aztecs believed that the world had passed through four cosmic ages before their time and that they were living in a fifth. They also concur that each of these great cosmic periods ended with a universal cataclysm in which the inhabitants of the ages were either destroyed or transformed into some form of animal or aquatic life.[77] Wayne Elzey explains that it was claimed that the four previous Suns, were

[76] Wayne Elzey, "The Nahua Myth of the Suns: History and Cosmology in Pre-Hispanic Mexican," *Numen* 23 (1976), 114.

> 'imperfect worlds,' each of which had to be destroyed before the 'present age as the fifth and perfect creation can come into being.' The succession of the ages expresses 'the idea that the worlds which were continually being created were gradually nearing perfection,' […] The fifth Sun is 'the synthesis of progress achieved in the earlier ages.' It is the 'final' age of the world because it represents the culmination and perfection of human culture and history.[78]

Elzey finds it striking that all sources of the myth are silent on the possibility of any future Suns following the fifth age, and he claims that a sixth Sun was inconceivable.[79] It may have been inconceivable to the Aztecs, but we must remember that the missionaries who documented these beliefs did so through the lens of their own understanding of who the Nahua were, all the while attempting to fit this culture into their European worldview. It is possible, therefore, that the destruction of the fifth sun equated the demise of the Aztec religion. This could suggest the influence of Isidore regarding the idea that mankind was living in the final (sixth) age, in which the end of the world would come.

According to West, the most important apocalyptic writer and exegete of prophecy in the Middle Ages was the 12th-century Calabrian abbot Joachim of Fiore (*c.*1135–1202), whose significant contribution to the Western intellectual tradition was to develop a persuasive outline of how the history of mankind would evolve through three successive stages, culminating in an age of the Holy Spirit.[80]

> The first two ages were guided by the Father and the Son, respectively. The Third Age of history, that of the Holy Spirit, he foresaw as a period of peace and harmony in which a renewed church would encompass a reformed people devoted to the contemplative life. […] The 'New Spiritual Men' who would convert the world. […] Very early in their history,

> some Franciscans believed themselves to be that evangelical order of the third age.[81]

This would appear to differ quite significantly from Isidore's idea of six ages, and perhaps negate his influence. However, according to Wood: "elsewhere in his writings Isidore refers to a three-fold division of history."[82] In the *Etymologies* Isidore states that: "the first age is before the Mosaic law, the second under the law, the third under grace [… It is because] of these three ages of the world that the resurrection of the Lord is on the third day."[83] This is shown by Wood to be reiterated in Isidore's commentary on Genesis: "that three day period […] signifies the three ages of the world. […] the third is the day of grace. In which third age, just like after the three day period, the sacrament of the sacrifice of Christ is completed."[84]

Isidore seems to have taken this idea of the three ages from Augustine, and as such, it is unlikely that he influenced Fiore's ideas in this area directly, if at all. Nevertheless, it is conceivable that some of Isidore's ideas on the Apocalypse may have trickled down to Franciscans involved in the Spiritual Conquest of Mexico via the ideas of Joachim of Fiore, through the writings of Beatus of Liébana (*c.*730–*c.*800). According to Williams, Beatus's *Commentary on the Apocalypse* included a map of the world that was prompted by his inclusion of *De Apostolis* from Isidore's *Etymologiae*, along with "a short portion of […] *De ortu et obitu patrum* sometimes attributed to Isidore, in which the Apostle James' mission was to convert Hispania."[85] In turn, according to Poole, Joachim of Fiore uses calculations that echo those of Beatus in order to explain the seven seals that are broken during the events of the Apocalypse.[86] Further to this, Poole explains that due to the crusading nature of the Reconquista (*c.*718/722–1492), "there developed in Spain a belief that there would exist at some point in the near future a 'Last World Emperor' who would turn his earthly empire over to God in Jerusalem."[87] This tradition was influenced by Joachimite ideas and prophecies attributed to Isidore.[88] As such, it is possible that in some respects Isidore may have influenced the Franciscans via Beatus and then Fiore, or directly through Fiore.

6 Conclusion

A major obstacle to assessing Isidore's reception, and something that could also have proved a barrier to Isidore's influence, was the way in which the missionary works themselves were treated by contemporaries. Many of them were considered inappropriate, or even potentially dangerous, due to the detailed discussion of idolatry they contained, meaning that their fate was to remain unpublished until the 19th or even 20th century, thereby minimizing their reach. For example, as Parry explains:

> The attitude of the Council of the Indies, and of Spanish high officialdom in general, towards Indian studies was always ambiguous. It varied from decade to decade, with the political situation and with the personality of the president of the Council for the time being. There were periods of blanket prohibition, when anyone known to be engaged in such studies might have his papers seized. This happened to Sahagún, who lost the fruit of twenty years' work.[89]

Mendieta suffered a similar fate, as he was considered to be politically subversive due to his outright hostility to Philip II (1527–98), whose policy of "Hispanicization" of the "Indians" was aimed at restricting the friars' power and influence in the "New World." Mendieta reiterated a conviction shared by most of the friars: that Christianity should be superimposed upon the old pagan social structure, all of which should be carefully preserved provided it did not clash directly with the new religion.[90] Mendieta suspected that Spain's failure to crush the heretics in Europe and to convert the Chinese were hints that God was turning against his chosen people of the New Testament. Spain's inhumanity toward the "Indians" was making her an unworthy instrument of God's will.[91] According to Mendieta, Philip's reign was an apocalyptical catastrophe.

[91] Phelan, *The Millennial Kingdom of the Franciscans*, 107.

The Spanish government responded by banishing Mendieta's works, and the *Historia eclesiástica indiana* was not published until 1870.[92]

We can see from the evidence presented in this chapter that there is a strong likelihood that Isidore's *Etymologies* were influential in the creation of encyclopaedias in the "New World" for the purpose of extinguishing the idolatrous practices of the natives. However, in some cases it would seem that Augustine's *City of God* was preferred as a model for those who believed the Nahua to be pagans. Nevertheless, despite the importance of Augustine in the discussion of pagan practices, many of the "New World" "ethnographers" actually viewed the Aztecs as having been descended from the Jews, and in this case Isidore's ideas on the conversion of the Jews and his Apocalyptic writings may have been particularly helpful in the fight against idolatry in the "New World." It is clear that Isidore's writings were referenced and directly quoted by influential figures, such as Columbus, Las Casas, and Vetancurt. However, attempting to trace Isidore's influence is not straightforward, and it would appear that at times this passed through one or even two later writers first, such as Beatus of Liébana and Joachim of Fiore, which makes the task more difficult, and leads to rather speculative conclusions. It is also fair to say that the extent of Isidore's influence in the "New World," especially regarding archiving idolatry, has been limited by the treatment of works, such as Sahagún's *Florentine Codex*, which were not published until the 19th century or later. Counter-Reformation anxieties about the spread of heresy and continuation of idolatry arguably frustrated the conversion process. Works designed to provide the missionaries with the information they needed to more effectively eradicate idolatry, by providing a deeper understanding of native practices, were deemed inappropriate or dangerous and kept out of circulation. The loss of these works, and ultimately the methodology provided by Isidore for archiving idolatry, ultimately led to a more superficial and difficult conversion of the indigenous people, the success of which is still questionable today in some parts of rural Mexico. Tracing Isidore's influence in the process of archiving idolatry is a difficult task, but his influence is definitely identifiable and something that would merit further examination.

A Companion to Isidore of Seville presents nineteen chapters from leading international scholars on Isidore of Seville (d. 636), the most prominent bishop of the Visigothic kingdom in Hispania in the seventh century and one of the most prolific authors of early medieval western Europe.

Introductory studies establish the political, religious and familial contexts in which Isidore operated, his key works are then analysed in detail, as are some of the main themes that run throughout his corpus. Isidore's influence extended across the entire Middle Ages and into the early modern period in fields such as church governance and pastoral care, theology, grammar, science, history-writing, linguistics, all topics that are explored in the volume.

Graham Barrett, Winston Black, José Carracedo Fraga, Santiago Castellanos, Pedro Castillo Maldonado, Jacques Elfassi, A. T. Fear, Amy Fuller, Raúl González Salinero, Jeremy Lawrance, Céline Martin, Thomas O'Loughlin, Martin J. Ryan, Sinéad O'Sullivan, Mark Lewis Tizzoni, Purificación Ubric Rabaneda, Faith Wallis, Immo Warntjes and Jamie Wood.

Dr Andrew Fear, D.Phil. (Oxford), is a Lecturer in Ancient History at The University of Manchester (UK). He has published a translation of Orosius's *Seven Books of History against the Pagans* (*Translated Texts for Historians*, University of Liverpool Press, 2010) and was joint editor, with Jamie Wood, of *Isidore of Seville and his Reception in the Early Middle Ages* (Amsterdam University Press, 2016).

Dr Jamie Wood, Ph.D. (Manchester), is an Associate Professor in History at the University of Lincoln (UK). He has published widely on late antique and early medieval Iberia, including *The Politics of Identity in Visigothic Spain* (Brill, 2012).

PREFACE

THE writer of the following pages undertook, at the suggestion of Professor James Harvey Robinson, to translate passages from Isidore's *Etymologies* which should serve to illustrate the intellectual condition of the dark ages. It soon became evident that a brief introduction to the more important subjects treated by Isidore would be necessary, in order to give the reader an idea of the development of these subjects at the time at which he wrote. Finally it seemed worth while to sum up in a general introduction the results of this examination of the *Etymologies* and of the collateral study of Isidore's other writings which it involved.

For many reasons the task of translating from the *Etymologies* has been a difficult one. There is no modern critical edition of the work to afford a reasonable certainty as to the text; the Latin, while far superior to the degenerate language of Gregory of Tours, is nevertheless corrupt; the treatment is often brief to the point of obscurity; the terminology of ancient science employed by Isidore is often used without a due appreciation of its meaning. However, the greatest difficulty in translating has arisen from the fact that the work is chiefly a long succession of word derivations which usually defy any attempt to render them into English.

In spite of these difficulties the study has been one of great interest. Isidore was, as Montalambert calls him, *le dernier savant du monde ancien*, as well as the first Christian encyclopaedist. His writings, therefore, while of no importance in themselves, become important as a phenomenon in the history of European thought. His resort to ancient science instead of to philosophy or to poetry is suggestive, as is also the wide variety of his ‘sciences’ and the attenuated condition in which they appear. Of especial interest is Isidore’s state of mind, which in many ways is the reverse of that of the modern thinker.

It is perhaps worth while to remark that the writer has had in mind throughout the general aspects of the intellectual development of Isidore’s time: he has not attempted to comment on the technical details—whether accurately given by Isidore or not—of the many ‘sciences’ that appear in the *Etymologies*. The student of the history of music, for example, or of medicine as a technical subject, will of course go to the sources.

The writer is under the greatest obligation to Professors James Harvey Robinson and James Thomson Shotwell for assistance and advice, as well as for the illuminating interpretation of the medieval period given in their lectures. He is also indebted to Mr. Henry O. Taylor and Professors William A. Dunning and Munroe Smith for reading portions of the manuscript.

CONTENTS

PART I
INTRODUCTION

CHAPTER I
Isidore’s Life and Writings

PAGE

1. Importance of Isidore 15
    a. Place in history of thought 15
    b. Influence 17
2. Historical setting 18
    a. The Roman culture in Spain 18
    b. Assimilation of the barbarians 18
    c. Predominance of the church 19
3. Life 20
    a. Family 20
    b. Leander 20
    c. Early years and education 21
    d. Facts of his life 22
4. Impression made by Isidore on his contemporaries 23
    Braulio’s account 23
5. Works 24
    a. Braulio’s list 24

- b. Works especially important as giving Isidore’s intellectual outlook 25
  - (1) *Differentiae* 26
    - Stress on words 26
  - (2) *De Natura Rerum* 27
    - View of the physical universe 27
    - General organization of subject-matter 28
  - (3) *Liber Numerorum* 29
    - Mysticism of number 29
  - (4) *Allegoriae* 29
  - (5) *Sententiae* 29
  - (6) *De Ordine Creaturarum* 30
- c. His main work—the *Etymologies* 30
  - (1) Description 30
  - (2) Contents 31
  - (3) Antiquarian character 32
  - (4) Leading principle of treatment—word derivation 33
  - (5) Inconsistency of thought 34
  - (6) Circumstances of production 34

CHAPTER II
ISIDORE’S RELATION TO PREVIOUS CULTURE

1. Dependance on the past 35
2. Ignorance of Greek 35
3. Relation to Latin writers 37
   - a. The function of the Christian writers 37
   - b. The development of the pagan thought 37
     - (1) The encyclopædias 38
       - (a) Characteristics 38
         - Decay of thought 38
         - Epitomizing tendency 39
         - Literary scholarship 39
         - Scientific scholarship 40
       - (b) Method of production 40
       - (c) Acceptability of encyclopædias to the church fathers 41
       - (d) Debt of Isidore to them 41
     - (2) The encyclopædias of education 43
4. The personal element contributed by Isidore 44
5. Sources used by Isidore 45

  - a. Confusion of the tradition 45
  - b. Investigations and their results 45

CHAPTER III
ISIDORE'S GENERAL VIEW OF THE UNIVERSE

1. Introductory considerations 48
  - a. The difficulties in ascertaining the world-view 48
    - (1) Inconsistencies 48
    - (2) Unexplained preconceptions 48
  - b. Conditions favoring the construction of a world-view 49
2. The physical universe 50
  - a. Form of the universe 50
    - Question of the sphericity of the earth 50
    - Greek cosmology versus Christian cosmology 54
  - b. Size of the universe 54
  - c. Constitution of matter 55
    - The four elements 55
      - Properties 55
      - Cosmological bearing 57
      - Bearing on the physical constitution of man 59
      - Use of the theory in medicine 59
      - Phenomena of meteorology explained by the theory 60
      - Seasons 61
  - d. Parallelism of man and the universe 62
3. The solidarity of the universe 63
  - a. Strangeness of Isidore's thinking 63
  - b. The conception of solidarity 64
  - c. Number 64
  - d. Allegory 65
4. The supernatural world 67
  - a. Contrast between mediæval and modern views 68
  - b. Method of apprehending the supernatural world 68
  - c. Relative importance of natural and supernatural 68
    - (1) In nature 68
    - (2) In man 69
    - (3) Asceticism 70
  - d. Inhabitants of supernatural world 70
    - (1) Theology 70

        - (2) Angelology 70
        - (3) Demonology 72
- 5. View of secular learning 73
    - a. Philosophy 73
        - (1) Conception of philosophy 73
        - (2) Attitude toward pagan philosophy 74
    - b. Poetry 74
    - c. Science 75
        - (1) Attitude toward pagan science 75
        - (2) Condition of pagan science 76
        - (3) Low place accorded to science 76
        - (4) Science harmonized with religious ideas 77
        - (5) Perversity of pagan scientists 78
- 6. View of the past 79
    - a. Pagan past as a whole dropped 79
    - b. Idea of the past dominated by Biblical tradition 79
    - c. Importance of Hebrew history 80

CHAPTER IV
ISIDORE'S RELATION TO EDUCATION

- 1. Problem of Christian education 81
- 2. Cassiodorus' solution 82
    - a. Theology 83
    - b. The seven liberal arts 83
- 3. The educational situation in Spain 84
- 4. Isidore's solution 85
    - a. Attitude toward the secular subject-matter 85
    - b. Comprehensive educational scheme 86
        - (1) First eight books of the Etymologies 86
        - (2) The higher and the lower education 87
- 5. Bearing of Isidore's educational scheme on the development of the universities 88

INTRODUCTION

CHAPTER I

ISIDORE'S LIFE AND WRITINGS

THE development of European thought as we know it from the dawn of history down to the Dark Ages is marked by the successive secularization and de-secularization of knowledge.[1] From the beginning Greek secular science can be seen painfully disengaging itself from superstition. For some centuries it succeeded in maintaining its separate existence and made wonderful advances; then it was obliged to give way before a new and stronger set of superstitions which may be roughly called Oriental. In the following centuries all those branches of thought which had separated themselves from superstition again returned completely to its cover; knowledge was completely de-secularized, the final influence in this process being the victory of Neoplatonized Christianity.[2] The sciences disappeared as living realities, their names and a few lifeless and scattered fragments being all that remained. They did not reappear as realities until the medieval period ended.

This process of de-secularization was marked by two leading characteristics; on the one hand, by the loss of that contact with physical reality through systematic observation which alone had given life to Greek natural science, and on the other, by a concentration of attention upon what were believed to be the superior realities of the spiritual world. The consideration of these latter became so intense, so detailed and systematic, that there was little energy left among thinking men for anything else.

At the point where this de-secularizing process was complete, at the opening of the seventh century, lived the Spanish bishop and scholar, Isidore of Seville. His many writings, and especially his great encyclopedia, the *Etymologies*, are among the most important sources for the history of intellectual culture in the early middle ages, since in them are gathered together and summed up all such dead remnants of secular learning as had not been absolutely rejected by the superstition of his own and earlier ages; they furnish, so to speak, a cross-section of the debris of scientific thought at the point where it is most artificial and unreal.

The résumé that Isidore offers is strikingly complete. In this respect he surpasses all the writers of his own and immediately preceding periods, his scope being much more general than that of his nearest contemporaries, Boethius and Cassiodorus. He goes back here to the tradition of the encyclopedists of the Roman world, Varro, Verrius Flaccus, Pliny, and Suetonius, by the last of whom he is believed to have been especially influenced. Few writers of any period cover the intellectual interests of their time so completely. To understand Isidore’s mental world is nearly to reach the limits of the knowledge of his time.[3]

The influence which he exerted upon the following centuries was very great. His organization of the field of secular science, although it amounted to no more than the laying out of a corpse, was that chiefly accepted throughout the early medieval period. The innumerable references to him by later writers,[4] the many remaining manuscripts,[5] and the successive editions of his works[6] after the invention of printing, indicate the great rôle he played.[7] From the modern point of view the real benefit he conferred upon succeeding centuries was that in his encyclopaedic writings he presented to the intelligent the fact that there had been and might be such a thing as secular science; while the blunders in which he was continually involved, and the shallowness of his thinking, offered a perpetual challenge to the critical power of all who read him. There was contained in his writings also, as we shall see, the embryo of something positive and progressive, namely, the organization of educational subjects that was to appear definitely in the medieval university and dominate education almost to the present day.

For a fuller understanding of Isidore's historical setting some attention must be given to the country in which he lived. Spanish culture in the early middle ages seems to have been relatively superior. It is well known that the country had been thoroughly Romanized. How complete the process had been may be judged from the list of men of Spanish birth who had won distinction in the wider world of the empire; it includes the two Senecas, Lucan, Quintilian, Martial, Hyginus, Pomponius Mela, Columella, Orosius, and the two emperors, Trajan and Hadrian. In fact Spain had lost its individuality and had become an integral part of the Roman world, little inferior in its culture even to Italy itself; and the close of Roman rule found the people of Spain speaking the Latin language, reading the Latin literature, and habituated to Roman institutions and modes of thought.

Moreover the continuity of this ancient culture had been perhaps less rudely disturbed in Spain than elsewhere by the shock of the barbaric invasions. Here its geographical situation stood the country in good stead; the barbarian frontier was far away and the chances were that barbarians destined by fortune to enter Spain would first spend much time in aimless wandering within the empire, with consequent loss of numbers and some lessening of savagery. Such, at least, was the case with the Visigoths, who alone of the barbarians proved a permanent factor in the country's development. They were first admitted to the empire in 376, and must have passed largely into the second generation before they began to penetrate into Spain, while the real conquest by them did not begin until much later. “At the time of their appearance as a governing aristocracy in Spain” they “had become by long contact with the Romans to all intents and purposes a civilized people.”[8] They were thus in a position to coalesce with the Romanized natives, and that this was largely brought to pass is shown by the conversion of the Arian Goths to orthodoxy, the removal of the ban of intermarriage between the two races, the use of Latin in all official documents, and finally by the establishment of a common law for both peoples. The “sixty-one correct hexameters” of the Visigothic king Sisebutus (612–620),[9] compared, for instance, with the absolutely hopeless attempts of Charlemagne two centuries later to learn the art of tracing letters,[10] show plainly that Spanish culture had not sunk to the level of that of other parts of the western empire.[11]

In this cultural struggle which had taken place between the native population and their Visigothic rulers the contest between orthodox Christianity and Arianism had been of prime importance, and its settlement of the utmost significance. Since the Spaniards upheld the orthodox faith and the Visigoths were Arians, the victory of orthodoxy was a victory of the native element over the newcomers. By this victory, therefore, a position of predominance unusual for the time was given to the Spanish church organization, and the bishops, the leaders of the church in the struggle, became the most powerful men in the nation. Their power was further strengthened by the weakening of the secular power when the Visigothic royal line became extinct and it proved impossible to secure a successor to it from among the families of the turbulent nobility. From the conversion of the Visigoths in 587 to the invasion of the Saracens, Spain was a country dominated by bishops.[12]

Of Isidore’s life surprisingly little is known, considering the bulk and importance of his writings and his later fame.[13] All that can be ascertained of his family is that it belonged originally to Cartagena, that it was of the orthodox religion, and that the names of its members are Roman.[14] It is extremely probable that it belonged to the Hispano-Roman element of the population. That Isidore and his two brothers were bishops may be taken to show that of whatever origin the family was, it was one of power and influence.

A word may be said of his elder brother, Leander, who was a man of perhaps greater force than Isidore himself. Born at Cartagena, he became a monk, and later, bishop of Seville. He was the chief leader of the orthodox party in its struggle against "the Arian insanity", and in the heat of the conflict was obliged to absent himself from Spain for a time. He visited Constantinople and there became the friend of Gregory the Great.[15] Returning to Spain, we find him, under king Reccared in 587, presiding over the council of Toledo, at which the Visigothic kingdom turned formally from Arianism. Leander was a man of action rather than a writer, but according to Isidore he engaged in controversy with the heretical party, "overwhelming the Arian impiety with a vehement pen and revealing its wickedness". He wrote also a little book, which we still have, "On the training of nuns and contempt for the world",[16] and contributed music and prayers to the church service. There seems to be no doubt that Leander was the foremost churchman of his time in Spain. The prestige of his name must have made it easier for his successor, Isidore, to devote himself to the intellectual rather than to the administrative leadership of the church.[17]

As to Isidore's early years our only authentic information is that his parents died while he was still young, and left him in the care of Leander. It is very probable, however, that he looked forward from the beginning to the clerical life which his brothers had chosen and that he therefore went through the educational routine as laid down for churchmen, which was practically the only formal education of the time. The best proof of this lies in the fact that Isidore wrote text-books of the liberal arts—a task that would have been well-nigh impossible to one who had not been drilled in them in his youth.[18]

Isidore succeeded his brother Leander in the bishopric of Seville probably in the year 600.[19] His few remaining letters, written in the stilted religious phraseology of the day, give the impression that he was much consulted on ecclesiastical and political matters, and that he held a position of primacy among the Spanish bishops; but on the whole they contain remarkably little that is of personal interest. From the records of the councils we learn that he presided at the second council of Seville in 619, and probably also at the fourth of Toledo in 633.[20] According to a contemporary account written by a cleric named Redemptus, he died in April of 636. No other details of importance are known about his life. His career must have been a placid and uneventful one, and evidently much of his time was spent on his voluminous writings, which were the means by which he won his great ascendancy over the minds of his contemporaries.[21]

Perhaps the most reliable account of the impression which Isidore made on the men of his own time is given in the somewhat ponderous *Introduction* to his works furnished by his friend and correspondent, Braulio, bishop of Saragossa:[22]

> Isidore, a man of great distinction, bishop of the church of Seville, successor and brother of bishop Leander, flourished from the time of Emperor Maurice and King Reccared. In him antiquity reasserted itself—or rather, our time laid in him a picture of the wisdom of antiquity: a man practiced in every form of speech, he adapted himself in the quality of his words to the ignorant and the learned, and was distinguished for unequalled eloquence when there was fit opportunity.[23] Furthermore, the intelligent reader will be able to understand easily from his diversified studies and the works he has completed, how great was his wisdom.... God raised him up in recent times after the many reverses of Spain (I suppose to revive the works of the ancients that we might not always grow duller from boorish rusticity), and set him as a sort of support. And with good right do we apply to him the famous words of the philosopher:[24] "While we were strangers in our own city, and were, so to speak, sojourners who had lost our way, your books brought us home, as it were, so that we could at last recognize who and where we were. You have discussed the antiquity of our fatherland, the orderly arrangement of chronology, the laws of sacrifices and of priests, the discipline of the home and the state, the situation of regions and places, the names, kinds, functions and causes of all things human and divine."

From this characterization, as well as from the very brief life by another contemporary, Bishop Ildephonsus of Toledo, it is evident that Isidore impressed his own age chiefly as a writer and man of learning. Both Braulio and Ildephonsus give lists of his works. That of the former, who was Isidore's pupil and correspondent, is the fuller, and may be regarded as the more reliable. With its running comment on the content of each title, it is as follows:

> I have noted the following among those works [of Isidore] that have come to my knowledge. He wrote the *Differentiae*, in two books, in which he subtly distinguished in meaning what was confused in usage; the *Proœmia*, in one book, in which he stated briefly what each book of the Holy Scriptures contains; the *De Ortu et Obitu Patrum*, in one book, in which he describes with sententious brevity the deeds of the Fathers, their worth as well, and their death and burial; the *Officia*, in two books, addressed to his brother Fulgentius, bishop of Astigi, in which he described in his own words, following the authority of the Fathers, why each and every thing is done in the church of God; the *Synonyma*, in two books, in which Reason appears and comforts the Soul, and arouses in it the hope of obtaining pardon; the *De Natura Rerum*, in one book, addressed to King Sisebut, in which he cleared up certain obscurities about the elements by studying the works of the church Fathers as well as those of the philosophers; the *De Numeris*, in one book, in which he touched on the science of arithmetic, on account of the numbers found in the Scriptures; the *De Nominibus Legis et Evangeliorum*, in one book, in which he revealed what the names of persons [in the Bible] signify mystically; the *De Haeresibus*, in one book, in which, following the example of the Fathers, he collected scattered items with what brevity he could; the *Sententiae*, in three books, which he adorned with passages from the *Moralia* of Pope Gregory; the *Chronica*, in one book, from the beginning of the world to his own time, put together with great brevity; the *Contra Judaeos*, in two books, written at the request of his sister Florentina, a nun, in which he proved by evidences from the Law and the Prophets all that the Catholic faith maintains; the *De Viris Illustribus*, in one book, to which we are appending this list; one book containing a rule for monks, which he tempered in a most seemly way to the usage of his country and the spirits of the weak; the *De Origine Gothorum et Regno Suevorum et etiam Vandalorum Historia*, in

> one book; the *Quaestiones*, in two books, in which the reader recognizes much material from the old treatments; and the *Etymologiae*, a vast work which he left unfinished, and which I have divided into twenty books, since he wrote it at my request. And whoever meditatively reads this work, which is in every way profitable for wisdom, will not be ignorant of human and divine matters. There is an exceeding elegance in his treatment of the different arts in this work in which he has gathered well-nigh everything that ought to be known. There are also many slight works, and inscriptions in the church of God, done by him with great grace.[25]

For the present purpose, which is to ascertain something of the intellectual outlook of the dark ages, the *Etymologiae* is, of course, of prime importance, since it contains in condensed form nearly everything that Isidore has written elsewhere. A passing attention, however, should be given to some of his other works, especially those of the more secular sort, in which his characteristic ideas are frequently developed with greater fullness than in the *Etymologies* itself. These include in particular the *Differentiae*, the *De Natura Rerum*, the *Liber Numerorum*, the *Allegoriae*, the *Sententiae*, and the *De Ordine Creaturarum*.

The *Differentiae* is in two books, the first of which treats of differences of words, and the second, of differences of things. The plan of the first book is alphabetical; words are ranged in pairs and distinguished from each other. Usually these words are synonyms, and directions are given for their proper use; as, *populus* and *plebs*, *recens* and *novus*, *religio* and *fides*; but frequently words of similar sound are distinguished; as, *vis* and *bis*, *hora* and *ora*, *hos* and *os*, *marem* and *mare*. From these latter valuable hints on the Latin pronunciation of the time may be obtained.

The second book, *On Differences of Things*, treats in a brief way of such distinctions as those between *deus* and *dominus*; between the nativity of Christ and of man; between angels, demons, and men; angelic and human wickedness; *animus* and *anima*; the grace of God and the will of man; the life of action and that of contemplation.

The introductory remarks of the *Differentiae* are worth translating, since they reveal one of the most marked characteristics of Isidore’s thinking, the stress that he laid on words. They are as follows:

> Many of the ancients sought to define the differences of words, making some subtle distinction between word and word. But the heathen poets disregarded the proper meanings of words under the compulsion of metre. And so, beginning with them, it became the custom for writers to use words without proper discrimination. But although words seem alike, still they are distinguished from one another by having each an origin of its own.[26] Cato was the first of the Latins to write on this subject,[27] after whose example I have in part written myself of a very few, and have in part taken them from the books of the writers.[28]

The *De Natura Rerum*[29] is a work of great importance for an understanding of Isidore’s view of the physical universe. The preface is of especial interest as giving some hints of his methods of literary work and of his attitude toward pagan writers. It is addressed to Sisebutus, who was king of the Visigoths from 612 to 620.[30] It runs as follows:

> Although, as I know, you excel in talent and eloquence and in the varied accomplishments of literature (*vario flore literarum*), you are still anxious for greater attainment, and you ask me to explain to you something of the nature and causes of things. I, on my part, have run over the works of earlier writers, and am not slow to satisfy your interest and desire, describing in part the system of the days and months; the goals of the year, as well, and the changes of the seasons; the nature also of the elements; the courses of the sun and moon, and the significance of certain stars;[31] the signs of the weather, too, and of the winds; and besides, the situation of the earth, and the alternate tides of the sea. And setting forth all things as they are written by the ancients, and especially in the works of catholic writers, we have described them briefly. For to know the nature of these things is not the wisdom of superstition, if only they are considered with sound and sober learning. Nay, if they were in every way far removed from the search for the truth, that wise king would by no means have said: “Ipse mihi dedit horum quae sunt scientiam

> veram ut sciam dispositionem coeli et virtutes elementorum, conversionum mutationes, et divisiones temporum, annorum cursus et stellarum dispositiones."
>
> Wherefore, beginning with the day, whose creation appears first in the order of visible things, let us expound those remaining matters as to which we know that certain men of the heathen and of the church have opinions, setting down in some cases both their thoughts and words, in order that the authority of the very words may carry belief.

The general organization of the matter treated by Isidore in the *De Natura Rerum* is worth noticing. The preface quoted above indicates that the order of treatment is to follow the order of creation. The first topic, therefore, suggested by the creation of light, we should expect to be the phenomenon of light. Instead of this it is the day, in the calendar sense, that is described, with the natural sequel of the week, month, and year as collections of days. This section really constitutes a brief account of the elements of chronology. Next created are the heavens; so we have next astronomy, presented in a condensed form, to which are appended a few chapters on meteorological matters, such as thunder, clouds, the rainbow, wind, and finally pestilence, which comes in appropriately here as being "a corruption of the air". The topic next in order, following the first chapter of Genesis, is the sea; and after that, the dry land. It should be noted that this view of the physical universe according to the order of its creation, corresponds roughly to the analysis of matter into the four elements, fire, air, water, earth. As will be shown later, such correspondences are an important factor in the intellectual outlook of the time. This was the kind of mental connection with which people were familiar.[32]

The *Liber Numerorum* contains nothing arithmetical in the modern sense of the word, in spite of Braulio's statement that in it Isidore "touched on the science of arithmetic".[33] Its fuller title is "The book of the numbers which occur in the Holy Scriptures", and the body of the book is taken up with the mystic significance of each number from one to twenty, omitting seventeen, and also of twenty-four, thirty, forty, forty-six, fifty, and sixty. The method of treatment

Welcome to our website – the perfect destination for book lovers and knowledge seekers. We believe that every book holds a new world, offering opportunities for learning, discovery, and personal growth. That’s why we are dedicated to bringing you a diverse collection of books, ranging from classic literature and specialized publications to self-development guides and children's books.

More than just a book-buying platform, we strive to be a bridge connecting you with timeless cultural and intellectual values. With an elegant, user-friendly interface and a smart search system, you can quickly find the books that best suit your interests. Additionally, our special promotions and home delivery services help you save time and fully enjoy the joy of reading.

Join us on a journey of knowledge exploration, passion nurturing, and personal growth every day!

THEOLOGICAL INDEX

REFERENCES
TO THE
PRINCIPAL WORKS
IN EVERY DEPARTMENT OF
RELIGIOUS LITERATURE.

EMBRACING NEARLY
SEVENTY THOUSAND CITATIONS,
ALPHABETICALLY ARRANGED UNDER TWO THOUSAND HEADS.

BY
HOWARD MALCOM, D.D., LL.D.

"*Scire ubi aliquid possis invenire, magna pars eruditionis est.*"

BOSTON:
GOULD AND LINCOLN,
59 WASHINGTON STREET.
LONDON TRÜBNER & CO.,
60 PATERNOSTER ROW,
1868.

Entered, according to Act of Congress, in the year 1868, by
GOULD AND LINCOLN,
in the Clerk's Office of the District Court for the District of Massachusetts.

Rockwell & Rollins, Stereotypers and Printers,
122 Washington Street, Boston.

PREFACE.

NOTHING was further from my mind, in commencing this body of references, than the idea of making it available to others as well as myself. On assuming the pastorship of a church in 1820, I purchased, under the guidance of my honored instructors in theology, Drs. Staughton, Alexander, and Miller, about two thousand volumes. But to many of them I was a stranger, and often found that I had help at hand when it was too late for my purpose. For my own convenience, I arranged the entire contents of my library in the manner here exhibited. For aid in future investigations, references were added, as important books came under my notice—in Reviews, or elsewhere. Lying constantly on my desk for over forty years, and receiving almost daily additions, the book grew, without any sensible deduction of time from my proper pursuits; and since my retirement from professional life, I have found pleasant occupation in endeavoring to give it completeness.

So far as I know, the work is unique, so that whatever may be its deficiences, it will be useful as far as it goes. There are bibliothecas, each of which was received favorably by the learned, but all so different in design from this, that it will lose none of its value when placed by their side. Few of them can now be had, and nearly all of them were published more than a century ago, when there were few valuable theological books in the English language. Such as desire to consult them, are referred to the head "Bibliography."

Theology has become the most voluminous of all the sciences. A minister now can read through very few of the teeming productions of the press, while there are many he must consult. In the English language alone, there are, I suppose, a quarter of a million of religious books. To become familiar with these, to say nothing of an equal number in Latin, German, and French, would require a thousand lives. Hence the absolute need of an aid like this, to enable the student to consult just those books, or parts of books, which will furnish him the required assistance.

Persons who have given special attention to some one topic, will probably be acquainted with authors on that point which are not here adduced. But such will not forget that other parts of the book, and perhaps that very part, will render them good service.

The omission which they discover may have been through my ignorance or oversight, but in thousands of cases, such omission is the result of self-imposed restraint. The book may be out of print, or very rare, or superseded by a better, or of small value compared with those which are mentioned. My aim is not to preserve the whole sum of theological literature from that oblivion which much of it merits, but to furnish ready reference to what is still both valuable and accessible. Nor am I willing to hide meritorious authors in a crowd; nor to waste a student's time in searching for books which he cannot find; nor by amassing references, useless or merely curious. to give my book a scholarly and complete appearance, and destroy its utility. Zealous bibliographers enumerate every title they can find, though the book may be nowhere in existence, and love to append to their notice, "rare;" "very rare;" "only fifty copies printed;" "unnoticed hitherto," etc. But I desire neither the credit of authorship, nor the gratification of the learned, and have no other ambition than to help the industrious. No small labor, therefore, has been spent in making careful omissions, and many more would have been made, were it not that a book may be of signal use, though not the best on the subject; and may be within reach, when a better one is not. On a few subjects, such as "English Bible," and "New Version," all the writers which have come to my knowledge are named.

"The Fathers" are constantly referred to, though the subjects may have been much better handled by others. This respect seems due to antiquity. In all cases, their testimony as to facts is important. It is desirable also to keep open the original sources of controversial theology, and to trace the succession of sacred literature. That so many of the references are to old books, will be no objection to scholars. On some of the subjects, nearly all the literature is old; and the aggregate of the good theology of all past ages, is vastly greater than the amount produced in our single age. The zeal of publishers keeps new books before the public, and the student is much less likely to be ignorant of these than of those of older date.

Lists of editions of the Hebrew and Greek scriptures, and of the Septuagint, Vulgate, and other versions, are omitted, because not only are the "Biblia" named separately in booksellers' catalogues, but there are numerous compilations of this sort, which leave nothing to be done in that department. I have mentioned the best of these under "Bibliography," and "Printed editions."

Bodies of Divinity, Bible Dictionaries, Church Histories, and Commentators, are named in their proper places; but as they are themselves works of general reference, they are not referred to under the several topics they embrace, except they discuss some one particularly and largely. The inquirer will, of course, consult such of them as are within his reach.

The abridgement of titles is the result of much reflection, and has cost much labor. To have given them in full would have trebled the cost of the book, without increasing its value. Enough of each title is given to preclude embarrassment or uncertainty.

To assort books accurately is impossible, for some may properly be placed under divers heads; but all inconvenience on this score is obviated by the references to kindred heads.

References are not made to volumes and pages, because the diversity of editions would make them not only useless but perplexing. When a work is divided into parts and chapters, the number is given. Single sermons and pamphlets are omitted, because generally ephemeral, and always difficult to find.

The date of the first publication of a book is given,* where it seemed desirable, as under Commentators, Common Prayer, Concordances, English Bible, Geography, Histories, Missions, Palestine, Theology, etc. The date given in catalogues is only that of the edition there mentioned, and in some of the best, dates are not given at all. Let the owner of this book undertake to put the date of the first editions to the works named under any single head, and he will be convinced of the folly of attempting it for all. To do it as far as I have, has been very troublesome, and in many cases it required an examination of the biography of the author. In Law, Medicine, or Science, the date of a publication may be useful; but theology has a positive basis in Revelation, and he who in any age writes well on sacred subjects, writes for all ages. If the student finds the aid he requires, it is enough. Besides, there are few important books which have not been reprinted, perhaps more than once; and some of the oldest are still being reproduced, often with valuable editorial improvements. Whenever a book relates to "the present time," or the state of a country at a certain period, the date is given, if possible; † and when some particular edition is greatly preferable, it is designated.

Observations on the comparative value of books are sparingly introduced, preferring to omit works of small merit, if there are good ones on that topic, not too rare, except when it seemed well to put the reader on his guard. The little reliance which can be placed on such notices is illustrated by the specimens below, selected because they are the utterances of well-known men in regard to well-known books.

Wake's New Version of the Psalms. "Well drawn up." "Notes judicious."—British Critic. "No value."—Orme.

McKnight on the Epistles. "Luminous and valuable." — Parkhurst. "Not often paralleled."—British Critic. "Translation rash, uncouth, and often ungrammatical. The notes tend more to perplex than enlighten."—Loundes. "With two exceptions, scarcely any doctrine is rightly stated." —Orme.

---

* Some of these dates are disputed by scholars. I have intended to give those most usually assigned.

† Guild, in his useful *"Librarian's Manual,"* discriminates between intellectual and natural bibliography. The former term he applies to the consideration of the contents of books; the latter, to notices of the number of volumes, date, size, price, and rarity of editions or of particular copies. My tastes do not lead me to the latter class of inquiries, and if they did, I should not mingle both in one book.

Draper's Lectures on the Liturgy. "Perspicuous, sensible, and evangelical." — Eclectic Review. "No small portion is jargon." — Critical Review.

Burnet's History of the Reformation was honored, as no other book ever was, by a vote of thanks in the British Parliament. "Impartial, liberal, laborious."—Prof. Smyth. "Burnet is, without doubt, the English Eusebius."—Apthorpe. "One of the most thoroughly digested works of the century."—Prof. Spalding. "The style is mere chit-chat. I do not believe that Burnet intentionally lied, but he was so much prejudiced, that he took no pains to find out the truth."—Dr. Johnson, *in Boswell's Life.*

Dr. Samuel Clarke's Essays. "The most serious treatises Dr. C. ever wrote." "Very useful in all families."—Whiston. "Destitute of originality and acuteness; nor is there any thing in the style to compensate for the mediocrity of thought."—Cunningham.

Quaresmii Elucidatio terrae sanctae. "Not much esteemed."—Walch. "The most valuable work on biblical geography ever printed."—Orme.

Gifford's Translation of Juvenal. "The best version ever made of a classical author."—Sir Walter Scott. "The baldest, and in many parts the most offensive of all the translations of Juvenal."—Hazlitt.

Aikins' General Biography. "Evinces sound judgment, manly freedom, and correct taste."—Roscoe. "A worthless compilation."—Gifford.

Echard's General Eccles. History, to A. D. 313. "The best of its kind." —Prideaux. "Of little value."—Lowndes.

Jortin's Remarks on Eccles. History. "Pithy, learned, candid, and acute." —Dibdin. "Full of manly sense, ingenious strictures, and profound erudition."—Vicess. Knox. "A vulgar caricature, distinguished not more for heartlessness and the absence of every noble feeling, than for the author's shameful ignorance of the subject."—Dowling. "There are few authors to whom I am so much indebted."—Dr. Parr.

Fuller's Church History of Britain. "Even the most serious and authentic parts are so interlaced with pun and quibble, that it looks as if he had designed to ridicule our Church."—Bishop Nicholson. "Simply a caricature of history, and a systematic violation of all its proprieties. Never was there such a medley."—Henry Rogers. "There are only two writers of the genuine history of our Church who deserve the name of historians—Collier and Fuller."—Bishop Warburton. "One of the most remarkable books in the language; the varied powers of learning, sagacity, pathos, wit, humor, and imagination, all animating the pages of a Church history."—Henry Reed. "Sensible, pious, candid."—Bickersteth.

Prettyman's Elements of Theology. "Well arranged, the reasoning clear and solid, well adapted for students in theology, and may be read with advantage by the most experienced divine."—Bishop Marsh. "Merely shows how a creed may be made to signify any thing or nothing."—Williams.

Milner's Church History. "Eminently pious; an estimable treatise in the very spirit of the sacred writers."—Bickersteth. "Milner was destitute of the information necessary to an ecclesiastical historian."—Dowling. "The book has no intrinsic value, and will sink into total and merited neglect."—Dr. Hugh J. Ross.

Dunlop's History of Fiction. "He has executed a defective plan in rather a superficial manner."—LOND. QUART. REVIEW. "An agreeable miscellany, which discovers uncommon information and learning."—EDINB. REVIEW.

Beattie's Essay on Truth. "Beattie's Essay is, I believe, every day more liked; at least, I like it more, as I look upon it more."—DR. JOHNSON, *in Boswell's Life.* "Beattie's book is even more remarkable for being abusive and acrimonious, than for its defects in argument and originality."—EDINBURG REVIEW.

Hallam's Constitutional Hist. of England. "Acrimonious, arrogant, unjust, ill-tempered." "The production of a decided partisan."—SOUTHEY, *in Lond. Quart. Review.* 37 : 194. "Eminently judicial." "Its whole spirit is that of the bench, not of the bar." "Calm, steady, acute, profound. The most impartial book we ever read."—T. B. MACAULEY, *Edinb. Rev.* 48 : 96.

The following are the prominent features which distinguish this undertaking from any other of its kind.

1. The alphabctical arrangement of topics, with writers annexed, instead of the usual alphabetical arrangement of authors, with their writings annexed.

2. The multiplication of heads, so as to comprehend not only principal subjects, but the widest range of theological literature. The number of heads, not counting those which merely refer to others, is over two thousand.

3. The magnitude of the work, comprising, as it does, about seventy thousand citations.* This number is perhaps nearly doubled by the extensive lists of books, which are adduced under particular heads. See the table of such heads at the end of the book.

4. The including of the great Reviews, secular and religious. Unlike pamphlets and single sermons, these are bound, and accessible. A large amount of the best theological literature is thus made available.

5. The analytical arrangement of the best English sermons. These contain a great treasure of both doctrinal and practical theology, and the number of my references to them is proportionably large, some articles consisting mainly of such, though only bound volumes are noticed.

6. The introduction of a wide range of authors not theological Nearly every head contains such references, and some are made up of them almost entirely.†

7. The insertion of the names of prominent characters, scriptural and ecclesiastical, with their biographies, works, and the critics

---

* Lowndes' Bibliographer's Manual, though embracing *all* departments of knowledge, contains but about fifty thousand authors. Allibone's Dictionary of Authors, designed to name *every* writer in the English language, even of an ephemeral pamphlet, embraces but thirty thousand authors.

† See Budhism, Capital punishment, Eleusinian mysteries, Ethnology, Geology, Hinduism, Mesmerism, Phrenology, Palestine, etc. etc.

upon them. Great assistance is thus furnished for investigating the history of sects and doctrines.

8. The separation of writers on controverted subjects into three divisions, viz.: for, against, and historical. Every order, sect, and school, ancient or modern, is fairly presented, as far as is in my power. Leading men, of existing sects, have been written to for lists of their best writers, and the result, though sometimes helpful, has shown how much even they needed such a book of reference.

9. The numerous references to books which do not, by their titles, indicate their subject; thus furnishing aid which no ordinary catalogues could supply.

10. The work is brought down to recent publications

To three classes of persons I hope good service is here rendered.

1. To *authors*, in furnishing them both assistance and restraint. To write well, a man must know to what extent and in what manner his subject has been treated by others. He may be wise, but writers, of whom he is ignorant, may have been more so. He may think he will enlighten the world, when his theme has been already better handled. It is not uncommon for an author to say in his preface that had he known the existence of a certain book, he would have made his own better, or not written at all. Active minds often adopt views unlike those of their cotemporaries, and perhaps lead off a party, not aware that similar notions have been published, refuted, and forgotten. Want of extensive reading is the root of many heresies and superstitions.

2. To *students*, in showing them where they may find desired knowledge. Without such aid, they may stand in a large library, or even in their own, with all needed assistance at hand, and yet be helpless. Next to knowing a thing, is to know where to obtain the information; and as no one can know much, the latter attainment, if extensive, is, on the whole, the better. The student is here introduced to the great minds of the past and the present, and taught who of them and what portions of their works will answer his inquiries or resolve his doubts.

3. *Purchasers of books* for public or private theological libraries, or the theological department of general libraries, will here be shown how to make the collection symmetrical (a quality which few libraries possess), as well as comprehensive and complete.

I am quite conscious of having made a very imperfect book. One life is not long enough, nor one man's knowledge of books extensive enough, to make such a work complete. But as the owner becomes familiar with this volume, he will find the undesirable omissions both fewer and less important than he suspected; for books which might have been named under several heads, are given but under one, and the apparent omission is supplied elsewhere. I present the result of my labors for just what it is—an arranged catalogue of many thousand books, in a single department of literature. These are books which theologians will never discard, so that what I have done is done forever. Future publications will be added by future editors, but they will add, from past publications, few of those which I have omitted.

I do not presume that my book will incur no censures but such as it deserves. Some will think many of the references should have been omitted, and some, that many more should have been added. Some will find fault for the sake of seeming to know more than the author, and some for the love of fault-finding. Some out of ignorance, or lack of reflection, will condemn real excellencies; and some will judge me by a standard which cannot be reached. I have pursued my work in full view of such considerations, content to provide for future theologians a labor-saving apparatus.

> "Si quid novisti rectius istis,
> Candidus imperti: si non, his utere mecum."
> HORACE. EP. VI.

PHILADELPHIA, 1868.

NOTICE.—The Latin titles occurring among English writers, are not there by mistake. It was once customary to give such titles to books in our own language.

When a writer's name is in brackets, it indicates that the book was published anonymously.

Some Reviews have several times commenced a "New Series," and some have been reprinted with altered paging. This has made some unavoidable confusion as to such references; but the only alternative was to insert them with this disadvantage, or omit them altogether.

"A Bibliotheca, or account of books in English, continued to the present day, is a desideratum."—*Bickersteth.*

"A book which treats only of other books, is the touchstone of a genuine lover of literature. He will handle it with gentle reverence, and keep it at his right hand for frequent consultation; while mere readers would throw the book aside as a dull and worthless catalogue."—*London Quarterly Review.*

"Book Catalogues are to men of letters what the compass and lighthouse are to the mariner, the digested index to the lawyer, the dispensatory to the physician, the sign-post to the traveller: in short, they are the concordances of literature."—*Western Memorabilia.*

"Books can give new views of life, and teach us how to live. They soothe the grieved, the stubborn they chastise. Fools they admonish, and the wise confirm."—*Crabbe.*

"A library is not like a dead city of stones, yearly crumbling, and needing repair: but like a spiritual tree. There it stands and yields its precious fruit, from year to year, and from age to age:—thaumaturgic, for it can persuade men."—*Carlyle.*

"Theology is by far the most voluminous of all the sciences. There is none that comes nearly up to it, in the amount, or what may be termed the dimensions of its authorship. It is a colossus of most precious and solid material, brought together by the multiplied efforts of a most prodigious industry, and elaborated into form by the skill of many thousand intellects; some of which equal, both in power and achievement, the most gigantic of those spirits that ever signalized themselves in any of the walks of philosophic investigation."—*Chalmers.*

"Hi sunt magistri qui nos instruunt sine virgis et ferula, sine pane et pecunia. Si accedis, non dormiunt; si inquiris, non se abscondunt; non remurmurant si oberrcs; cachinnos nesciunt si ignores."—*Richard de Bury.*

Guild's Librarian's Manual. 1858.
Hoffmann's Lexicon bibliographicum. 1836.
Horne's (T. H.) Biblical bibliography. 1839.
Kemp's Biblioth. of English theol. writers.
Leigh's Religious and learned men. 1656.
Lowndes' Bibliographers' Manual. (Not entirely theological.)
Marsh's (Bp.) Lectures.
Orme's Bibliotheca Biblica.

Platt's Cat. of Ethiopic biblical manuscripts.
Rhees' Manual of libraries in Amer. 1861.

The above list comprises more than any student will desire to consult. "A complete collection of bibliographical works would exceed 20,000 volumes."—NORTON. NAMUR, above cited, gives *a list* of 10,236 separate works, some of them comprising numerous volumes; comparatively few, however, of these are theological. Under more than 150 of the heads in this work, the reader is referred to the Bibliography of those particular subjects.

Bigotry. See TOLERATION.

Chandler's (H.) Effort against Bigotry.
Eaton's Familiar Dialogues.
Edwards' (Thomas) Dissertations.
Enfield's (William) Sermons.
Falkland's Essay on bigotry.
Fuller's Calvinistic and Socin. systems.
Investigator. 7 : 243.
Roble's (M.) Bigotry worse than Atheism.
Wesley's (John) Sermons.

Biography, Christian.

Acta Sanctorum, quotquot toto orbe colunter. (A stupendous work, issued from time to time, since 1643, till it has reached 59 folio volumes, and is still continued. It furnishes a history of Europe, and of the so-called church, in all ages.)
Adamus (M.) de Vitis Theologorum. 1620.
Bates, Vitæ selectorum. (Lives of Budeus, Scaliger, Bucer, Grotius, Savonarola, &c.)
Böhringer's Kirche Christi, u. ihre Zeugen.
Brucker's Ehren-tempel der Deutchen Gelehrsamkeit. (Has 50 fine portraits of Buxtorf, Fagius, &c.)
Dupin, Bibliotheque des auteurs. 1688.
Pippingii Sacer decadum septenarius. 1707. (Lives of seventy Lutheran ministers.)
Schaffer's Galerie der Reformators.
Schröck's Lebensbeschreibungen berühmter. (Luther, Zuingle, Eck, Brent, Bucer, &c.)
Smith, Vita quorundam illustrium. (Usher, Briggs, Dee, Bainbridge, &c.)
Wendlerus de Præcipuorum, &c. (Luther, Melancthon, Chemnitz, Tarnow, Gerard.)
Wittonii Memoriæ Theologorum.

Allen's Biographia Eccles. (1st four cent.)
Brooks' Lives of eminent Puritans. (Gives memoirs of nearly 500 persons.)
Brown's Practical piety exemplified.
Burder's Pious women of Britton. 1815. (78 memoirs.)
Burnham's Pious Memorials.
Caves' Lives of the Fathers.
Chalmer's (Alex.) Biographical Dictionary. 32 vols. 1812.
Clarke's Lives of Puritan divines. 1683.
Cox's Fathers of the first three cent. 1833.
Evans' Biog. of the early Church. 1837.
Fuller's Worthies of England. 1662.
Gibbons' Eminently pious women. 1760.
Gilpin's Lives of the Reformers. 1800.

Biography, Christian—*continued.*

Granger's Biographical Dictionary. 1760. (Continued by Noble to 1806.)
Hone's Eminent Christians. 1834. (Vol. 1. Usher, Hammond, Evelyn, Wilson. Vol. 2. Bernard, Gilpin, Philip de Morney, Bedell, Horneck. Vol. 3. Ridley, Hall, Boyle. Vol. 4. Bradford, Grindale, Sir Matthew Hale.)
Hook's Ancient and modern divines. 1852.
Howie's Scots Worthies. 1781.
Innes' Select Christian Biography. 1820.
Jones' Christian Biography. 1829.
Kippis' Biographia Brittanica. 1778.
Le Clerc's Lives of eminent fathers. 1696.
Library of Chris. Biog. Period. 1837 et seq.
Livingston's Divines of Scotland. 1660.
Middleton's Biographia Evangelica. 1779.
Palmer's Non-conformist's memorial. 1770.
Sprague's Annals of the Amer. pulpit. 1865.
Stephens' Ecclesiastical biography.
Strype's Annals. 1700.
Tullock's Leaders of the Reformation.
Walton's Lives. 1680. (Donne, Wotton, Hooker, Herbert, and Sanderson.)
Waterhouse's Piety and policy of elder times.
Wood's Athenæ Oxoniensis. (Memoirs of the writers and bishops educated at Oxford, from 1500 to 1690.)
Wordsworth's Ecc. biog. (Wholly English.)

The numbers following indicate the time of decease.

Alexander, Archib.; by J. W. Alexander. 1851.
Alleine's Life and letters. 1672.

Baxter's Narrative of his life. 1691.
Baxter's Life; by Orme.
Bedel, Bp.; by Burnett. 1692.
Bedell, Gregory T.; by Tyng. 1834.
Belfrage's Life and correspondence. 1835.
Boardman, Geo. D.; by King. 1831.
Bœhmen, Jacob; by O'Kelly. 1674.
Bonnell, James; by Hamilton. 1699.
Boyle, Robert; by Birch. 1691.
Bradford, John; by Stephens. 1555.
Brainard, James; by Styles. 1747.
——— ——— by Pres. Edwards.
——— ——— by Pratt.
——— ——— by Peabody.
Buchanan, Claudius; by Pearson. 1718.
Buck, Charles; by Styles. 1815.
Budd, Henry; by himself. 1852.
Bull, Bp.; by Nelson. 1710.
Bunyan, 1688. See BUNYAN.
Burder, George; by F. Burder. 1832.
Bury, Mrs. E.; by Dr. Watts. 1720.
Calvin, 1564. See CALVIN.
Carey, Wm. D. D.; by John C. Marshman. 1834.
Carson, Alex.; by Moore.
Cecil, Richard; by Newlin. 1810.
Chalmers, Thomas; by Hanna. 1847.
Chamberlain, Missionary; by Yates.

Biography, Christian—*continued.*

Chrysostom, 407. See CHRYSOSTOM.
Colet, John: by Knight. 1519.
Cornelius, Elias; by B. B. Edwards. 1832.
Cranmer, 1556. See CRANMER.
De Foe, Daniel; by Wilson. 1731.
De Renty, Cardinal; by St. Jure. 1649.
Doddridge, Philip; by Orton. 1751.
———— ——— by Stoughton.
Duncan, Mary L.; by M. G. L. Duncan. 1840.
Durant's Mem. of an only son. 1822.
Edwards, John; by Hawkesley. 1716.
Elliott, John: by C. Mather. 1690.
Erasmus, 1536. See ERASMUS.
Erskine, Ebenezer; by Wellwood. 1754.
Evans, Christmas; by Jos. Cross. 1791.
——— ———— by D. Phillips.
——— ———— by D. R. Stephens.
Ewing, Greville; by his daughter. 1841.
Fenelon, Abp.; by C. Butler. 1715.
Fiske, Pliny; by Bond. 1825.
Fletcher, John W.; by Benson. 1785.
Fletcher, Mrs.; by H. Moore.
Foster, John; by Ryland. 1843.
Fry, Elizabeth; by Timson. 1844.
Fuller, Andrew; by Morris. 1815.
Gardner, Col.; by Doddridge. 1741.
Gilpin, Bernard; by Carleton. 1583.
Good, John M.; by O. Gregory. 1827.
Graham, Isabella; by Mason. 1814.
Guyon, Madame; by herself. 1717.
Haldane, James; by Alex. Haldane. 1851.
Haldane, Robt.; by Alex. Haldane. 1842.
Hale, Matthew; by Bp. Burnett. 1676.
Hall, Bp.; by Jones. 1656.
Hall, Robert; by O. Gregory. 1831.
Halyburton, Thos.; by Dr. Watts. 1712.
Hawkes, Mrs.; by Cath. Cecil.
Heber, Bp.; by Taylor. 1826.
——— —— by his widow.
Henry, Matthew; by Williams. 1714.
Henry, Philip; by M. Henry. 1696.
Hervey, James; by Ryland. 1758. (A very singular book.)
——— ——— by Brown.
Hewitson, W. H.; by Baillie. 1850.
Howard, John; by Aikens. 1790.
———— —— by Dixon.
———— —— by Brown.
———— —— by Field.
Howels, William; by Morgan. 1832.
Huntingdon, Lady; by A. H. New. 1791.
Huntingdon, Susan; by Wisner. 1824.
Hutchinson, Col.; by Mrs. Hutchinson.
Janeway, John; by J. A. Janeway. 1670.
Jebb, Bp. John; by Forster. 1833.
Jewell, Bp. John; by Le Bas. 1751.
——— ———— by Humphreys.
Judson, Adoniram; by Wayland. 1850.
Judson, Mrs. Anne; by Knowles. 1826.
Judson, Mrs. S. B.; by Mrs. Emily Judson. 1845.
Jukes, Mrs. H. M.; by Mrs. Gilbert. 1854.
Justin Martyr, 166. See JUSTIN MARTYR.
Kiffin, William; by himself. Edited with notes, by Orme. 1823.

Biography, Christian—*continued.*

Kitto, John; by J. A. Ryland.
Knox, 1572. See KNOX.
Latimer; by Gilpin. 1555.
———— by Watkins. (And others.)
Luther, 1546. See LUTHER.
Martyn, Henry; by Sargeant. 1821.
Mather, Cotton; by Sam. Mather. 1728.
Melancthon, 1568. See MELANCTHON.
Mills, Samuel; by Spring.
Mores, Henry; by Ward. 1687.
Neff, Felix; by Bost. 1840. (Of several this is the best.)
Newell, Harriet; by Woods. 1812.
Newton, John; by Cecil. 1807.
Oberlin, John F.; Anonymous. 1826.
Owen, John; by Orme. 1683.
Payson, Edward; by Cummings. 1827.
Pearce, Samuel; by Fuller.
Richmond, Leigh; by Grimshaw. 1827.
Riddle, Bp.; by G. Riddle. 1555.
Romaine, William; by Haweis. 1795.
Rutherford, Sam.; by Murray. 1661.
Ryland, John; by Newman. 1825.
Savage, Mrs.; by Williams.
Scott, Thomas; by J. Scott. 1821.
Schwartz, C. F.; by Pearson. 1798.
Spencer, Thomas; by Raffles. 1811.
Sharp, Granville; by Hoare. 1813.
Staughton, Will.; by Lynd. 1829.
Summerfield, John; by Holland. 1825.
Taylor, Jeremy; by Bp. Heber. 1667.
Tillotson, Abp.; by Burch. 1694.
———— ——— by Bp. Burnett.
Urquhart, John; by Orme. 1827.
Usher, Bp.; by Parr. 1656.
Waldo, Peter. 1179.
Walton, Bp. Bryan; by Todd. 1660.
Watts, Isaac; by Gibbon. 1748.
Wesley, 1791. See WESLEY.
Wesley, Cha.; by Jackson. 1788.
——— —— by Whitehead.
Whitefield, George. See WHITFIELD.
Wickliff, 1384. See WICKLIFF.
Williams, Roger; by Elton. 1683.
Winter, Richard; by Jay. 1799.
Woolsey, Card., 1531. See WOOLSEY.
Xavier, 1617. See XAVIER.
Ximenes, 1517. See XIMENES.
Zinzendorf, 1760. See ZINZENDORF.
Zuingle, 1531. See ZUINGLE.

There is scarcely a limit to to this class of books, and to make a selection generally satisfactory is impossible. The above are among the most precious.

Biography, Scripture. See under individual heads, such as ABRAHAM, ANDREW, &c.

Capelli (Lud.) Historia Apostolica.
Coquerell, Biographie Sacrée.
Dorotheus de Vita prophetarum, apostolorum, et septuaginta discipulorum.
Genoude, Biographie Catholique.
Grube's Characterbilder aus der H. S. (So arranged as to constitute a hist. of relig.)

Biography, Scripture—*continued.*

Heideggeri Historia Patriarcharum.
Peronius de Rebus gestis, vitisque Apost.

Aguilar's Women of Israel.
Bloomfield's (E.) Lives of Christ and the most eminent persons mentioned in the New Testament.
Candlish's Scripture characters.
Copley's Scripture Biography. (Comprises all the names recorded.)
Cox's Female Scripture Biography.
Craddock's Apostolical History.
Crossman's Old Testament characters.
Enfield's Biographical Sermons.
Evans' (R. W.) Scripture Biography.
Farr's Bible Biography. (In Bible words.)
Fleming's Sacred Biography.
Fountain's Old Test. saints.
Hall's (Bp.) Contemplations.
Hifferman's Characters of Scripture history. (Precious.)
Hughes' Female characters of Holy Writ.
Hunter's Sacred Biography.
Jowett's (Wm.) Characters of the New Test.
——— Characters of the Old Test.
King's Female Scripture characters.
McDuff's Sunsets on the Heb. mountains.
Mearns' Lectures on Scrip. characters.
Morris' Sacred Biography. (Plates.)
Roberts' (G.) Sacred Biography.
Robinson's (Tho.) Scrip. characters.
Smith's (S.) Sacred Biography.
Stevenson's Scripture Portraits.
Thompson's (F. E.) Lent Lectures.
Trench's (F.) Scripture Biography.
Watkins' (Isaac) Scripture Biography.
Watkins' (John) Scrip. Biography for youth.
Wordsworth's Scripture Biography.

Birth of Christ. See CHRISTMAS, INCARNATION, JESUS CHRIST, NATIVITY.

Price's Four Dissertations.
Tillotson's (Abp.) Sermons.
Watts' Scale of blessedness.

Blessedness of the Righteous. See BEATITUDES, HEAVEN, PLEASURES OF PIETY, WISDOM OF BEING RELIGIOUS.

Harding's (John) Sermons.
Howe's Blessedness of the righteous.
Langhorne's (William) Sermons.
Manton's (Tho.) Sermons.
Robinson's (D.) Privileges of the righteous.
Tillotson's (Abp.) Sermons.

Blessedness of the Persecuted.

Bragge's (Francis) Practical Discourses.
Collings' (Dr. John) Sermons.
Powell's (Samuel) Sermons.

Blood. See PROHIBITION.

Bloody Sweat. See SUFFERINGS OF CHRIST.

Bartholini Hypomnematum.
Calmeti (Augustin.) Dissertationes.
Clotzii (Stephan.) Dissertationes.
Koenigii (Georg.) Dissertationes.
Mayeri (Joann. Frider.) Dissertationes.
Widelii (Geo. W.) Exercitationes philol.

Boasting.

Irving's (Edw.) Sermons.

Body of Moses.

Bachmani (Fridem.) Dissertationes.
Calmeti (Augustin.) Dissertationes.
Deylingii Observationes Sacræ.
Frischmuthii (Joann.) Dissertationes.
Gerard de Sepultura Mosis.
Hornii (Conrad.) Dissertationes.
Nierembergii Dissertationes.

Bœhmen.

Franckenburgii Vita Bœhmii.
Lüdeken (Th.) Nachricht von J. Böhme.
Rumpæi Diss. de Iacob Bœhmio.
Wullen's J. Böhme's Leben und Lehre.

Bœhmen's Works. Trans. by Sparrow.
Hotham's Life of Jacob Bœhmen.
Oakley's Memoirs of Jacob Bœhmen.

Bœhmenists. See BOURIGNONISTS, MYSTICISM, PIETISTS, QUIETESTS.

Pro.

Bœhmenis Opera. (The best edition is said to be that of Franckenberg. 1730.)
Calo, Hist. Jacobi Bœminis.
Franckenbergii Opera. (Numerous.)
Kuhlman's Neubegeisterter Bœhm. (Adelung gives a list of forty-two works by this author, who was burnt for his opinions in Russia, 1689. All his writings have a holy tendency.)
Richter's Bericht von B.'s Leben und Schrift.
Tschech's Vertheidigung Bœhmens.
Zimmermani Orthodoxia theosoph. Teuton.

Con.

Arnold's (G.) Kirchen u. Ketzerhistorie, &c.
Bücher's Systematis anti-fanatici.

Calovii Anti-Bœminum.
Carpzovii Disputationes Academicæ.
Fabricii (Joann.) Dissertationes.
Gilberti Admonitio adv. scripta B.
Harenburg, de Quirino Kulmanno.
Holzhausen's Anmerkungen über auroram.
Mori Censura philosophiæ Teutonicæ.
Wirnsdorfii (Gottl.) Dissertationes.

Dublin University Mag. 33 : 90.

Bohemian Brethren. See MORAVIANS.

Bogomiles.

Andreæ (Samuel.) Dissertationes.
Commeria Alexiados.
Engehardt's Kirchengeschichte.
Fabricii (Joann. Albert.) Dissertationes.
Heumanni (Chris. August.) Dissertationes.
Wolfii Historia Bogomilorum.

Boodhism. See BUDHISM.

Müller (J. H.) Idées dogmatique de C.
Tribbechovii Dissertationes.
Walchii Miscellanea Sacra.

Clemens Alexandrinus—*continued.*

British Critic. 19:100.
Conybeare's Bampton Lectures. 1839.
Kaye's Writings and opinions of Clement.
Le Clerc's Life of Clemens.
Wray's Writings and opinions of C.

The writings of this Father are not in the English language, though they deserve to be, better than some of the others.

Clemens Romanus.

Clementis Epistolæ. (Many editions. The most esteemed by some is that of Schwegler. 1847.)

Assemani Bibliotheca Orientalis.
Buddei Syntagma Dissertationum theol.
Cyprian (E. S.) de Clement. Rom. evangel.
Ephraimi Homiliæ.
Freudenbergeri Historia controversiæ de Clem. Rom. epistolis.
Grabii Commentatio de Clementis scriptis, genuinis et supposititiis.
Goltz, Gesch. aus d. apostol. Zeitalter.
Herzog des Clem. von R. Brief.
Kesleri Philosophemata potiora recognition. Clem. R. falso attributur.
Nerreter de Fragmentis Clem. R. quod sub nomine epistolæ habetur.
Oudini Com. de scriptis S. Clementis.
Randinus de St. Clemente martyre. (Collects what has been said of Clement by credible writers.)

Bibliotheca Sacra. 22:353.
Burton on the Ep. of C. to the Corinthians.
Cave's Lives of the Fathers.
Chevalier's Translation of the Epistles of Clement, Polycarp, and Ignatius; with introduction, &c.
Lardner's Dissert. on the two epistles of C., published by Mr. Wetstein. (Shows them not to be genuine.)
——— Credibility of the Gospel history. (Touching the two epistles generally received.)

A list of the various editions of this Father is given by FABRICIUS in his *Bibliotheca.* The most esteemed is that of SCHWEGLER. 1847.

Clerical Habits.

Miller (Prof.) on Clerical Habits.
Moody's Hints to young clergymen.
North Amer. Review. 28:503.
Smith on Public Worship. (Treats only on the proprieties of the Sanctuary.)
Stillingfleet's Amusements of a clergyman.
United States Lit. Gazette. 6:377.

Wesley's (Sam.) Dissertations and conjectures. 1736.
Worthington's (Wm.) Dissertations. 1743. (On the design of the book.)

Commentators.

Many of these writers on Job treat on the question whether a future state was the popular belief of the ancient Jews. See further, on that subject, *Faith of the Patriarchs.*

PSALMS. See HAGIOGRAPHA, IMPRECATIONS, MESSIANIC PSALMS.

Ambrose, Athanasius, Gregory Nys., Hilary, Augustine, Theophilact.

Concordances. See PARALLELS.

HEBREW.

Bombergii Concordentiæ Ebrææ. 1523. (This is the concordance of Rabbi Nathan, edited by Bomberg.)
Buxtorfii Concordantiæ Ebrææ. 1632.
Calasii Conc. Sac. bibliorum Ebræicorum. 1621. (An invaluable work, serving not only as a Concordance, but as a Lexicon. By the side of the Hebrew words is the Latin translation of them; and in the margin, the differences between the Septuagint and Vulgate versions. The work is in four large folios, printed at the expense of the Pope. The edition of London, 1747, is the most esteemed.)
Fuerstii Conc. Vet. Test. Heb. atque Chaldaiæ. 1840. (An improved edition of Buxtorf, with indexes, tables, &c.)
Lanckischi Conc. Bib. Germanico-Ebraico-Græcæ Deutsche.
Nathan (Rabbi) Concord. Hebraica. 1523.
Noldii Conc. partic. Ebræo-chaldaicarum. 1675. (The edition of 1734 is the best.)
Ravii Fons Zionis. 1677. (An abridgment of Buxtorf.)
Reuchlini Conc. Ebraicarum capita. 1556. (A Latin trans. of Rabbi Nathan.)
Stephani (Henrici) C. Græco-Latinæ N. T.
Stephani (R.) Concord. utriusque Testam.
Tympii Concord. pronominum separatorum Ebræic. et Chaldaicorum.

Englishman's Concordance, Heb. and Chald.
Taylor's Heb. Conc. adapted to the English Bible. 1754. (A huge work.)

OF THE SEPTUAGINT.

Kircheri Concord. Vet. Test. Græcæ; Ebræis Vocibus respondentes. 1607.
Tromii Conc. Græcæ versionis. 1718. (Better than Kircherer for daily use; being, in fact, a good Hebrew concordance also. "Indispensable." — MICHAELIS. "The best concordance published in any language."—DR. HALES.)

OF THE LATIN VULGATE.

Dutripon, Conc. Bibliæ sacræ. 1838. (The latest and most complete.)
Frobenii Conc. majores; cum declinabilium tum indeclinabilium, utriusque Test. dictionum. 1500.
Hugo, Sac. Bib. Concord. 1479. (The edition of Beugens, 1606, is most esteemed.)
Stephani C. cum adnotationibus. 1555.
Tossani Concordantia. 1687.

Concordances—*continued.*

Various other Latin Concordances are extant among curious book collectors; obsolete, because better are to be had.

OF THE GREEK TESTAMENT.

Arnauld, Histoire et Concorde des quatre evangelistes.
Betulii C. N. Test. 1546. (The earliest.)
Bruderi Concordantia. 1842.
Buchner's Real und verbal C. 1858.
Schaffii Lex. Syriacum et Conc. N. T. 1720.
Schmidii C. Græca N. T. 1717. (The best.)
Stephani (H.) Conc. Græco Latinæ. 1816.

Englishman's Greek Concordance.
Gall's Interpreting C. of the N. Test. 1863. (Gives the Greek original of every word; with a glossary of all the words, and their varied renderings in the authorized English version.)
Symson's Alphabetical Concordance.
Williams' Concordance. (Gives the corresponding Hebrew root of every word, and the rendering in the authorized English version.)

ENGLISH.

Gibson's Concordance. 1536. (Of the New Testament only.)
Marbecke's Concordance; that is to saie, a worke wherein by the Ordre of the letters A B C, ye maie redely find any worde conteigned in the whole Bible, so often as it is there mencioned. 1550. (The *first* Concordance to the English Bible. J. Fox, in his Martyrology, first edition, states that it was the chief cause of the Author's martyrdom.)

Knight's	Concordance.	1st Edition.	1610.
Cotton's (C.)	"	"	1630.
Bernard's	"	"	1644.
Wickens'	"	"	1655.
Newman's	"	"	1658.
Downame's	"	"	1671.
Powell's	"	"	1680.

——— (Other treatises.)
Priestley's Letter to Pitt, occasioned by his speech, &c.
Robinson (Robt.) on Sacramental tests.

Many books contain discussions of this subject, some of which are named elsewhere under "Dissent," "Establishments," and "Toleration;" but the controversy has subsided. "An arranged catalogue of the publications relating to the repeal of the corp. and test acts, from 1772 to 1790, containing a list of 165 pamphlets, mostly anonymous," was printed by J. Johnson, London, 1790. The full titles and date of publication are given in each case. There is also a list of tracts for and against the repeal in Kippis' Edition of Doddridge's lectures.

Corruption of Antediluvians.

Ranchin's Review of the C. of Trent.
Stillingfleet's C. of T. exam. and disproved.
Watermouth's Trans. of the canons and decrees, &c., with the external and internal history of the council.

It is of no consequence what general councils have done, except as part of the history of mankind. They have not contributed either to the peace or the purity of the church. Those who would search further, will find plenty of books named by BRUNET, *Manuale du libraire;* CAVE, *Hist. literaria scriptorum conciliorum:* SALMON, *Etude des conciles.* The catalogue of a single London bookseller, DAVID NUTT, 1851, offers several hundred on this subject, besides those given above.

Barham's Corrected tr. of the Bible. 1850.
Barlee's Free transl. of the Epistles. 1837. (*Very* free!)
—— ——— Minor prophets. 1839.
Barnard's Version of the Psalms. 1752.

Barnes' Notes on Job; with new trans. 1844.

——— ———— Isaiah; " " 1838.

Barrett's Synopsis of criticisms on the Old Testam., in which modern commentators differ from the common version. With an explanation of the difficulties in the Hebrew and English texts. 1847. (In this learned work, the Hebrew, Greek, and English are given side by side; and the opinions of the most eminent critics stated at length, and commented on.)

Barton's Errors and absurdities of the old English metrical translat. of the Psalms; and other late translations. 1655.

Bates' (Julius) Trans. of the O. Test., as far as Chronicles; with notes. 1773. (A curious attempt to be entirely literal; but many renderings are improved.)

Bellamy's Translation of the Bible. 1819.

——— Examination of objections. 1820. (The improprieties of this translation are exhibited in the LOND. QUART. REVIEW, 19:250, 446, and 23:287; ECLECTIC REV., New Series, 10:1, 130, 280; ANTI-JACOBIN REVIEW, 54:97, 193, 305.)

Belsham's Tr. of the N. Test. 1808. (Learned and scorching reviews are in the LONDON QUART. REVIEW, 30:79; ECLECTIC REV., 1823; EDINBURG REVIEW, Vol. 4; BRIT. CRITIC, Vol. 22, &c. Mr. B. published several vindications of his work.)

Benjoin's Tr. of Jonah; with notes. 1796. ("A failure."—ORME.)

Bennett's Specimen of a new translation of the Old Testament. 1836.

Bennett's Translation of Acts. 1847.

Bentham's Trans. of the Psalms. 1560.

——— —— Ezekiel and Daniel. 1565.

Bernard's Amended tr. of the Bible. 1842.

Bernard & Aaron on faithful transl. 1842.

Bible: according to the received version, except the substitution of the original Hebrew names, instead of the words "Lord," "God," &c. 1830.

Bishop's Bible. 1568. (A revision of Cranmer's.)

Byble, trans. out of the avthentical Latin, by y^e Englishe College at Douay. 1609. (A fine ed. was printed at Edinburg, 1796.)

Blackwall on the Wrong divisions of chapters and verses; and faulty translations. 1731. (Appended to his "Sac. Classics.")

Bland's Song of Sol., in blank verse. 1750.

——— Genesis translated according to the vowel points. 1746.

Blaney's Trans. of Jer. and Lament. 1784.

——— ——— Zechariah. 1787.

Boothroyd's Improved version of the Bible, from corrected texts; with introduction and notes. 1818.

Bowring's Literal tr. into Eng. verse. 1858.

Brameld's Gospels translated, spurious passages expunged, doubtful ones bracketted, and the text revised. 1863.

Brenton's Translation of the LXX. according to the Vatican.

Brett on the Ancient Eng. versions. 1713.

Broughton's Trans. of Daniel. 1596.

———— ——— Jer. and Job. 1610.

Buchanan's Trans. of the Psalms. 1772.

Bulkley's Answer to ten foolish reasons of the Rhemish Papists for translating from the Latin, instead of the originals. 1588.

Burrow's (G.) Tr. of Solomon's Song. 1853.

Burton's Phraseology, manners, religion, &c., of Eastern nations; and an enquiry into the accuracy of the Eng. translation. 1805.

Bush's Literal tr. of Psalms. Notes. 1838.

Butler's Horæ Biblicæ. Chap. 15.

Calender's Literal version of the New Test. 1779. (Follows exactly the order of the Greek words, and of course makes curious English sometimes.)

Caldecot's Tr. of the N. Test. Notes. 1834.

Campbell's (Alex.) New Testament, as tran. by Geo. Campbell, Macknight, and Doddridge. 1826.

Campbell's (Geo.) Tr. of the Gospels. 1790.

Carey's Tr. of Job; with illustrations, various readings, notes, maps, and plates. 1858. (Many valuable extracts in relation to customs, geography, &c.)

Carson (Alex.) on Prof. Lee's incompetency to translate the Scriptures. 1829.

Cartwright's Confutation of the Rhemish version. 1618.

Challoner's Translat. of the Vulgate. 1823.

Parker's Bible. 1568, 1570, 1572, &c. (Commonly called the "*Bishop's Bible.*)
Parkhurst's Literal vers. of Psalms. 1825.
Pearce's Tr. of 1 Corinthians. Notes. 1772.
Penn's (Granville) Critical revision of the text, and new tr. of the N. Test. 1836.
——— The same, with Annotations and Supplement. 1841.
Percy's Tr. of Solomon's Song. 1764.
Perowne's Tr. of the Psalms. Notes. 1864.
Perrin's Revised text, and new tr. of N. T.
Philalethes' [John Jones] Tr. of Colossians, Thessalonians, Titus, and James. 1819. (Socinian.)
Pick's Tr. of the Minor prophets; with notes from various Rabbis. 1833. (Jewish.)
Pierce's Trans. of Epistles of Paul. 1747.
Pococke's Tr. of 2 Peter. Notes. 1660.
Pratt's (H.) Genealogy of creation. 1861. (Tr. of Genesis from the unpointed Hebrew text.)
Purver's Literal tr. of the Bible. 1764.
Rae's Trans. of Isaiah. Notes. 1853.
Rainhold's Refutation of sundry reprehensions and cavils by which Mr. Whitaker labors to deface the Eng. translation and Catholic notes of the Rhemish Testament.
Ray's Tr. of the Sacred Scripture after the Eastern manner. 1815.
Rick's Tr. of the Minor prophets.
Reichardt's Psalms, Heb. and Eng. 1841.
Reid's Literal tr. of the Psalms. 1821. (Has the original, without points, with a grammar and lexicon.)
Rennel on the Unitarian version.
Rhemish Bible; from the Vulgate. 1582.
Roberts' (W. H.) Corrections of the English translation of the O. Test. 1794. ("Very valuable."—British Critic.)
Rodwell's Translation of Job. 1864.
Rogers' Collation of the principal English translations; with a historical account of ancient MSS. and editions. 1778. (Many fac-similes. Reprinted 1847.)
Role's Trans. of the Psalms. 1840.
Ryan's Analysis of Ward's "Errata." 1808.
Sampson's Tr. of Hebrews. Notes. 1828.

Sawyer's Tr. of the O. and N. Test., with chronological arrangement of the books, and a new division of chapters and verses. 1858–1862.
Scarlet's Tr. of the N. Test. 1798. (Conforms to the sentiments of the Universalists.)
Scott's (Dan.) New tr. of Matthew. 1741.
Scott's (Tho.) Tr. of Job. 1771. (Poetical.)
Scott's (Wm.) Tr. of the New Test. Notes. 1775.
Shadwell's Tr. of Matthew. Notes. 1859.
Sharp's Tr. of the N. Test., from the text of Griesbach. 1840. (All quotations from the Old Test. are given in Italics.)
——— ——— Hebrew Scriptures. 1864.
Shuttleworth's Tr. of the Epistles. 1829.
Sibthorp's Trans. of Jonah. Notes. 1835.
Sidney's Psalms of D. in verse. 1810.
Skinner's Tr. of the Psalms. Notes. 1830.
Smart's Metrical tr. of the Psalms. 1765.
Smith's (Eliza) Tr. of Job. 1810. (Regarded by Abp. MAGEE as then the best.)
Stather's Job in English verse. Notes.
Stennett's Tr. of Sol. Song. Notes.
Stewart's (C. E.) The New Testament and its translations. 1855.
Stock's Metrical tr. of Job. 1803. ("An entire congeries of precipitancies, mistakes, and mutilations."—MAGEE.)
——— Metrical tr. of Isaiah. (" Close, nervous, and manly."—BRIT. CRITIC, 28:466.)
Stonard's Tr. of Zechariah. Notes. 1824.
Street's Literal tr. of the Psalms; with preface and notes. 1790.
Stuart's Tr. of Rom. and Excursus. 1832.
Sturges' Remarks on Dodson's Isaiah. 1791.
Swedenborg's Tr. of the Psalms. 1760.
Sylvester's Tr. of the Psalms. Notes. 1754.
Tatham's Tr. of Job from the Coptic. 1846.
Taverner's Moste sacred Byble; recognized wyth great dylygence, after the moste faythful exemplars. 1539.
Thomson's (Cha.) Tr. of the LXX. 1808. (The only English translation, and highly approved.)
——— Tr. of the New Covenant. 1810.
Thompson's (John S.) Monotessaron: a new trans. and notes. 1826.
Thompson's (Lawrence) Tr. of the N. Test. from the Latin of Beza. 1575.
Thompson's (W.) Tr. of the N. Test.; with critical notes. 1816. (In small estimation.)
Thomson's (W. A.) Hist. of the translation and circulation of the Scriptures. 1815.
Thorn's Revised tr. of Corinthians. 1852.
Todd's (H. J.) Memoir of Bp. Walton. (Bp. W. was engaged on a revised translation of the English Bible in 1658.)
——— Vind. of our authorized vers. 1819.
——— Observations on the metrical versions of the Psalms, by Sternhold, Hopkins, and others. 1822.
Todd's Account of our authorized version. 1834.
Tomline's (Bp.) Account of the English translations. 1820.
Tomlinson's (R.) Tr. of incorrect passages in the common version. With notes. 1803.
Torshell & Madden's Bible and Apocrypha; according to the earliest English versions. 1850.
Trappe's Commentary. 1670. (Many excellent retranslations.)
Tregelle's Tr. of the Apocalypse. 1844.
Tunstell & Heath's Bible. 1541.
Turnbull (Jos.) Tr. of the N. Test. 1856.
Turner's Poetical tr. of the Psalms. 1824.
Twell's Critical exam. of the late new version. (MACE's work, both as to the text and version, is here severely handled.)
Tye's (Doctor in mvsyke) Actes of the Apos. in Englishe meter, wyth notes to eche chapter to synge; and also to play vpon the lvte. 1553.
Tyndale's Tr. of the N. Test. 1526.
——— ——— Pentateuch. 1530.
——— ——— Jonah. 1531.
——— ——— N. Testament, with the essential variations of Coverdale's, Matthew's, Genevan, and Bishop's Bible, as marginal readings. By J. P. Dabney. 1837.
Umbreight's Tr. of Job; with notes. Translated by J. Gray. 1836.
Vansittart's Tr. of the 49th Psalm. 1810.
Wake's Liberal tr. of the Psalms. 1793.
Wakefield's Tr. of the N. Test. 1790. (Unitarian. Examined by NARES, MAGEE, LAWRENCE, and the ECLECTIC REVIEW.)
Walford's Tr. of the N. Test. Notes. 1837.
——— ——— Psalms. 1838.
Walter's Letter to Bp. Marsh. 1823. (To show that Tyndale's version was not framed upon that of Luther.)
Ward's Errata of the Protest. Bible. 1706.
Webster's (Noah) Bible; with emendations of language. 1833.
Webster's (Will.) New Testament from the ancient Latin; with notes from the French of Father Simon. 1730.
Wier's Tr. of Ps., and chron. arrang. 1830.
Weiss' Tr. of Ps.; with crit. notes. 1852.
——— ——— Ecclesiastes. " " 1857.
Wellbeloved's Trans. of the N. Testament; with notes. 1833. (Unitarian.)
Wellbeloved, Smith & Porter's Holy Scriptures of the Old Testament. 1859.
Wells' (Edw.) Help to the understanding of the Scriptures. 1708. (A revised translation of the O. and N. Testament, with prefaces, Greek text, notes, &c.)
Wemys' Biblical Gleanings. 1816. (A collection of proposed emendations, with important various readings; compiled from over fifty distinguished critics.)
——— Tr. of Job; with notes. 1839.
Wesley's (John) New Testament revised.

English Bible.

Whiston's Primitive New Testament. 1745. (Important, as translating from the Codex Bezæ, the Clermont MS., and the Alexandrine MS., as collated by Mill.)

Whitaker's Histor. and critical Inquiry into the right interpretation of the Hebrew Scriptures; with remarks on Mr. Bellamy's translation. 1819.

——— Answer to Wm. Rainhold.

Whitwell's Tr. of Romans; with introduction and notes. 1848.

Wickliffe's New Testament from the Vulgate. 1387. (Not printed till 1731, when it was published by John Lewis, with a history of the various English translations. A reprint was issued in 1810, with a good memoir of W., and a continuation of the history of English versions. A beautiful edition was published in 1850, by Torshall & Madden, who spent several years on the work, and compared about two hundred manuscripts.)

Williams' (Benj.) Book of Psalms, as translated, paraphrased, and imitated, by the most eminent English poets. 1781.

Williams' (Rowland) Transl. of the Hebrew Prophets. 1866.

Williams' (Tho.) Lit. tr. of Sol. Song. 1800.

——————— ——— N. Test. 1812.

Willis' Tr. of Acts. 1789. (Not esteemed.)

Wilson's Emphatic Diaglot, notes, and new tr. of the New Testament. 1866..

Wilson's (Bp.) Bible, with notes. 1785. (Collates the received version, with preceding and subsequent versions.)

Winthrop's (J.) Tr. of the Apocalypse into familiar language. 1794.

Wintle's Tr. of Daniel; with notes. 1792.

Witham's N. Test. from the Vulgate. 1730.

Wolfe's (J. R.) Messiah in the Psalms, and Pentateuch.

Woodhouse's Tr. of the Apocalypse. 1806. (Answers the objections of Michaelis.)

Wordsworth's Tr. of the Apocalypse. 1829. (The Greek text, MSS. collations, and learned notes.)

Worseley's Trans. of the New Test. Notes. 1770. (Pays special attention to the particles.)

Wrangham's Tr. of the Psalms.

Wynne's New Test. collated with the Greek. 1764. (Chiefly follows Doddridge.)

Young's (Robt.) Tr. of the Bible. 1862.

THE FIRST ENGLISH VERSIONS.

(In the order of time.)

A.D. 706. Adhelm's Saxon Psalms.
721. Egbert's Four Gospels.
734. Bede's Gospel of John.
880. Alfred's Psalms.
1340. Roles' [or Hampole's] Psalms.
1387. Wickliffe's Bible.
1526. Tyndale's New Testament.
1530. ——— Pentateuch.

English Bible.

A.D. 1531. Tyndale's Jonah.
1531. Joyce's Isaiah.
1534. ——— Jeremiah, Psalms, and Songs of Moses.
1535. Coverdale's Bible.
1537. Matthews' [or Rogers'] Bible.
1538. Cranmer's Bible.
1539. Taverner's Bible.
1541. Tunstell & Heath's Bible.
1550. Cheke's New Testament.
1557. Geneva Bible.
1568. Bishop's Bible.
1582. Rhemish Testament.
1600. Douay Bible.
1611. King James' Version.

Some of these dates are disputed, but nearly all of them are certain.

Enmity of the Heart.

See CARNAL MIND.

Barnes' (Albert) Sermons.

Dodwell's Catalogue of the Christian writers of the first 3 centuries.
Dupin's History of ecclesiastical writers. (Gives the topics of each writer, and his opinion of the work.)
Exeter Hall Lectures to young men.
Gill's Cause of God and Truth.
Hills' (S.) Vindication of the primitive fathers against Bp. Burnet.
Jortin's (John) Works.
Keary's Commonplace book to the Fathers.
Kett's Bampton Lectures. 1790.
Lardner's Credibility of the Gospel history.
Law's Theory of Religion.
Library of the Fathers anterior to the division of the East and West. (Translated by Dr. Pusey and others, with the text. 50 vols.)

Fathers—*continued.*

Lupton's Glory of early times.
Middleton's Free Enquiry.
Osborn's Doctrinal errors of the early F.
Parker's Bibliotheca Biblica. (A comm. on the Pentateuch, from the writings of the Fathers of the first 5 centuries.)
Riddle's Manual of Christian Antiquities. (The prefix gives an analysis of the writings of the ante-Nicene fathers.)
Shuttleworth's Translation of the Apostolical epistles; with notes.
Simpson on Religious opinions.
Wake's Epistles of the Apostolical Fathers.
Warburton's Julian.
Whiston's Primitive Christianity.

Collections of the Patristic writings, and editions of the separate fathers, are exceedingly numerous. Those of Dupin, Walch, Oudin, and Hefele, are either of them sufficient. Nutt, in his sale catalogue for 1857, offers no less than 923 works, or editions, of the Fathers. The most splendid, as well as most recent, is the uniform edition of Migne, begun in 1839, and completed 1861.

The following list of the early fathers, in the order of time, will be convenient for reference.

1*st Century.*—Barnabas, Clemens Romanus.
2*d Century.*—Hermas, Ignatius, Polycarp, Papias, Justin Martyr, Irenæus, Athanagoras, Theophilus, Theodosian, Clemens Alexandrinus.
3*d Century.*—Tertullian, Minutius Felix, Hippolytus, Origen, Gregory Thaumaturgus, Dionysius, Cyprian.
4*th Century.*—Lactantius, Athanasius, Cyril, Isidore, Eusebius, Chrysostom, Hilary, Epiphanius, Gregory Naz., Basil, Ambrose, Jerome, Theodoret, Gregory Nys.
5*th Century.*—Augustin, Arnobius.

Many of the writers under Baptists, pro., are General Baptists. The name implies only that they are not Calvinistic on the subject of the Atonement.

Generation. See TRADUCTION.

Gentiles. See PAGANISM.

Gentleness. See COURTESY, FORBEARANCE, PEACEABLENESS, POLITENESS.

Gentoos. See BRAHMINISM.

Genuineness of 1 John v. 7.

Pro.

Bengelii Apparatus Criticus.
Gerhardus de Tribus testibus in Cœlo.
Ketneri Hist. dicti Joannei de S. S. Trinitate.
Wagneri (J. E.) Integritas 1 Joan. v. 7.

Bull's Judgment of the Catholic Church.
Burgess' Three letters to Dr. Scholz.
——— Selection of Tracts.
——— on 1 John v. 7. (Rep. to Griesbach.)
——— Reply to the Quarterly Review.
Butler's (C.) Horæ Biblicæ. (States the evidences on both sides.)
Calamy's (Ed.) Sermons on the Trinity.
Delany's (Pat.) Sermons and Dissertations.
Edwards' (Bp.) Body of divinity.
Emlyn's Enquiry into the authenticity, &c.
Gill's Commentary: *in loco.*
Hammond's Commentary: *in loco.*
Henderson's Mystery of godliness. (Refutation of Sir Isaac Newton.)
Hey's Lectures in Divinity.
Huysch's Examination of Porson's 4th letter to Travis.
——— Examination of Wiseman's letters.
Jones' (John) Letters to the Quart. Review.
Knittel's New criticisms on 1 John v. 7.
Martin's (D.) Critical Diss. on 1 John v. 7.
——— Examination of Emlyn's reply.
Mills' New Testament. (Giving the evidence of all antiquity, for and against, and his own judgment.)
Selection of tracts on 1 John v. 7, by Bp. Barlow, Bp. Smallbrook, Dr. Bentley, and others.
Sloss on the Doctrine of the Trinity.
Smith's (Tho.) Miscellanea.
Stillingfleet (Bp.) on the Trinity.
Travis' Letters to Gibbon. (Replies to Benson, Newton, Griesbach, Wetstein, &c.)
Wheatley's Lady Moyer's Lecture. 1734.
Wiseman's (Nic.) Two letters on some parts of the controversy.
Worcester's (Bp.) Vindication of the Trinity.

Con.

Griesbachii Diss. (At the end of his N. T.)
Scholtz, Diatribe brevis, in loc. 1 Joh. v. 7.
Semleri Introductio ad Nov. Testamentum.
Simon, Critique du passage St. Jean v. 7.
Smithii (Thomas) Dissertationes.

Benson (Geo.) on the Epistles. *In loco.*
Dobbins' (O. T.) Codex of Montford collated.
Eclectic Review. 3d Series. 3:181.
Emlyn's Inquiry into the authority, &c.
——— Answer to Martin's Dissertation.
——— Reply to Martin's Answer.
——— Collection of Tracts.
Le Clerc's Art of Criticism.
Marsh's Letters to Dr. Travis.
Michaelis' Introduction to the N. Testament. Tr. by Marsh, with notes.
Newton's (Sir I.) Historical account of two notable corruptions of the Scripture.
Oxlee's Letters to Rev. Mr. Nolan.

Genuineness of 1 John v. 7—*continued.*

Con.

Oxlee's Letters to the Bishop of Salisbury.
Porson's Letters to Archdeacon Travis.
Smith on the Socinian controversy.
Turton's Vindication of the literary character of Porson. (Reply to Burgess.)
Westminster Review. 6:523.
Wetstein on 1 John v. 7.

Mills, who is cited above, gives the evidence of all antiquity, for and against, and his own judgment. For a full account of the writers on this controversy, see Butler, and Criticus, as above; also Horne's *Introduction,* Vol. 2. But the works of Travis, Porson, and Marsh, named above, exhaust the controversy, which, indeed, is considered settled. Rev. W. Orme published, in 1830, a *Memoir of the controversy respecting the three heavenly witnesses.*

Genuineness of 1 Tim. iii. 16.

Pro.

Baumgarten, Vind. vocis θεος 1 Tim. iii. 16.
Weber, Crisis loci Paulini 1 Tim. iii. 16.

Berriman's Crit. Dissertation. (Gives the readings of 100 MSS.)
Biblical Repository. 1:777.
Henderson's Great mystery of godliness.
Stuart's Various readings of 1 Tim. iii. 16.
Velthuysen's True reading of 1 Tim. iii. 16.

Geography of Scripture. See DEAD SEA, ILLUSTRATIONS, JERUSALEM, JORDAN, PALESTINE.

Abarbanelis Dissertationes. 1495.
Adrichomii Theatrum Terræ sanctæ. 1590.
Beda (Venerab.) de Locis Sanctis. 1563.
Bernardi Commentatio de causis quibus effectum sit, ut regnum Judæ diutius persisteret quam Israel. 1825. (Prize essay.)
Bocharti Phaleg et Canaan. 1660.
——— Geographia Sacra. 1690.
Bonfrerii Onomasticon Urbium, &c. 1631.
Buntingii Itinerarium Biblicum. 1606.
Buxtorfii (Filii) Dissertationes. 1620.
Cellarii Geog. antiqua, juxta, et nova. 1701.
Clerici Onomasticon. 1715.
Cloden's Landeskunde von Palästina. 1817.
Crome, des Landes Syrien. 1834.
Deylingii Observationes Sacræ. 1735.
Dicel's Beshreibung der Welt, &c. 1704.
Dufour, Geog. Sacrée. (Describes the holy land as in the period between the Patriarchs and the Apostles.)
Eusebius de Locis Hebræicis. (The best edition is that of 1720.)
Hottinger, Geog. terræ Chanaan. 1650.
Lightfoot (Jos.), Chronographia. 1684.
Michaelis (J. D.) Geographia Hebræorum. 1751.
Raumer's Palestina. 1835.

Geography of Scripture—*continued.*

Relandi Palestina: ex monumentis vet illustrata. 1714. ("The most valuable work on Biblical geography ever printed."—Orme.)

Gibbings' Exact reprint of the Vatican Index, &c. ·1837.
Mendham's Account of the various Indexes; with extracts, anecdotes, and remarks. 1826.
——— Touching books since Sextus V. 1835.
Taylor's (Jer.) Polemic Discourses.

Books of this class are numerous, and of some of them there are various editions. The above are sufficient. The Papal church circulates its "indexes" with much reserve; and they are not generally obtainable by Protestants. They furnish a ready and complete reference to every book, chapter, or page, where anti-Papal sentiments may be found; a knowledge which no opponent could otherwise obtain. An original and complete enumeration of the Indexes previous to 1560, is given by VERGERIUS, *Catalogus Haereticorum.* The work of MENDHAM, however, is amply sufficient for most purposes.

Indexes to the Bible. See ANALYSES.

Indifference.

Polwheel's Evidence from Scripture.
Pond (Enoch) on the Intermediate state.
Priestley's Works.
Princeton Review. Oct., 1839.
Wheatly on the Book of Common Prayer.

It is impossible to separate with precision the writers on an intermediate *place* from those on an intermediate *state*. They often confound the two subjects. All Papal writers, and most Protestant, hold the latter doctrine. The books here cited are, for the most part, not controversial, nor wholly on the subject, but discuss it among other doctrines. See a list of over a hundred Latin and German writers on this subject in ALGER'S *Doctrine of a future life.* Appendix.

Intermediate State.

Pascal, Lettres Provinciales: precedèes d'un précis historique sur le Jansenisme, par Louandre.

Jansenists—*continued.*

[Patouillet], Dictionaire des livres Jansenistes, ou qui favorissent le Jansenisme.
Quesnell, Novum Testamentum.
Sauvage (Soc. Jesu) la Realité du project de Bourgfontaine. (The origin of Jansenism.)
Walchii Bibliotheca Theologica.

Amer. Bibl. Repos. 3d Series. 3:689.
Bayle's Universal Dictionary.
Beard's (Charles) Contrib. to the history of religion. (A history of this order.)
Gale's True idea of Jansenism.
Kitto's Journal. 7:34.
Leydekker's History of Jansenism.
Neale's Jansenist Church of Holland; with an account of the "Brothers of the common life."
Princeton Review. 28:132.
St. Amour, Journal of.
The Papal Bull "Unigenitus."
Tregelles' Jansenists: their rise, persecution by the Jesuits, and existing remnant. 1851.

Jansenists are comprehended, by most writers, under the term "Messieurs de Port Royal." But strictly, that appellation is applicable only to certain distinguished Jansenists who lived in a community at Port Royal, a short distance from Paris. See a vast list of Jansenist writers in DUPIN, *Cat. des livres Jansenistes, ou suspect de ces erreurs;* COLONNE, *Bibliotheque Janseniste;* and OTTIUS, *de Causa Jansenistica.* And of the opponents of Jansenism, in LABBE, *Biblioth. anti Jansenismi.*

Japhet. See ETHNOLOGY.

Gorres' Völkertafel des Pentateuch.

Perkins' Expos. of the 10th ch. of Genesis.

Jasher, Book of.

Alcuin's Trans. of the book of Jasher. (A literary forgery by one Ilive; first published in 1751.)
Donaldsoni Fragmenta archetypa carminum Hebræicorum. (Defends this bold imposture with zeal; laboring, under this cover, to undermine the proofs of inspiration.)
British Critic. Jan., 1834.
Donaldson's Jasher. (With dissertations.)
Eclectic Review. 4th Series. 12:630. New Series. 9:320.
Frazier's Magaz. 5:643.
Horne's Introd. to the Holy Scriptures.
Methodist Quart. Review. 7:82.
Monthly Review. 5:250.
Noah's (M. M.) Trans. of the book of J.

See "Bibliographical notes on the book of Jasher," by THO. H. HORNE.

Jehovah. See NAME OF GOD.

Jephthah's Vow.

Bartolocci de Sacrificio Jephthæ.
Benzelii Dissertationes Academicæ.

Jephthah's Vow—*continued.*

Calmeti Dissertationes.
Capelli (Ludov.) Spicelegium, &c.
Danhaveri (Ioann. C.) Disputationes.
Pfeifferi Exercitationes. Exerc. VII.
Schotani (Ioann.) Dissertationes.
Sennerti (Andr.) Dissertationes.
Spanheimii (Fred.) Miscellanea Sacra.
Zeidleri (Carol. G.) Dissertationes.

Amer. Bibl. Repos. 2d Series. 9:143.
Church Review. 4:415.
Dodwell (Wm.) on Jephthah's vow.
Dublin Univ. Mag. 12:273.
Edwards' (Dr. J.) Sermons.
Holbrook on Jephthah's vow.
Houghton's (Pendlebury) Sermons.
Kennicott's Dissertations.
Osgood's (David) Sermons.
Randolph's (Tho.) Sermons.
Reddel's (J. S.) Dissertations.
Romaine's (Wm.) Sermons.
Smallridge's (George) Sermons.
Smith's (James) Sermons.

Jerome.

Dalœlus de Pœnis et satisfactionibus.
Rechenbergius de Iterata regeneratione.
Zentgravius de Conversione secunda.

The Church histories of EUSEBIUS, MOSHEIM, and SPANHEIM, are full on this subject; but the whole history of the controversy may be gathered from the Epistles of CYPRIAN, and MARINUS, *Vita Cyprianae.*

Latitudinarians.

The term is used by MOSHEIM as including what some call *Low-Church men*. He enumerates as Latitudinarians, Chillingworth, Cudworth, Hales, Whichcot, Tillotson, &c. WALCH uses the term as nearly equivalent to Deists. See INDIFFERENTISTS.

Laughter. See GRAVITY, JESTING.

Law of God. See COMMANDMENTS, LAW OF MOSES.

Law of Nations. See ORIGIN OF LAWS.

Wright's English literature and superstitions of the middle ages.

The following list is given by East Apthorp, in his *"Letters."*

Collections.

Schardius, 1673. Pistorius, 1613. Reuberus, 1619. Urstisius, 1670. Goldastus, 1661. Frekerus, 1717. Lindenbregius, 1706. Meibomius, 1688. Paulinus, 1698. Leibnitz, 1700. Kulpisius, 1685. Schilterus, 1702. Reineccius, 1702. Ludewig, 1718. Echard, 1723. Canisius, 1725. Pezius, 1720.

Individual Histories.

A. D.	
283– 565.	Sigonii hist. de occid. imperio.
570–1286.	——— ——— regno Italiæ.
360– 570.	Warnefridi F. Diaconus.
– 552.	Jornandes, de rebus Geticis.
176– 628.	Isidori Hist. Gothorum.
O. C.– 600.	Gregorius Turonensis.
600– 735.	——— Continuatus.
714– 900.	Annales Francorum fuldenses.
741– 842.	Adelini Benedictini annales.
U.C.– 751.	Antiq. Gauloises de C. Fauches.
755–1076.	Adami Bremensis.
768– 814.	Eginhardi vita Caroli Mag.
778– 840.	Thegani vita Ludovici Pii.
788–1504.	Alberti Crantzii de ecclesiis.
830–1370.	Ioannes Trithemius.
1– 907.	Regino, cum.
O. C.–1228.	Conrado, et.
O. C.–1352.	Lamberto Schnab.
O. C.–1100.	Hermanus Contractus.
1073–1082.	Brunonis Hist. belli Saxonici.
O. C.–1152.	Otto Frisingensis.
1162–1237.	Godefridi monachi Annales.
381–1112.	Sigebertus Gemblacensis.
1113–1210.	Robertus de Monte.
O. C.–1250.	Vicentii Speculum.
1270–1378.	Alberti Annales.
U.C.–1278.	Polonus, de quo Niceron xiv. 195.
1163–1343.	Continuatio.
1295–1362.	Henricus de Rebdorf apud Frek.
1326–1400.	Chroniques de Froissard.
1–1472.	Platina de vitis Pontificum.
1–1494.	Caspianus quem excipit.
1494-1540.	Paulus Jovius.
1461–1500.	Memoires de Philipe de Comines.

For an account of many hundred writers of the middle ages, see Cang, Cave, Dewhear, and Morhoff, mentioned above.

A most convenient *tabular* view of *all* the principal historians, with a notice of the various editions, is given in Freker's *Directorium historicorum medii aevum.*

The *literary* condition of the middle ages is abundantly illustrated by Hody, *de Graecis illust.;* Roscoe, *Lorenzo de Medici;* and Hallam, *History of Literature.*

Simleri Scripta veterum Latina de una persona, etc.
Stozza de Dogmatibus Chaldæorum.
Ursini Tractationes Theologicæ.
Wolfhardi Nest. antiquum et novum.

This once great and powerful sect—about as orthodox on the whole as the Roman Church of its time—was assailed by hosts of writers, none of which were more bitter than Cyril Alexandrinus. They are now few and feeble, and only their history is interesting. BUDDEUS, in his *Isagoge,* gives a list of writers on this subject, pro and con, previous to 1700; but scarcely any of them can be found now.

Nestorians, History of.

Doucin, Hist. du Nestorianisme. (A very interesting and learned account of Nestorius and his doctrines; with observations.)

Non-conformity as it was stated and argued by commissioners on both sides in 1661.
Price's History of Protestant N. in England.
Rees' History of Protestant N. in Wales, from its rise to the present time. 1861.
[Reed's (And.)] Progress of Non-conf. 1825.

England, during the 17th century, produced innumerable publications on this controversy. Most of these are now obsolete, or very scarce; but the above can be had. I distinguish Non-conformists from Dissenters. The latter still exist and multiply. The former are those who were turned out of their parishes, in the 17th century, and their followers. I may not have divided all the citations accurately, as the terms are by some used interchangeably.

Non-Essentials. See FUNDAMENTALS.

Non-Jurors.

North British Review. 12:354. (Adduces the arguments pro and con.)

Various writers of eminence mention the female Pope as a fact of history, without discussing the proofs—such as Marian, a Scotch monk, 1060; Martin Polaccus, Abp. of Cosenza, 1277; Amabric, an Augustine Prior, 1362; and Korner, a Dominican, 1435. See a collection of the arguments by all the principal writers who reject the story of Pope Joanne, in Allatius, named above.

Popery. See ABSOLUTION, AURICULAR CONFESSION, ANTICHRIST, CELIBACY, COUNCIL OF TRENT, DECRETALS, IMAGES, INDULGENCES, INFALLIBILITY, JUSTIFICATION, KEYS OF THE CHURCH, MASS, MIRACLES, PENANCE, PERSECUTION, POPES, PRAYER FOR THE DEAD, PROPHECY, PURGATORY, REFORMATION, RELICS, SUPREMACY, SACRAMENTS, TRANSUBSTANTIATION.

Winter's Present state of Popery. 1800.
Wylie's The Papacy; its genius, dogmas, history, and prospects. 1851.
Young's Chief points of controversy, &c.

At the Reformation, writers on this subject were innumerable. Just after the Reformation, most theological writers handled the question, more or less. When Papacy seemed about to be restored in England, another multitude of works, on both sides of the subject, appeared. The above extensive list comprises most of the best treatises now accessible. Those who desire to look further into the controversy will find hundreds of other writers on both sides in Peck's *Complete catalogue of all the discourses written for and against Popery in the time of James II.*, 1779; Claggett's *Present state* (1687) *of the controversy between the Church of England and the Church of Rome;* and in Lowndes' *British Librarian.* The last named quotes over 900 *English* writers on the subject.

About 90 hymn books are mentioned by LOWNDES, and nearly 2000 by SEDGWICK, in his Catalogue of hymn books. DR. WATTS says: "Of all our religious solemnities, psalmody is the most unhappily managed." He himself did more to remedy this evil than all other writers.

Princeton Review. 26:689.
Vaughn's (Robert) Essays.

Rationalism differs from Neology chiefly in that it is the more recent form of the Theology which has prevailed for some years in Germany. I distinguish Rationalists from Atheists in that they acknowledge a Supreme Power; and from Deists in that they are professed Christians. The writers cited are a mere specimen, but are more than sufficient.

It is not possible to draw an exact line between Neology and Rationalism, as they are but phases of the same thing. For other writers, see SAINTE, *Histoire critique de Rationalismus*, jusq. 1841; and STAUDLIN'S *Geschichte d. Rationalismus.*

Sibylline Oracles. See ORACLES.

Sibyllina Oracula. (Several editions.)
Assemanni Bibliotheca.
Baltus, Réponse a l'hist. de Fontenelle.
Betulii Oracula Græca.
Blondel, des Sybylles célebrées.
Cellier, Hist. generale des auteurs.
Crasseus de Carminibus, etc.
Fontenelle, Histoire des Oracles.
Friedliebii Orac. Sib. prætextis prolegomenis illustravit, adnotationes, etc.
Galleus de S. eorumque oraculis.
Markius de S. oraculis. (Ag. Crasseus.)
Schmidtii Versio N. T. (Appendix.)
Van Dale de Oraculis Ethnicorum.
Vossius de S. Oraculis aliisq. quæ christi natalem processerunt.

Beaumont's Gleanings of antiquities.
Blondel on the Sibyls, and the influence of their books on the Christian religion. (This book is all that most persons need examine on this subject.)
Bradford (J.) on the Truth of Christianity.
Chandler (Edw.) on Christianity.
Christian Review. 13:81.
Cudworth's Intell. system. Ch. 4, sec. 16.
Doddridge's Lectures. Part 6.

Sibylline Oracles—*continued.*

Floyer's S. Oracles translated and compared with Scripture. (Strongly maintains the authenticity of these fables.)
Galles on the S. oracles.
Jortin's Remarks on ecc. hist. (Takes as much pains to destroy their credit, as Floyer does to support it.)
Napier on the Apocalypse. (Appendix.)
Simon on the Various editions of the Bible. (Reviews the position of Vossius.)
Van Dale's History of Oracles.
Whiston's Vind. of the S. oracles, with the oracles themselves, and ancient quotations from them, in the originals and in English.
Yelverton on the Sibyls. (Asserts their authority, and replies to Casaubon, Blondel, and others.)

These are not the S. oracles of the Romans, which, from the time of Tarquin, were preserved by the Quindecemviri, but are generally supposed to have been forged in the 2d century. Many books have been written for and against their genuineness.

Sickness. See VISITING THE SICK.
